

Certified Information Systems Security Professional (CISSP®) training course

Essential information about the course

Level **1 C 2 C 3 C 4**

As information security continues to grow as a profession, so does the requirement to recognize experienced professionals with the relevant knowledge and skills. Certified Information Systems Security Professional (CISSP) is a globally recognized independent and objective measure of expertise in information security, which this course can help you achieve.

This intensive five-day course covers key Information Systems Security Certification Consortium (ISC2) topics including cloud computing, mobile security, application development

security, and risk management, helping you gain the knowledge to stay ahead and manage critical information security issues affecting your organization.

With our high quality content and access to the most relevant tools developed to support with the CISSP exam, our training is what you need to enhance your career.

Course outline

Over the five days you will work through the eight CISSP Common Body of Knowledge (CBK) domains areas:

- Domain 1: Security and risk management
- Domain 2: Asset security
- Domain 3: Security engineering
- Domain 4: Communication and network security
- Domain 5: Identity and access management
- Domain 6: Security assessment and testing
- Domain 7: Security operations
- Domain 8: Software development security

Upon successful completion of the exam, you'll receive a BSI certificate.

This course will prepare you with the knowledge and skills to complete the CISSP exam, which will get you Certified Information Systems Security Professional status.

Certified Information Systems Security Professional (CISSP®) training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.

Make sure the course is right for you.

This is the course for you if:

- You've more than five years' experience working in a relevant information security role
- You're looking to gain an internationally recognized Information Systems Security Professional qualification

What is the course like?

- Five days
- Led by a globally recognized trainer
- You'll work through real life practical examples
- You'll receive an iPad Mini, comprehensive course materials and exam focused tools to take away

How will I benefit?

- Gain knowledge of the eight CISSP domains
- Enhance your ability to stay ahead of information security threats
- You'll be prepared for the CISSP exam
- Network with likeminded peers
- Develop professionally

Why invest in this course?

- Free Apple iPad Mini is included for you to take-away with all the course notes and materials
- Your own digital copy of the new Official ISC2 Guide to the CISSP CBK® Seventh Edition is provided

You'll get access to practice exam materials including:

- Quiz Engine with over 1800 questions related to the CISSP CBK 2015
- Scenario based questions across all eight domains
- Online training for 90 days, including discussion groups, tips and tricks, and computer based tutorials on all domains
- 'Drag and drop' and 'hotspot' questions quiz

Training delivered at your site

This could be a convenient and cost effective option, especially if you have multiple delegates.
