

Environmental Management System ISO 14001

Self-assessment checklist

Where is your organization on the path to environmental management maturity?

Reducing the environmental impact of your organization's operations not only contributes to a healthier planet but also inspires stakeholder trust.

Organizations that recognize the benefits of a sustainable model and seek to mature their environmental management practices are best positioned to thrive in changing environmental conditions.

Introducing ISO 14001 – Environmental Management System

ISO 14001 provides the requirements for an environmental management system based on internationally recognized best practice. It is a valuable tool for managing and improving your organization's environmental performance.

This management system helps identify and mitigate environmental risks, reduce resource consumption, and foster an eco-responsibility culture, accelerating progress towards a greener, more sustainable future.

The benefits of certification

Independent certification demonstrates your organization's commitment to excellence. By gaining third-party assurance that your environmental management system (EMS) meets the requirements of ISO 14001, you can inspire confidence in your ability to reduce environmental impacts and manage risks with an internationally recognized mark of excellence.

Clauses included in this self-assessment

Clause 4 - Context of the Organization

Clause 5 - Leadership

Clause 6 - Planning

Clause 7 - Support

Clause 8 - Operation

Clause 9 - Performance Evaluation

Clause 10 - Improvement

How the self-assessment works

By filling in the checklist on the next few pages you can gauge what stage of maturity your EMS is currently at, and what actions you can take next. No matter where you are in your environmental management journey, our range of solutions can help you move forward.

Please fill in the checklists below, each 'yes' counts as one point towards your final score and subsequent maturity range.

Snapshot of our EMS maturity scores

Early stage

0-12 Points:

Begin with our EMS training courses to solidify your foundational knowledge and practical skills in managing environmental impact.

Learn more >

Moderate stage

13-19 Points:

Consider a Gap Assessment to align your current practices with future goals, enhancing performance through standards. To achieve maturity, training courses should be a key consideration.

Learn more >

Mature stage

20-27 Points:

Pursue ISO 14001 certification to distinguish your EMS, confirming and demonstrating your industry leading, environmental management practices. Training courses for the continued development of staff will also help you achieve full-scale maturity.

If you scored 13-19 points...

Elevate your EMS with a BSI Gap Assessment

Based on your organization's maturity score, you may benefit from a Gap Assessment from our expert auditors ahead of pursuing certification.

A Gap Assessment with BSI provides you with a method of assessing your current situation against future goals, pinpointing areas where your existing program does not meet the requirements of ISO 14001. Our auditors are uniquely positioned to help you, thanks to their significant experience and expertise in environmental management across many industry sectors. Following your assessment, you'll have information to act upon taking your EMS maturity to the next level, progressing your organization towards achieving ISO 14001 certification.

Visit our website to find out more >

Getting the right skills and knowledge embedded in your organization will enhance your EMS. Explore our courses and qualifications [here](#).

If you scored 20-27 points...

Elevate your EMS with ISO 14001 Certification

Based on your organization's preparedness score, you may be ready to achieve ISO 14001 certification.

Once you successfully complete the certification audit, BSI awards you with an accredited and internationally recognized certificate. This acknowledges your organization's commitment to operational efficiency, environmental risk management, regulatory compliance and continual improvement inspiring confidence and trust in your organization from employees and external parties.

Certification with BSI comes with the confidence of partnering with an independent, trusted, global organization. Our expert and qualified auditors have a deep knowledge of environmental management across industries, so they understand your needs and challenges.
