

Business Continuity Consultancy Services

Make your business resilient to an ever changing and challenging world.

In today's interconnected world, we need to protect ourselves from threats that range from technical failures through to pandemics. It is crucial to have a robust and resilient business that can quickly respond and recover from any kind of disaster and continue to operate in even the toughest of unforeseen circumstances.

Why BSI

BSI championed the global standard for Business Continuity (ISO 22301)

ISO 22301 is the international standard for Business Continuity Management which was originally published by BSI as the Business Continuity Standard BS 25999-2 in 2007.

BSI understands resilience and continuity planning. We know how important it is for organizations to have a documented process to mitigate, prepare, respond, recover, and manage the impacts of any disruption to an organization.

Business benefits of effective business continuity planning:

- Provides a **framework** for managing resilience and continuity within your organisation
- Identify and manage current and **future threats** to your business
- Understand the **financial** impact of business outage
- Take a proactive approach to minimizing the impact of incidents, ensuring the **safety** of people and the **survival** of your business
- Keep **critical functions** up and running during times of crises
- **Minimize downtime** during incidents and improve recovery time
- Demonstrate **resilience** to customers, suppliers, and preserve company **reputation**
- Maintain **regulatory** compliance during adverse events

How BSI Can Help

Develop a Business Continuity Programme

Whether you are just starting out on your Business Continuity journey, or looking to enhance your current knowledge and capabilities, our expert team can help you get ready.

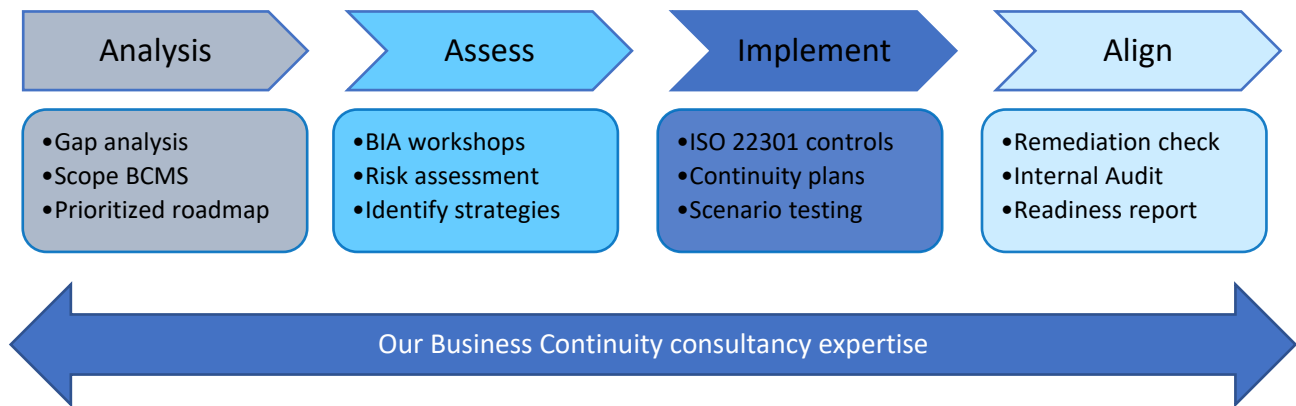

We offer customized packages to guide you through the journey of planning, establishing, implementing, operating, monitoring, reviewing, maintaining, and continually improving your Business Continuity Policies and Procedures.

If you are looking to align or certify with ISO 22301, then we can support you in the development of a Business Continuity Management System (BCMS).

Our services include:

- Business Continuity lifecycle:
 - gap analysis
 - assessment
 - implementation
 - alignment
- Risk assessment and business impact analysis
- Business Continuity planning and strategy development
- Business Continuity as a service
- Business Continuity Manager role
- BIA workshops
- Business Continuity test planning
- Recovery and resiliency plans and solutions
- Scenario walkthroughs, continuity exercises and testing
- Emergency planning, drills, and incident response
- Internal Audits and reviews
- BCMS maintenance and continuous improvement
- Alignment and certification readiness to ISO 2230
