ISO 31000 **Introduction** training course

Essential information about the course

Level  1

All organizations face uncertainty in meeting their objectives. But with good decision making, you can add value and protect your organization. That's where ISO 31000 risk management guidelines can help.

ISO 31000 is an international standard for risk management. As a proven methodology, risk management provides a systematic framework and process for maximizing areas where outcomes can be controlled, while minimizing the impact when the outcome cannot be predicted.

By attending this one-day course you'll learn the best practice principles, framework and process

for managing risks relevant to your organization. You'll be able to explain the key challenges of risk management, the importance of ISO 31000 and the benefits it can bring your organization. Plus you'll understand the governance and leadership role in managing risk at all levels of your organization.

Packed with practical activities, group discussion and classroom learning, our expert tutors will make sure you complete the course feeling confident to apply your new knowledge as soon as you step back inside your organization.

Our course agenda:

- Welcome and introductions
