

Certified Cloud Security Professional (CCSP®)

training course

Essential information about the course

If you're building a career in cloud security, the CCSP certification is a necessity. As a globally recognized standard of achievement, it demonstrates your competence as an information security professional with cloud security expertise. The certification covers critical topics in cloud security today, including cloud computing, mobile security, application development security and risk management.

Level **1 C 2 C 3 C 4**

With over a 90% exam success rate, our tutors ensure you complete the course feeling prepared for the exam and confident that you can apply your new knowledge.

Packed with practical activities, group discussion and classroom learning, you'll cover the six domains from the ISC Common Body of Knowledge and leave the course with the knowledge and experience that'll benefit both you and your organization.

Course outline

The course is split into six domains that will be covered across five days:

- Domain 1: Architectural concepts and design requirements
- Domain 2: Cloud data security
- Domain 3: Cloud platform and infrastructure security
- Domain 4: Cloud application security
- Domain 5: Operations
- Domain 6: Legal and compliance

Upon successful completion of your course, you'll receive a BSI certificate.

To get Certified Cloud Security Professional (CCSP) status you'll need to successfully complete the ISC² CCSP exam, which is not included in the course fee. Please book this directly on the ISC website.

Certified Cloud Security Professional (CCSP®) training course

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.

Make sure this is the right course for you.

This is the course for you if:

- You're an information security professional with at least one years' experience in cloud security
