

## BSI Training Academy

# ISO 14001:2015 **Requirements** and **Implementation** training course

### Essential information about the course

Level 

ISO 14001:2015 helps organizations implement a flexible and robust Environmental Management System (EMS), making them more resilient and sustainable. Organizations around the world invest in training their people with BSI so they have the skills and the knowledge to deliver the benefits of implementing ISO 14001.

If you're new to ISO 14001 and will be involved in implementing a management system then this course is for you. You will learn the importance of an EMS and get the vital skills to interpret and implement the requirements, carry out gap assessment, as well as gain awareness of management tools and techniques. You will learn to interpret and apply the key concept and

principles of the standard to existing processes within your organization. Using a step-by-step approach, you'll learn how to develop an implementation plan, create necessary documentation, monitor your EMS and achieve continual environmental improvement.

Combining our 14001 requirements and implementation course, over three days, this course provides an in depth understanding of the standard and best practice implementation methods. The three-day course is packed with practical activities, group discussion and classroom learning to help you retain the knowledge to implement an effective management system.

**Book today at**  
[bsigroup.com/training](https://bsigroup.com/training)

Upon successful completion of your course, you'll receive an internationally recognized BSI certificate.

**"It is great having a knowledgeable tutor. Our BSI tutor was great and a fountain of knowledge. Excellent course delivery."**

Driver and Vehicle Licensing Agency, UK government organization
