We spend **250,000** hours a year improving the performance of UK businesses

ISO 50001

This experience allows us to see first-hand how managing your energy consumption with an **ISO 50001** management system helps you improve performance by using less energy.

Energy issue	How ISO 50001 helps	Benefit
Rising energy costs are a challenge for any organization	• It helps to identify what energy is being used and where • It highlights if energy is being wasted • It implements effective operational controls to manage your energy usage	• Money is saved through better energy management • Less waste and more efficiency • Improved procurement procedures • Reduced impact of rising costs
Organizations need to stay up to date with legislation and remain compliant, as breaches can lead to fines and prosecution	• It makes you take account of legal requirements when setting up, implementing and maintaining your ISO 50001 system • It makes you comply with applicable legal requirements • It makes you communicate relevant information on legal and other requirements to employees and interested parties	• Improved levels of compliance to energy legislation • Reduced likelihood of fines and prosecutions, and lower insurance premiums • Allows adequate time to address issues ahead of legislation changes
Poor environmental credentials can damage an organizations reputation with both customers and investors	• It reassures stakeholders that best practice systems are in place • It makes sure you monitor and continually improve your energy management processes • It helps you to reduce greenhouse gas emissions	• Improved reputation and stakeholder satisfaction • Increased access to new customers, business partners and tender opportunities • A competitive advantage to grow your business • Lower carbon emissions to help reduce climate change
Threat of energy shortages	• It gives you a better understanding of energy use • It improves the efficient use of natural materials	• Improved energy efficiency now and in the future • Reduced reliance on fossil fuels • Increased use of sustainable energy sources • Helps to meet any self-imposed targets your organization has set
