

Entrance Doorset Dual Certification – (Fire Characteristics and Enhanced Security)

BSI provides Kitemark scheme in response to Government guidance

Following the outcomes of the Dame Judith Hackitt's Independent Review of the Building Regulations and Fire Safety Emerge, BSI is now able to certify doorsets which require both fire and enhanced security characteristics.

Government advice published in May 2018 for building owners regarding assurance of flat entrance doorsets and again in August 2018 on how composite front doors should be tested and classified, was followed by Secured by Design (SBD) implementing a requirement to their specification, that would ensure entrance doorsets that require both fire and enhanced security shall be tested to the same specification and certified by a single body.

BSI Kitemark certification for enhanced security to PAS 24 has been leading the way as the ultimate mark of trust in this field for over 25 years and we recognize the importance of supporting manufacturers to build trust in their products. This additional Kitemark for Entrance Doorset Dual Certification (Fire Characteristics and Enhanced Security) will help clients demonstrate their ongoing commitment to building a safer world.

What are the benefits of Dual Certification Kitemark?

Compliance

In accordance with SBD specification and guidance for flat entrance doorsets, BSI dual certification enables a manufacturer to demonstrate compliance with Ministry of Housing, Communities and Local Government Advice Note 16 (point 17) which requires products to be certified to a single specification for enhanced security and fire resistance.

Additional assurance can be provided for The Construction Products Regulation ensuring fire doorsets can be CE and/or UKCA marked.

Confidence

Provide reassurance to your stakeholders, including regulators, specifiers and building owners that your products meet local authority frameworks and PQQ's through standards and best practice – enabling access to more contracts.

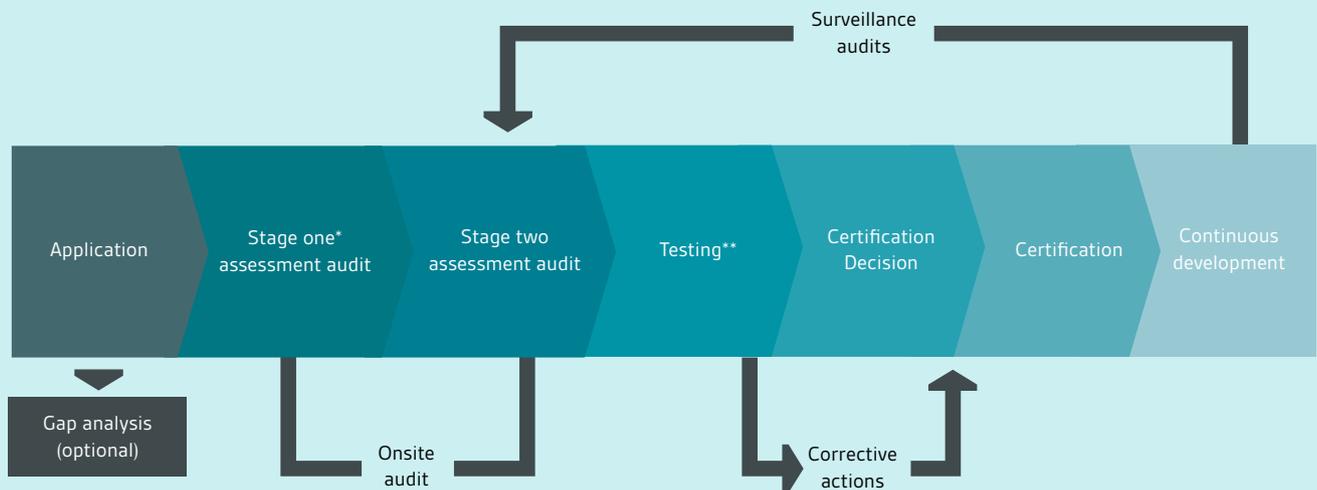

Resilience

In times of uncertainty and market disruption, third party assessment and on-going surveillance confirms your organization is adopting best practice and adapting to widespread change quickly.

Kitemark certification journey

Whether you're looking to differentiate your product in the market or gain third party recognition of compliance – BSI are here to help. The Entrance Doorset Dual Certification Kitemark shows that your products have been rigorously tested by our expert team and provides instant confidence to your stakeholders.

*Only required if you are not already certified to ISO 9001

**Only relevant where testing arranged by BSI forms part of the contract

How can BSI help:

Being able to demonstrate 'what good looks like' with regard to fire and safety critical construction products has never been so important. With BSI's new Dual Certification Kitemark, you can inspire the highest level of trust with building owners that your doorsets are not only safe but equally robust

Kevin Frewin, Global Head of Construction – BSI

Interested?

BSI is happy to help you with any enquiries you may have regarding this Kitemark Scheme. For all Construction Products Regulation (CPR) questions, simply get in touch and a member of our team will be happy to assist you.

Why BSI?

For over a century BSI has championed what good looks like and driven best practice in organizations around the world.

As the founder of the Kitemark, we've been at the forefront of fenestration testing and verification. That's why we're best placed to help you gain compliance. From construction products to asset lifecycle management, we're leading the way in the built environment sector, innovating and collaborating with our clients to build a safer more resilient tomorrow – one that protects our buildings, assets, the environment and most importantly our people.
