

New International Occupational Health & Safety Management System

Why it's better for your organization

ISO 45001:2018

ISO 45001, Occupational Health & Safety (OH&S) management system is the world's first ISO standard focused on the health & safety of the worker. Its emphasis on risk prevention, innovation and continual empowerment benefit both organizations and the wellbeing of their workers. As well as increasing employee engagement and publicly demonstrating commitment to sustainable work by providing safe and healthy workplaces, this standard focuses on key business challenges such as the supply chain and continuity planning. This allows organizations to anticipate, adapt and respond, providing both resilience and agility in the global marketplace.

ISO 45001 Occupational Health & Safety Management Systems

Commitment to management standards is proven to deliver real business benefits. BSI Clients who have adopted an OH&S management system tell us they benefit in the following ways*:

- **79%** Helped comply with regulations
- **64%** Helped manage business risk
- **57%** Inspired trust in our business
- **55%** Helped protect our business

An integrated and upgraded approach

ISO 45001 is based on the ISO high level structure (HLS) that brings a common framework to all management systems. Aligning different management system standards brings greater efficiency and effectiveness. For those organizations already following an OH&S management system such as OHSAS 18001**, ISO 45001 brings the opportunity to upgrade to a globally recognized standard.

Leadership and empowerment

ISO 45001 allows leaders of an organization to show their commitment to safe and healthy workplaces in a way which hasn't been seen before, and allows organizations that truly put their people first to demonstrate this by integrating broader wellness/wellbeing agendas into their management system. At the same time, ISO 45001 recognizes the value created by an actively engaged and empowered workforce.

Bringing health and safety and continuous improvement into the heart of your business

ISO 45001 is an opportunity for organizations to align their strategic direction with their OH&S management system and increase focus on improving worker health and safety. Being recognized globally, the standard will ensure that your customers understand the importance you place on OH&S and your workers' wellbeing across business.
