

Certified Information Security Manager (CISM) training course

Essential information about the course

Level **1 C 2 C 3 C 4**

The demand for skilled information security management professionals is on the rise. Certified Information Security Manager is a globally recognized standard established in 2002, which is one of the most highly sought after IT certifications. It can give you the knowledge and skills to provide effective security management and consulting services, as well as open doors for career progression.

Our intensive four-day training is based on the ISACA framework, which has five domain areas that relate to the

role of a CISM. You will learn about each of these domains in detail, giving you the knowledge and skills to develop and manage a resilient information security program. This will give your management team the reassurance they need to feel confident in your organization's information security.

This course will prepare you with the knowledge and skills to complete the ISACA CISM exam, which will give you Certified Information Security Manager status.

Course outline

Over the four days you will work through the following CISM domains areas:

- **Domain 1: Information security governance**
Learn how to establish and maintain a framework that aligns information security strategies with business objectives and applicable laws and regulations
- **Domain 2: Risk management**
Identify and manage information security risks to achieve business objectives
- **Domain 3: Information security program management**
Get the skills to design, develop and manage an information security program that implements the information security governance framework
- **Domain 4: Information security management**
Understand how you oversee and direct information security activities to execute the information security program
- **Domain 5: Response management**
Learn to develop and manage your capability to respond and recover from disruptive and destructive information security events

Upon successful completion of this course, you'll receive a BSI certificate.

To get your CISM certification, you will then need to book your CISM exam via the ISACA website. Please note this must be booked 2 months prior to when you wish to complete the exam.

Certified Information Security Manager (CISM) training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.
