BSI Training Academy

BIM PAS 1192 Part 3: Asset Management training course

Essential information about the course

Level **1** **2**

BIM training can help support your strategic direction, prove competency, and embed the knowledge of BIM in your organization. If you are a building/infrastructure asset owner or information manager/contractor working to BIM Level 2, we can not only provide a detailed understanding of the PAS 1192-3 standard and how the Common Data Environment works in asset management, we can also show you how it allows asset owners/operators set their information requirements.

This one day course is designed for those who have some knowledge of BIM Level 2 (who may previously have attended BIM Fundamentals or equivalent) and will provide an understanding of BIM Level 2 from the perspective of designers and constructors and the tools used in the supply chain to manage and exchange information (CDE, COBie, IFC). Our expert tutors will make sure you complete the course feeling confident that you can apply your new knowledge as soon as you step back inside your organization.

Our course agenda

- Benefits to you, welcome and introductions
- Course aims, objectives and structure
- The importance of asset and information management
  - Purpose of asset management

BIM PAS 1192 Part 3: Asset Management training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from whether you're new to BIM or looking to demonstrate you're running PAS 1192-3 compliant projects. We create a positive learning environment so you retain the knowledge and acquire the skills that will continue to be of use beyond the course.

Make sure this is the right course for you

This course is for you if:

- You are involved in communicating the benefits of BIM within your organization
- You're an asset or facilities manager working on behalf of an asset owner or operator
- You're an asset contractors or in-house teams delivering maintenance, repairs, minor refurbishment works, condition surveys
- Project information managers (client side or supply side) may find it helpful to understand how operational information gets specified as part of a project EIR

What is the course like?

- One day
- Led by a BSI expert tutor
- Understand the asset information management processes for BIM Level 2
- Sessions on
  - The linkage to asset management
  - How asset owners/operators set their information requirements
  - How suppliers of information (maintenance contractors, in-house teams, surveyors, engineers) respond with their information plans
  - How the Common Data Environment works in asset management
  - Roles and responsibilities in asset information management

How will I benefit?

- Understand how to formulate Organizational and Asset Information Requirements
- Understand how the asset lifecycle triggers the need for information
- Understand the role of the Asset Information Model and the need to maintain it
- Work through the key information management processes in group activities
