ISO/IEC 27001 **Lead Auditor** training course

Essential information about the course

Level

As internationally recognized best practice for an information security management system (ISMS), ISO/IEC 27001 helps organizations to build resilience and protect information. So it's no surprise that companies invest in training their people to get the knowledge and skills to use ISO/IEC 27001 to secure their business.

Our ISO/IEC 27001 Lead Auditor training is an intensive five-day course where you'll discover internationally-recognized best practice auditing techniques so you can confidently lead auditing activities.

You'll already have a detailed understanding of ISO/IEC 27001 requirements.

Many delegates on this course will have already attended our ISO/IEC 27001 Internal Auditor training course.

Using accelerated learning techniques our tutors will make sure you leave with the skills to lead, plan, manage and follow up an ISMS audit in accordance with internationally recognized best practice (ISO 19011). It will culminate on day five with a written exam and upon successful completion you'll be awarded an internationally recognized auditing qualification. This course will not only benefit you when you return to your organization, but it could also be an opportunity to advance your career with a professional qualification.

"It was a very good experience. The tutor explained concepts very well."
