

Cybersecurity and Information Resilience

Training

With our range of training courses we can help you get the knowledge and skills you need to build resilience around your information security management.

Applicable to certain courses

Privacy and data protection courses

Data Protection and Privacy Foundations

A one day foundation, non-technical course for both technical and general management interested in learning about GDPR and compliance around the regulation.

Certified Information Privacy Professional Europe (CIPP|E)

The course examines industry best practices in privacy compliance concepts of data protection and trans-border data flows. The CIPP/E covers critical topics like the EU-U.S. Privacy Shield and the GDPR.

Certified Information Privacy Technologist (CIPT)

This is a two day course that will give you the knowledge to build your organization's data protection structures from the ground up. This course focuses on critical data protection concepts to ensure you become a leading professional in information security.

Certified Information Privacy Manager (CIPM)

The CIPM equips you with the ability to develop, implement, and measure a privacy program framework while utilizing the privacy operational lifecycle: access, protect, sustain, and respond.

Cloud security courses

Certificate of Cloud Security Knowledge (CCSK)

Gain the skills to identify security threats and best practices for securing the cloud. You'll learn how to assess, build, and secure a cloud infrastructure through a series of hands-on practical exercises.

Certified Cloud Security Professional (CCSP)

If you're building a career in cloud security, then the CCSP is the must-have qualification to help you progress. This training course will provide you with the knowledge and skills required for the CCSP exam.

Information security courses

Security Foundations Training

This one day theory based course has been designed by security consultants, which aims to provide candidates with an understanding of the principles of security, risk management and the role of cybersecurity professionals within an organization.

NIS Directive Fundamentals

This one-day theory-based course has been designed by BSI's industry leading cybersecurity consultants with the ultimate goal of providing candidates with an understanding of the NIS Directive.

Certified Information Systems Security Professional (CISSP)

If you're building a career in information security then CISSP is the must-have qualification to help you progress. This course will prepare you with the knowledge and skills to complete the CISSP exam.

EC-Council's Certified Ethical Hacker (CEH)

On this five day course you will learn ethical hacking and network security skills along with a new and exclusive crash course in GDPR Fundamentals module.

Certified in Information Security Management Principal (CISMP)

This five day course and associated qualification provides the foundation of knowledge necessary for individuals who have information security responsibilities as part of their day-to-day role, or who are thinking of moving into an information security function.

Certified Information Security Manager (CISM)

This four day training is based on the ISACA framework, which has five domain areas that relate to the role of a CISM. You will gain the knowledge to develop and manage a resilient information security program.

Auditing courses

Certified Information Systems Auditor (CISA)

During this four day course you'll learn about the five domain areas that relate to the role of a CISA based on the ISACA framework.

Data Protection and Privacy Implementer/Self-Assessor

This two day training is aimed at stakeholders within organizations who are accountable for ensuring compliance with the GDPR. This course will position attendees to start a self-assessment exercise of their own organization.

Bespoke training – structured training, delivered in-house

You can select any course from our extensive range and have it delivered to your team on-site, or even request a bespoke course.

Our expert tutors will take the time to understand your company's learning needs so that we can provide a training solution that satisfies your business objectives.
