

ISO 45001

Migration and Updates

Seminar, 30 August 2019

ISO 45001 helps you build an optimal working environment to protect staff from a health and safety perspective.

An effective occupational health and safety management system will help you to protect and enhance your most important asset, your people, to drive business excellence.

A key benefit of the new standard is that it includes Annex SL which means it follows a high level structure (HLS) which aligns your OH&S management system

with other ISO management systems your organization has in place. This could help streamline processes and deliver efficiencies saving time and money.

Gain an insight of the ISO 45001 and learn about the major changes, emerging requirements and how organizations can migrate to the latest version and how these changes could be implemented.

Programme Agenda:

- 0900 - 0930 Registration
0930 - 0945 Welcoming Speech by BSI Singapore
0945 - 1230 Sharing session by Keynote Speaker
