ISO 45001 **Implementation** training course

Essential information about the course

Level **1 C 2 C**

ISO 45001 is the world's first ISO management system standard for Occupational Health and Safety (OH&S). Its focus on risk prevention, innovation and continual improvement will benefit organizations with the foresight to achieve this global standard through increased organizational resilience. Suitable for organizations large or small and in any industry, it is intended to replace the widely implemented BS OHSAS 18001.

This course is suitable for those who already have a good knowledge of ISO 45001 and the key principles of an OH&S management system and who are involved in the planning, implementing, or supervising of an ISO 45001 management

system. Using a step-by-step approach you will learn how to develop an implementation plan, create necessary documentation, and monitor your OH&S management system. It will also help you to recognize a typical framework for implementing the standard using the "Plan Do Check Act" (PDCA) cycle.

This two-day course uses our high impact accelerated learning approach and is packed with practical activities, group discussion, and classroom learning. Our expert tutors will make sure you complete the course feeling confident that you can apply your new knowledge as soon as you step back inside your organization.

Our full course agenda helps you understand what to expect:

Day one

- Introductions, overview of learning objectives and course structure
- Implementation process and integration
- Documented information
- Understanding the context of your organization
- Baseline gap analysis and Task/Gantt chart
