

Certified Cloud Security Knowledge (CCSK) training course

Essential information about the course

Get the skills to manage information security in the cloud with our Certificate of Cloud Security Knowledge (CCSK Plus) training course.

Launched in 2010 by the leading cloud security research organizations, Cloud Security Alliance (CSA) and European Network and Information Security Agency (ENISA), CCSK Plus provides the industry with its first professional certification for cloud security.

Our training course helps you achieve certified status to demonstrate that you're a competent cloud security professional.

By attending our three-day course you'll get the skills to identify security threats and best practices for securing the cloud. You will also learn how to assess, build, and secure a cloud infrastructure through a series of hands-on/practical exercises.

Duration: 3 days

Course outline

The course is split into six domains that will be covered across three days:

- Module 1. Cloud Architecture
- Module 2. Infrastructure Security for Cloud
- Module 3. Managing Cloud Security and Risk
- Module 4. Data Security for Cloud Computing
- Module 5. Application Security and Identity Management for Cloud Computing
- Module 6. Cloud Security Operations

Upon successful completion of your course, you'll receive a BSI certificate.

To get Certified Cloud Security Professional (CCSP) status you'll need to successfully complete the ISC² CCSP exam, which is not included in the course fee. Please book this directly on the ISC website.

Certified Cloud Security Knowledge (CCSK) training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.

Make sure this is the right course for you.

This is the course for you if:

- You're an information security professional with at least one years' experience in cloud security
- You're looking to gain an internationally recognized qualification

What is the course like?

- Three days
- You'll receive comprehensive course materials
- Led by a globally recognized tutor
- Interactive and engaging

How will I benefit?

- Be prepared for the CCSK exam
- Shows your legal commitment to code of ethics
- You'll have knowledge of critical cloud computing topics including managing cloud security/risk and implementing cloud computing infrastructure security

Tutor profile - Remy Naravulu

CISM, CISA, CISSP, PMP, CSM, ISSMP, ITIL, ESCA, Security+

With over 25 years of international experience in the areas of IT application delivery, IT infrastructure, IT security management, project management and operations management, Remy has an extremely strong ability in developing and implementing strategic and tactical efficiency initiatives in all areas of IT management.

Remy is a renowned trainer in the areas of project management, risk management, ITIL, Cisco and IT/cybersecurity.

Training delivered at your site

This could be a convenient and cost effective option, especially if you have multiple delegates.
