

# Certificate in Information Security Management Principle (CISMP) training course

The Certificate in Information Security Management Principles (CISMP) course, developed by the British Computer Society (BCS), is designed to provide the foundation of knowledge necessary for individuals who have information security responsibilities as part of their day-to-day role, or who are thinking of moving into an information security function.

The CISMP course and associated qualification provides the opportunity for those already serving as information security professionals to enhance or refresh their knowledge and, in

the process, gain a recognized industry qualification, regulated by the BCS, the Chartered Institute of IT. This is useful to both the individual and employer in terms of attesting to the level of professional ability an individual has attained.

**Duration: 5 days** (exam delivered on final day of course)

## Course outline

Over the five days you will work through the following domains areas:

- **Module 1:** Information security management principles
- **Module 2:** Information risk
- **Module 3:** Information security framework
- **Module 4:** Procedural/people security controls
- **Module 5:** Technical security controls
- **Module 6:** Software development and lifecycle
- **Module 7:** Physical and environment control
- **Module 8:** Disaster recovery and business continuity management
- **Module 9:** Other technical aspects
- **Module 10:** Preparation for the CISMP exam

Upon successful completion of this course, you'll receive a BSI certificate.

**Exam delivered on the last day of the course (cost included).**

# Certificate in Information Security Management Principle

## (CISMP) training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.

### Make sure this is the right course for you.

#### This is the course for you if:

- You have information security responsibilities as part of their day-to-day role
- You're looking to gain an internationally recognized certified qualification, regulated by the British Computer Society (BCS), the Chartered Institute of IT

#### What is the course like?

- Five days
- Led by a leading European Security Trainer
- You'll receive comprehensive course materials

#### How will I benefit?

- Get the skills to develop your career in the area of information security
- You'll be prepared for the BCS CISMP exam
- Network with like-minded peers
- Develop professionally

### Why invest in this course?

- You will learn from our award winning trainer
- Our small classes make it a more personalized learning experience
- We have interactive sessions that give you plenty of opportunities to ask questions and learn from your peers

#### Training delivered at your site

This could be a convenient and cost effective option, especially if you have multiple delegates.
