...making excellence a habit.™

Save money through better energy management with ISO 50001

Ever rising energy costs mean that you simply can't afford to ignore seeking better ways to manage this vital part of your organization's activities. It makes sound financial sense and ever increasing environmental sense.

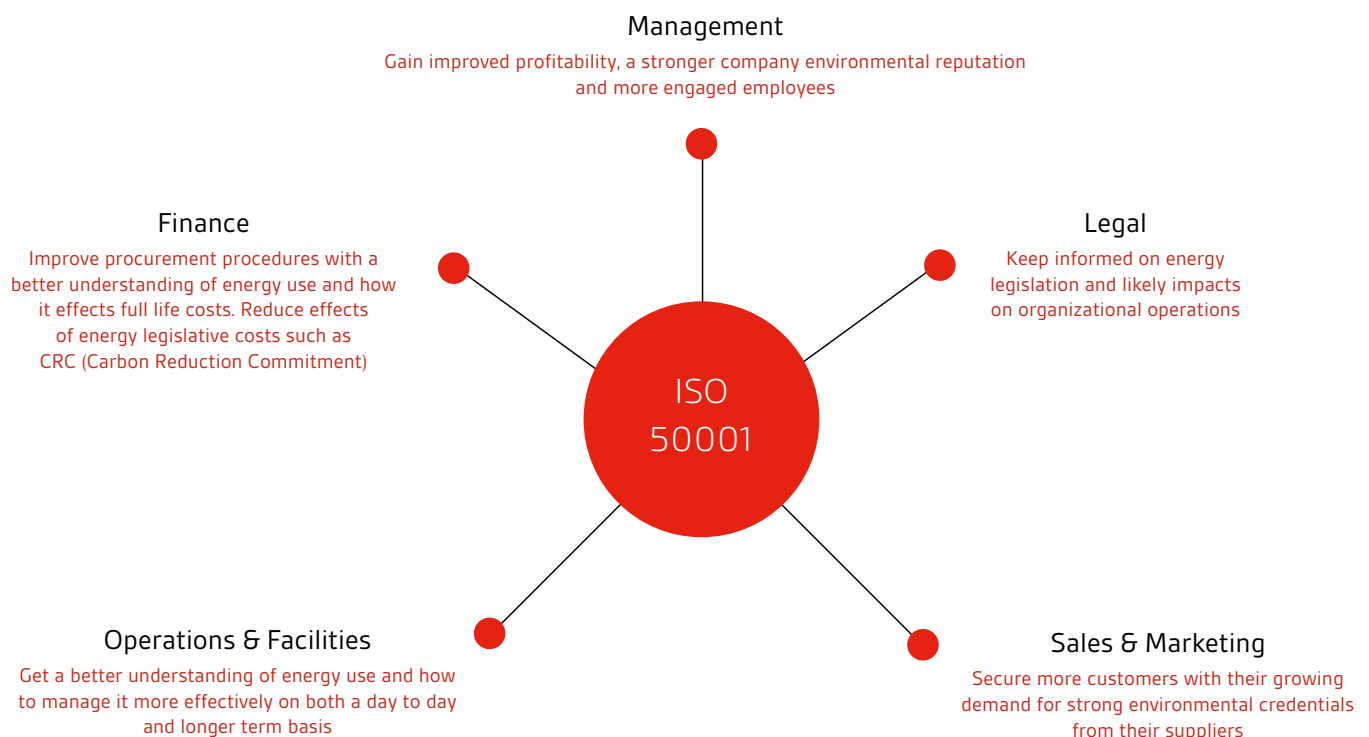

BSI can help you with this, through a structured approach to measuring and monitoring how much energy you use. By adopting the best-practice management framework set out in ISO 50001, you can manage your energy consumption, realise cost savings and reduce greenhouse gas emissions.

BSI has helped many organizations from small companies to large public bodies successfully embed the principles of ISO 50001. This has led to beneficial changes in the way they work together as an organization, how they approach their procurement and design needs, and how they are meeting the environmental and energy challenges we all face.

“Sheffield Hallam University has already achieved many of the big win energy savings needed to improve its processes. The framework of ISO 50001 has provided us with a tool to deliver this which allows us to maximise potential opportunities and implement changes to operations and behaviours.”

Gillian Wright, Energy Carbon Manager, Sheffield Hallam University

The benefits our certified clients have enjoyed speak for themselves:

Energy is a critical component in most organization's operations and one that has major cost implications. Working to reduce these costs can have a big impact on an organization's bottom line. ISO 50001 Energy Management System, an international standard outlining the best management practices for achieving energy efficiency, can help you achieve these savings for your organization.

Whether you're new to energy management systems, building on the ISO 14001 environmental management system or looking to take your expertise further, BSI have the right training courses, resources and services for you. We offer service packages that can be customised to your business to support your energy management ambitions, wherever you are on the journey of effective energy management.

Morgan Lovell, a leading office interior design, fit out and refurbishment specialist achieved a 30% reduction in their electricity usage through ISO 50001.

"Morgan Lovell has always been an environmentally conscious organization. However the ISO 50001 energy management standard provides a credible benchmark against which we can monitor and continually improve our performance going forward."

Sophie Hutchinson, Sustainability Manager,

A simple guide for your ISO 50001 journey with BSI

Power up with ISO 50001 and BSI

Our knowledge can transform
your organization.

For more than a century we have been challenging complacency to help our clients perform better, reduce risk and achieve sustainable growth.

BSI is renowned for its innovative work in this field, constantly introducing new ways to tackle the challenges presented by the ever-changing issues of sustainability.

You can enjoy the benefits of working with BSI teams who have extensive experience helping businesses embed ISO 50001 in an array of different sectors. They can help you understand the challenges and share their knowledge.

We provide end-to-end support, helping you monitor and maintain your excellence through our proprietary software and compliance tools so that you can confidently introduce ISO 50001 into your organization.

We talk with, and listen to clients every day, asking them what they want and how satisfied they are with our products and services. This way we can make sure we are responding to the needs of our clients as they arise.

BSI invests heavily in recruiting and developing the best assessors, who score on average 9.2/10 in our Global Client Satisfaction Survey.

Conserve energy and save money

Our ISO 50001 solutions can put you in a powerful position

As experts in this field we can help you shape an ISO 50001 Project Plan with your existing systems. By following the Plan - Do - Check - Act cycle you will be better able to manage and continually improve your organization's energy effectiveness.

We can help you choose the right way to get started on the journey towards certification or help you embed your systems with our range of cost-effective toolkits which include training, proprietary software and compliance tools. Our toolkits can be tailored to suit your goals, allowing you to select the best combination of products you need to help you achieve your true potential.

Count on BSI to improve your numbers and your performance.

If protecting the environment is of concern to you, ISO 50001 is just one of our products and services you should consider. With a portfolio of proven services and solutions, we can help you improve what you do, every day. We'd be happy to talk you through the products below:
