Safety First
Track your journey to workplace safety and resilience BSI's Health and Safety Baseline package.

BSI partners with our clients to embed a culture of health, safety and wellness in organizations of all sizes, worldwide.

Resilient organizations recognize health and safety as central to future success.

Occupational health and safety management systems deliver:
• Reduced work related injuries, ill health and death
• Elimination or minimization of OHS risks and creating a safer workplace
• Improved OHS performance and effectiveness—thus reducing insurance premiums and potential fines
• Demonstrated corporate responsibility and meeting supply chain requirements—showing social responsibility
• Protection of brand and reputation—which would increase sales growth and investment opportunities
• Motivation and engagement of staff through consultation and participation – thus increasing employee communication, productivity, retention and the ability to attract talent
• ISO 45001, the first global standard for OHS, can provide the framework required for a Health and Safety Management System

86,000 clients in 193 countries
49% of the Fortune 500
75% of the FTSE 100
77% of the Nikkei 225 Index
23 of the top 25 medical device manufacturers certified
50% out of the Top 100 on Glassdoor's Best Places to Work

Safety First
Safety First
A full solution program to measure and identify your health and safety baseline and prepare for ISO 45001 implementation.

Let BSI help you set the standard for health and safety.

Establishing your organization's baseline is the first step to jumpstart your health and safety management initiative. Whether it is preparing for ISO 45001 implementation or organizing your health and safety programs, BSI's Health and Safety Baseline program can get you started with:

- On-site training on the 45001 standard
- Ninety days of data collection facilitated by Entropy Connect to catalog all incidents, injuries, illnesses, near misses, hazards and risks in real time
- Baseline report with gap analysis provided by a BSI auditor

The findings of the baseline report serve as a health and safety benchmark and help inform the course of action on your journey of workplace safety and resilience.
Resilient organizations recognize health and safety as central to future success.

Occupational health and safety management systems deliver:

• Reduced work related injuries, ill health and death
• Elimination or minimization of OHS risks and creating a safer workplace

**Health and Safety Baseline Program**

**Phase One**

**Training**

**Requirements Training Course**
Participants learn the key aspects of the 45001 standard and what it requires of them. Your project team gains an in-depth understanding of the terms, definitions and the main requirements of the standard.

**Continued Training Course and Entropy Connect**
In the morning, participants gain an understanding of the context of the organization and learn how to identify hazards, risks and opportunities.

In the afternoon, training on the Entropy Connect mobile tool is provided to convey the features and functionality around the keys areas of your business.

**Phase Two**

**Mobile Data Collection**

**Data Collection Using Entropy Connect**
The client project team uses the Entropy Connect mobile tool to identify and record the level of the organization's commitment, communication and awareness as well as identify risks, opportunities and best practices. All data is recorded using Entropy Connect mobile tool and contributes to the Health and Safety Baseline Report.

**Phase Three**

**Gap Analysis**

**Self Assessment Questionnaire**
The BSI auditor visits on-site to complete the self-assessment questionnaire. This data contributes to the Health and Safety Baseline Report, along with data collected during days three through ninety-three.

**BSI Gap Assessment**
The BSI auditor presents the Health and Safety Baseline Report. Based on the information gathered, the report will highlight the weaknesses, strengths, and gaps in your system and serve as the gateway to your ISO 45001 Health and Safety journey.
