Training delivered the way you want it

Training is rarely a one-off need. From every-day training needs to ongoing skills development and support, we provide business-wide training programmes. Depending on your requirements, we can deliver your training in a number of ways:

- **'Face to face' classroom training –**
  public classroom or in-house

  If you have a group of people to train, and a single location is practical, we can deliver training at your premises. This is especially relevant if you're engaging one of our business improvement training courses, like information security, where sensitive topics are explored. Alternatively, should you have multiple sites, this can also be delivered remotely via our Connect Learning Live virtual classroom training.

- **Connected Learning Live 'virtual classroom' training –**
  online training for complete flexibility

  If you have people at various sites, you can choose a private 'virtual classroom' via Connected Learning Live. Your tutor will engage with delegates, share discussions and deliver high-quality, interactive learning online, regardless of location.
  Connected Learning Live puts you in control.
