

The EU General Data Protection Regulation (EU GDPR) comes into force on 25 May 2018.

### ***Are you ready for it?***

Among its mandates is the requirement to appoint a knowledgeable Data Protection Officer (DPO) tasked with monitoring compliance, managing internal data protection activities, training data processing staff, conducting internal audits and more. There is a lot of opportunity for data protection professionals with the right training and education.

We have a range of training courses to train you the skills to ensure your organisation is ready for the GDPR regulations.

### **EU General Data Protection Regulation (GDPR) Foundation training course (1 day)**

This foundation course will help you understand how the regulation works, so you can prepare and work towards compliance for the new regulation

### **Certified Information Privacy Professional Europe (CIPP/E) training course (2 days)**

Achieving a CIPP/E credential shows you have the comprehensive GDPR knowledge, perspective and understanding to ensure compliance and data protection success in Europe.

## Certified EU GDPR foundation level

### training course

#### Essential information about the course

Our one-day foundation training course to the General Data Protection Regulation (GDPR) will help you understand how it applies to your organization and the potential benefits.

By attending this course you will be better prepared to carry out a discussion around the new regulation, conform to the parameters, as well as understand the background, updated concepts, principles, terms and definitions used in the new GDPR.

This foundation course will also help you understand how the regulation works, so you can prepare and work towards compliance for the new regulation that comes into force on 25 May 2018. In addition you'll be in a position to start a scoping exercise that can then lead to a gap analysis, privacy impact and risk assessment or a full data protection audit.

#### Course outline

During this one day training course you will work through the following topics:

##### Fundamentals of EU GDPR

- Key differences between the Data Protection Acts of old and the EU GDPR
- Data subjects, subject access requests and their rights
- Dealing with subject access requests
- Marketing requirements and potential changes to targeting customers

##### The implementation path to EU GDPR compliance

- Privacy by design
- Data protection impact assessments (DPIA)
- Data audits
- Training and competence requirements
- Incident response and breach reporting
- Updating policies and procedures

##### International data transfers

- Replacing Safe Harbour, the Privacy Shield and the new requirements

Upon successful completion of the course, you'll receive a BSI certificate.

You'll also be in a position to start a scoping exercise that can then lead to a gap analysis, privacy impact and risk assessment or a full data protection audit.

...making excellence a habit.™

# Certified EU GDPR Foundation training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses that can help you develop professionally. We create a positive learning environment so you retain the knowledge and acquire the skills that will continue to be of use beyond the course.

## Make sure the course is right for you.

### This is the course for you if:

- You're a manager seeking to broaden your knowledge of the new EU GDPR
- You're an individual who needs to understand your new GDPR responsibilities
- You're new to information compliance with some exposure to the new regulation

### What is the course like?

- One day
- You'll receive comprehensive course materials
- Led by a BSI subject matter expert

### How will I benefit?

- You will develop a comprehensive understanding of the requirements for the new GDPR
- Gain the confidence to interpret data protection regulations and ensure best practice around GDPR
- Greater ability to identify potential impacts of privacy on IT products and services at the beginning of their lifecycle

## Why train with BSI?

- We have interactive sessions that give you plenty of opportunities to ask questions and learn from your peers
- You will be able to network with likeminded peers and develop professionally
- You will leave with a good knowledge of the regulations and an understanding of how your business function must contribute to achieve GDPR compliance for your organization

### Training delivered at your site

This could be a convenient and cost effective option, especially if you have multiple delegates.

### Other professional development courses with BSI:

Certified Information Privacy Professional Europe (CIPP/E®)  
Certified Information Privacy Technologist (CIPT®)

# Certified Information Privacy Professional Europe (CIPP/E®) training course

## Essential information about the course

Level **1 C 2 C 3 C 4**

As access to information across multiple channels increases, the need to manage privacy of personal and corporate information becomes more important. With our Certified Information Privacy Professional Europe (CIPP/E) training course, you can get the knowledge to help you can stay ahead of the current data protection legislation and confidently manage privacy for your business.

Our two-day Certified Information Privacy Professional Europe course is based on data protection laws and industry best

practices that organization's need to comply with to manage privacy. You will learn about models for privacy enforcement, key privacy terminology and practical concepts for protecting personal data and data flows between different countries.

This course will prepare you with the knowledge and skills to complete the International Association of Privacy Professionals (IAPP) CIPP/E exam, which will give you Certified Information Security Manager status.

## Course outline

Over two days you will work through the following topics:

- **Introduction to European data protection**  
Learn about the origins of privacy in Europe, the European regulatory institutions and the legislative framework for current EU data protection law at both the EU and state level.
- **European data protection law and regulation**  
Explore data protection concepts and principles, application of the law, legitimate processing criteria, information provision obligations, data subject rights, confidentiality and security, notification requirements, supervision and enforcement and international data transfers.
- **Compliance with European data protection law and regulation**  
Examine the employment relationship, surveillance activities, marketing activities, internet technology and communications, and outsourcing.

Upon successful completion of this course, you'll receive a BSI certificate.

To achieve certified status you will need to complete the IAPP CIPP/E exam. Please note the cost is included in the course; however you will need to book your exam via the IAPP website.
