

INFORMATION SECURITY INCIDENT MANAGEMENT

How to respond to an unforeseen security incident?

What if a security incident catches you unprepared? In such situations, stress leads to mistakes and poor decisions made in the spur of the moment. In this seminar, Kenneth will discuss the questions an incident responder should ask to gain control of the situation quickly and assertively. In this seminar, Kenneth will also walk you through the top ten incident response failures he has observed over the years, in order to help you avoid them.

Key Takeaway:

- What are the best practices of incident response?
- What are the communication parameters that you need to set?
- What are the things to focus on to assess the incident situation?
- How are you going to proceed with the incident response steps?

Keynote Speaker:

Kenneth Ho

Kenneth has over 25 years of security industry experience. He has worked for large global system integrators and telecommunication companies, helping customers to manage information security and address Information Technology risks.

Apart from being a member of CREST and being a certified ISO 27001 Lead Auditor, Kenneth is also certified on the following:

- Certified Information Systems Security Professional, CISSP
- Certified Information Systems Auditor, CISA
- Certified Information Security Manager, CISM
- Certified in Risk and Information Systems Control, CRISC
- Certified Ethical Hacker, CEH
- Computer Hacking Forensic Investigator, CHFI
