“The ultimate manifestation of making excellence a habit is Organizational Resilience.”  
BSI Chief Executive, Howard Kerr
BSI introduced the world’s first guidance document on Organizational Resilience in 2014 – it was developed by industry, for industry and the benefit of society and backed by government.

**Organizational Resilience is**

“the ability of an organization to anticipate, prepare for, respond and adapt to incremental change and sudden disruptions in order to survive and prosper.”

BS 65000 Organizational Resilience
Outcomes for our clients

We enable our clients to be more:

- **Trusted**: as this delivers reassurance to their customers
- **Responsible**: because the well-being of people, customers and society matters
- **Robust**: enabling them to spring back from interruptions and spring forward when opportunity arises
- **Innovative**: by creating the conditions to develop improved practices, products and ideas
- **Agile**: because the ability to adapt, with speed of decision making, is vital in today's everchanging environment
- **Secure**: because risks are assessed, managed and mitigated

Resilient

The combined strength of these outcomes ensures that an organization is resilient, anticipating and adapting to change and disruption in order to survive and prosper for today and tomorrow.
BSI Organizational Resilience – 16 elements

BSI is renowned for knowledge and expertise. We merged four highly relevant areas of best practice on the topic of organizational resilience:

1. **Organizational Resilience** (BS 65000)
2. **Organizational Governance** (BS 13500)
3. **Risk Management** (ISO 31000)
4. **Supply Chain pre-qualification** (PAS 7000)

And other topics were also considered including business continuity, information security, environmental management, health and safety and quality management. This creates 16 elements that any organization must consider in order to be resilient.

<table>
<thead>

Our Organizational Resilience Model

Three essential elements:
Product, Process, People

Three core domains:
Operational Resilience, Supply Chain Resilience, Information Resilience

Three key benefits:
Adaptive, Agile, Robust

Role of leadership
The role of leadership is central to ensuring:
- Product Excellence
- Process Reliability
- People Behaviours

These three factors combine to provide the customer with the best overall experience.
BS 65000 is a guidance document and outlines the key attributes of resilient organizations, articulates the benefits of, and explains how to build, resilience. It identifies the different stages of maturity that an organization transitions through to build and implement effective organizational activities to be resilient.

BS 65000 recognizes and outlines the role of top management in establishing and maintaining the culture, governance and direction of the business over time as a strategic activity.

Many organizations were involved in the development of BS 65000 including UK government departments, businesses, academic entities and industry associations such as business continuity and risk management.
Organizations involved in the development of BS 65000

• Association of British Certification Bodies
• Berkshire Regional Continuity Forum
• Business Continuity Institute
• Chartered Institute for Public Relations
• Civil Contingencies Secretariat
• Continuity Forum
• Cranfield University
• Emergency Planning Society
• Emergency Planning College
• Institute of Civil Protection and Emergency Management
• Institute of Risk Management
• Institute for Security & Resilience Studies
• International Professional Security Association
• International Independent Organization for Certification
• Local Authorities Resilience Group Scotland
• London First
• Metropolitan Police
• Perimeter Security Suppliers Association
• Portsmouth Business School
• RMIC
• Security Industries BCM Group
• Shetland Island Council
• Society of Industrial Emergency Services
• University of Leeds
• UK Payments Administration Limited
What does the market think?

The Economist Intelligence Unit (EIU) is a world class research organization that surveyed over 400 business executives worldwide on the topic of Organizational Resilience on behalf of BSI.

The findings showed:

1. **88%** of respondents believe resilience is a priority for their organizations.

2. **80%** believe it is a pre-requisite for long-term growth.

3. **61%** see it as a source of competitive advantage.

However only **29%** of executives see organizational resilience practices embedded in their organizations, meaning **71%** of organizations need help.

Resilience is not what happens to an organization; it’s what the organization does with what happens to it.
BSI Cranfield Research

BSI commissioned Cranfield University and the world renowned Professor Denyer, to assess 50 years of management thinking, on how organizations can become more resilient.

Key findings:
Five stages of evolutionary thinking were identified that impact an organization's strategic approach to developing and maintaining organizational resilience.

94% of people who downloaded the report are non-BSI clients and the top 3 job titles are CEO, Managing Director and Director.
The Strategic Tension Quadrant

BSI and Cranfield University together produced an innovative tool – the Strategic Tension Quadrant which is an excellent framework for change.

The vertical axis is focused on a continuum from stopping bad things happening (i.e. defensive actions), through to achieving results (i.e. progressive actions). The horizontal axis is focused on consistency (i.e. following rules and processes) and establishing goals through to a more flexible approach which looks for the generation of new ideas and innovations.

Paradoxical thinking recognizes that there are inherent tensions in the quadrants and that strategies may be approached from a ‘both/and’ perspective rather than an ‘either/or’ perspective.
The Strategic Tension Quadrant

- **PERFORMANCE OPTIMIZATION**
  Improving and exploiting

- **PROGRESSIVE**
  (Achieving results)

- **ADAPTIVE INNOVATION**
  Imagining and creating

- **CONSISTENCY**
  (Goals, processes, routines)

- **FLEXIBILITY**
  (Ideas, views, actions)

- **PREVENTIVE CONTROL**
  Monitoring and complying

- **DEFENSIVE**
  (Protecting results)

- **MINDFUL ACTION**
  Noticing and responding

**ABILITY TO ANTICIPATE, PREPARE FOR, AND RESPOND AND ADAPT TO INCREMENTAL CHANGE AND SUDDEN DISRUPTIONS**

Integration, balance and fit (for purpose) are essential
BSI Organizational Resilience Index

We canvassed the perception of over 1250 organizations and senior decision makers across the globe in multiple sectors revealing insights by geography, sector, size and longevity.

We asked them two key questions related to the 16 elements of BSI Organizational Resilience.

1. **How important is each element to the long term success of your organization?**

2. **How well do you perform in each element?**

**Top 5 by Importance**

1. Reputational Risk
2. Financial Aspects
3. Leadership
4. Vision and Purpose
5. Information and Knowledge

**Top 5 by perceived performance**

1. Financial Aspects
2. Alignment
3. Leadership
4. Vision and Purpose
5. Governance and Accountability

Full details of the results can be found in the full report:

bsigroup.com/Organizational-Resilience
BSI Organizational Resilience Benchmark

Clients can benchmark their organization against the 1260 organizations in the Organizational Resilience Index, illustrating relative strengths and vulnerabilities.

If a client would like their executive team to explore how the organization compares to others in the Index then a more comprehensive version of the Benchmark Tool is available as part of a Senior Level Organizational Resilience Workshop.

The Index results can be compared by geography, size, sector and longevity.
BSI and Organizational Resilience

Organizational Resilience is

“the ability of an organization to anticipate, prepare for, respond and adapt to incremental change and sudden disruptions in order to survive and prosper.”

BS 65000 Organizational Resilience

Organizational Resilience reaches beyond risk management towards a more holistic view of business health and success. A resilient organization is one that not merely survives over the long term, but also flourishes – passing the test of time.
