Assessment Methodology, Programme, Site Visits

This on-site assessment was conducted from 27-30/8/2019. The audit programme is included as Appendix A. The approach to the audit was to treat the 583 independent smallholders groups as a MSPO Certification Unit. A range of environmental and social factors were covered. This includes consideration of topography, palm age, proximity to areas with HBVs, declared conservation areas and local communities.

The methodology for collection of objective evidence included physical site inspections, observation of tasks and processes, interviews of staff, workers and their families and external stakeholders, review of documentation and monitoring data. MS 2530-2:2013 were used to guide the collection of information to assess compliance. The comments made by external stakeholders were also taken into account in the assessment.

The estates or smallholders sample were determined based on formula $S = r\sqrt{n}$ where n is the number of estates while when applicable, the smallholders sample were determined following the MSPO Certification Requirement. The sampling of smallholders were based on the formula $(r\sqrt{n})$; where r is the risk factor (may defers 1, 1.5 and 2 depending on risk), where n is total number of group members. The sampled smallholder listed in Appendix C.

Meetings were held with stakeholders to seek their views on the performance of the company with respect to the MSPO requirements and aspects where they considered that improvements could be made. At the start of each meeting, the interviewer explained the purpose of the audit followed by an evaluation of the relationship between the stakeholder and the company before discussions proceeded. The interviewer recorded comments made by stakeholders and these have been incorporated into the assessment findings.

Structured worker interviews with male and female workers and staff were held in private at the workplace in the mill and the estates. Fieldworkers were interviewed informally in small groups in the field. In addition, the wives of workers and staff were interviewed in informal group meetings at their housing. Separate visits were made to each of the local communities to meet with the village head and residents. Company officials were not present at any of the internal or external stakeholder interviews. A list of Stakeholders contacted is included as Appendix B.

This report is structured to provide a summary of assessment finding as attached in the Section 3. The assessment was based on random samples and therefore nonconformities may exist that have not been identified.

This report was externally reviewed by MSPO approved Peer Reviewer prior to certification decision by BSI.

The following table would be used to identify the locations to be audited each year in the 5 year cycle

		 to improve the soil nutrients through application of organic fertiliser to continue triple rinsing method in cleaning the empty chemical containers and keep them in proper place to continue best practice based on GAP and TUNAS (tunjuk ajar nasihat sawit) advisory Communication to the smallholders with regards to continual improvements was done through training for examples "Taklimat"	
		MSPO SPOC Saratok, Sarawak" (16/3/2019), "Taklimat Pensijilan MSPO" (23/2/2019 & 24/4/2019). Attendance records were available for verification.	
4.1.2.2	Group management shall establish a system to improve practices in line with new information and techniques; and for disseminating this information throughout the group members. - Major compliance -	The new technologies or information is disseminated through training program, site visit and discussion. The records of the training were updated from time to time. The records of the recommended actions were recorded in the "Laporan lawatan khidmat nasihat" MPOB (as part of internal audit). The visit report has the information about date of visit, name of smallholders and problem & recommendation. Apart from that, Warta Sawit (issued quarterly, published by MPOB) is also distributed to the members.	Complied

Criterio	on / Indicator	Assessment Findings	Compliance	
4.2 Prin	4.2 Principle 2: Transparency			
Criterio	Criterion 4.2.1 - Traceability			
4.2.1.1	The group management shall commit itself to implement and maintain the requirements for traceability. - Major compliance -	The group members record their FFB delivery in "Buku Rekod Ladang", which has the information about harvesting date, quantity (mt) and price per mt. The Group Manager will cross check all of the data against FFB receipt issued by the collection center or palm oil mill.	Complied	
4.2.1.2	To keep records of sales and delivery or transportation of fresh fruit bunches. - Major compliance -	The record of sales and delivery was available in each personal file under "C. Laporan Hasil BTS Pemohon Pekebun" example:- For SPOC Kabong & Roban (Q11) Hamsawi Bin Hamid latest FFB record was on July 2019 (4.30 MT) Shukeran Bin Saili – July 2019 (5.9MT) Norhaida Binti Bakir – July 2019(4.72MT)	Complied	
4.3 Prin	ciple 3: Compliance to legal requirements			
Criterio	Criterion 4.3.1 – Regulatory requirements			
4.3.1.1	Independent smallholders shall show awareness of compliance with all applicable local, state, national and ratified international laws and regulations. - Major compliance -	Interview with the smallholders found that they are aware of the compliance with all applicable laws. Document review found all the sampled smallholders have obtained the MPOB license. Based on samples checked, all the MPOB licenses were found to be valid at the point of visit.	Major Non- conformance	

Criterio	on / Indicator	Assessment Findings	Compliance
		Nonetheless, some smallholders have used paraquat without conforming the circular from the Dept. of Agriculture. Based on interview, some smallholders informed that they have been using paraquat for weeding. The paraquat was purchased from common herbicides premises and not from authorised registrar, manufacturer or <i>Pertubuhan Peladang Kawasan</i> . The receipts of purchase were also not retained. One of the smallholders has also informed that the premise has repacked the paraquat in different herbicide container.	
		Thus, a major non-conformity was raised.
