

The PAS process

A PAS can be brought to the market in 9-12 months.

1 SPONSORSHIP

BSI is commissioned to produce a PAS

2 SCOPING

BSI research into stakeholders, development of a scope and base document, closely overseen by a dedicated project manager

3 RESEARCH

BSI research into related standards and other published information to ensure there is no crossover

4 STEERING GROUP

Technical comment resolution by a steering group of experts, chaired by BSI and independent of any external interest

5 REVIEW PANEL

A public consultation targeted at a selected review panel identified as having expertise and a close interest in the subject matter

6 FINALIZE DRAFT

Comments arising from the public consultation are discussed by the steering group to achieve a document underpinned by consensus. Once all comments, including that of the steering group, have been resolved in line with our governance requirements (PAS 0) the PAS is published

7 PUBLICATION AND PROMOTION

We have a flexible and customized approach to the design and delivery of the final content, allowing for visible sponsor association. Acknowledgment is in the foreword and often by other means such as the use of logos
