- 16:50 – 17:00** **Q & A**

ISO 45001 Occupational Health and Safety was published on 12th March 2018 and OHSAS 18001 has been withdrawn. The organizations which currently certified to OHSAS 18001 will have a three-year period to upgrade to ISO 45001.

Whether you are currently working to BS OSHAS 18001 or country specific standards, you can upgrade to ISO 45001 now. Or if you are new to occupational health and safety management it's a great framework to put into your business to build organizational resilience.

BSI had held an expert group meeting which consist the representatives from CIC, HKARMS, Housing Authority, IOSH and major contractors of Construction Industry. Participants of the expert group had contributed their expert opinions on their expectations and key requirements on how ISO 45001 can help to improve the safety performance of HK.

Enroll now to have a comprehensive understanding on the ISO 45001 requirements on the best practice on OH&S management system. We will also share the output of the expert meeting to allow the industry's safety practitioners to have better understanding of the specifiers' expectations.
