

Certified Information Systems Auditor (CISA®) training course

Essential information about the course

Level

As demand grows for professionals with combined expertise in information systems audit, control and security, Certified Information Systems Auditor (CISA) has become the preferred certification for individuals and organizations focusing on building a resilient information system.

This intensive four-day course focuses on the ISACA® framework, which has five domain areas known as 'Job

practice areas' for certified information system auditors. You'll work through these five domains and get the knowledge, skills and best practices to successfully audit, control and secure an information system.

This course will prepare you with the knowledge and skills to complete the ISACA CISA multiple choice exam, which will give you *Certified Information Systems Auditor* status.

Course outline

Over the four days you will work through these five domain areas:

- **Domain 1: The process of auditing information systems**
Learn how to provide audit services in accordance with IT audit standards
- **Domain 2: Governance and management of IT**
Learn how to put the necessary leadership and organizational structures and processes in place to achieve objectives and to support your organization's strategy
- **Domain 3: Information systems acquisition, development and implementation**
Understand practices for acquiring, developing, testing and implementing an information system that meets your organization's strategies and objectives
- **Domain 4: Information systems operations, maintenance and support**
Ensure your processes to operate, maintain and support your information system meet your organization's strategies and objectives
- **Domain 5: Protection of Information Assets**
Learn how your organization's security policies, standards, procedures and controls can ensure the confidentiality, integrity and availability of information assets

Certified Information Systems Auditor (CISA®) training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.

Make sure this is the right course for you.

This is the course for you if:

- You're an IS audit and assurance professional with 3-5 years' experience
- You need to develop expertise across IS audit, control and security
- You're looking to gain an internationally recognized Certified Information Systems Auditor qualification

What is the course like?

- Four days
- Led by a leading European security trainer
- You'll receive comprehensive course materials

How will I benefit?

- Learn to audit, control and secure an information system
- Gain knowledge of the industry leading ISACA framework
- You'll be prepared for the ISACA CISA exam
- Network with likeminded peers
- Develop professionally

Upon successful completion of this course, you'll receive a BSI certificate.

To get your CISA certification, you will then need to book your CISA exam via the ISACA website. Please note this must be booked 2 months prior to when you wish to complete the exam.

Why train with BSI?

- You'll learn from our award winning tutor, Sean Hanna
- Our small classes make it a more personalized learning experience
- We have interactive sessions that give you plenty of opportunities to ask questions and learn from your peers
