

● ISO/IEC 27001 Journey Guide

Your steps to a fully updated
ISO/IEC 27001:2022 certificate

On February 16 2022, the ISO/IEC 27002:2022 Information security, cybersecurity and privacy protection – Information security controls was published, a change that will lead to a revision to ISO/IEC 27001 expected to be published by October 2022. To ensure complete conformity moving forward, we've created this infographic – your journey to a smooth transition.

Step 1

Buy a copy of the ISO/IEC 27002:2022 standard. This will allow you to become familiar with the changes being made.

Step 2

Train your team to help them understand and apply the changes as necessary. Our training and resources page can help support you on your learning journey.

Skills updated

By taking the new BSI [Implementing the changes](#) and [Implementation ISO/IEC 27002](#) training courses you and your team will be prepared to go through the transition journey.

Step 3

Do a Gap Analysis of existing controls vs the listed in ISO/IEC 27002:2022. Its Annex B shows the correspondence and changes between the new and previous editions.

Step 6

Validate the changes through an internal audit. Have they been implemented effectively?

Step 5

Take a look at the evidence and justification for the inclusion or exclusion of necessary controls, and update your SOA accordingly. Be sure to implement the applicable changes based on your risk treatment plan and new controls.

See the benefits

Even this early in the process, you'll begin to see the benefits of the changes you've identified based on your new knowledge and risk assessment insights.

Step 4

Take a look at your risk assessment. Is it aligned with your organization's objectives and context? Ensure that it is.

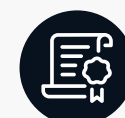

Step 7

Get the most out of the improvements on your ISMS or best practices in place. Your organization has been strengthened in information security, cybersecurity and organizational structures, per the new and revised controls.

Update-ready

By this point, you're almost ready to update your ISO/IEC 27001 certificate.

ISO/IEC 27001:2022 Publication

Step 8

Get in contact and schedule your transition audit with your BSI representative.

Step 10

Keep your process improvement cycle and embed information resilience within your organization.

Congratulations!

You've made it, get your updated ISO/IEC 27001:2022 certificate

Step 9

Get your audit report, take a look at your auditor's feedback and act based on the results.

To transition to ISO/IEC 27001:2022, your Auditor will confirm the implementation of any new necessary controls that you have chosen and their alignment with your ISMS.
