

Seminar: Get Certificated in Blockchain Technology

9 May 2019 (Thursday)

From enabling efficient and accurate financial services to providing visibility along the supply chain, and from streamlining government services to delivering confidence in identity accuracy to consumers, blockchain and DLTs have the capacity to revolutionize the way we do business. While economic efficiencies, improvements in standards of living and increased access are just some of the benefits of applying blockchain technologies, there is a broad community expectation that an appropriate legal and standards framework will be developed to establish market confidence.

What is "QTBA Certification"?

- This certification highlights the critical role will have in leading international efforts to develop blockchain standards under ISO/TC 307 Blockchain and electronic distributed ledger technologies by enabling the spread of technology and creating new sustainable industries for the future.
- The establishment of this certification supports privacy, security, identity, smart contract, governance and other matters related to blockchain technology may contribute to further establishing market confidence in the use and application of the technology.

In this seminar, the speakers will introduce the importance, benefits of blockchain as well as the blockchain certification.
