

Give your electric cable a valued stamp of approval

with the **BSI Kitemark™** Scheme

Within both manufacturing and construction environments cables are used for a wide variety of applications including such critical functions as fire detection, alarms, emergency lighting and evacuation systems. No matter what the application though, rigorous testing is crucial to maintain confidence in cable safety, performance and quality.

Kitemark Certification for manufacturers of electrical cables

If you are a manufacturer of electrical cables, through our trusted partner laboratories we ensure your products comply with the necessary standards for safety, performance and fire safety.

We assess and award the BSI Kitemark to various types of electric cables - the most commonly used standards being:

- EN 50525 series for low voltage (450/750 V) cables
- BS 6004 non-armoured (450/750 V) cables for power, lighting and internal wiring
- BS 7211 electric cables having low emission of smoke and corrosive gases when affected by fire
- BS 6231 Single core PVC insulated flexible cables of rated voltage 600/1000 V for switchgear and control gear wiring

With this third party endorsement, in conjunction with BSI's contuing assessment of manufacturing facilities and quality systems you'll be able to enhance your reputation, stand out from competitors, attract new customers and gain access to new markets.

Cable Batch Verification Kitemark

An alternative to traditional Kitemark Certification for Importers, Distributors and Re-branding Resellers BSI can offer batch verification under our Cable Batch Verification process.

This involves our client successfully demonstrating that they have adequate processes in place to maintain control over the on-going process of selection, testing, labelling and distributing cables in a traceable manner. This would include:

- Evaluation of Material Control Plan
- Initial Assessment
- Surveillance visits
- Batch testing against the relevant product specific standard (as augmented by this Kitemark scheme).
- Audit of the control and distribution of Kitemarked batches of product.

Why the BSI Kitemark makes sense

The Kitemark helps you to differentiate your products and make them easily identifiable as being safe, reliable and having been evaluated by a trusted independent third party. Other benefits include:

Compliance: independent demonstration of compliance with relevant national and international safety standards.

Customer Confidence: Happy, confident customers will bring unrivalled benefits to your business. Purchasing professionals, whether private or public sector, want to know that they are spending their money wisely.

Powerful marketing tool: Enhancing your reputation and company profile can be a costly exercise. But by being a Kitemark licensee and using the Kitemark symbol in your promotional activities you can gain all the benefits of this prestigious symbol.

Competitive Advantage: In tough business environments, companies need to be able to make their products and services stand out from the competition. As 75% of UK adults state that the presence of the Kitemark helps them to choose between products – you'll have this advantage.

Gain access to global markets

The BSI Kitemark is not just recognized and demanded in the UK; it has high levels of global recognition.
