

Introduction to OH&S Incident Management

Training course

STAGE 

Essential information about the course

The Introduction to OH&S Incident Management training course is designed to help organizations take actions to manage occupational health & safety risks by exploring how to conduct an effective incident investigation.

This one-day course will help you understand the sequence of events leading to an accident, identify causes of an accident and take actions that eliminate or limit occurrence or reoccurrence. It will help you identify potential or existing workplace hazards, understand how to effectively conduct root cause analysis using effective investigative tools and implement risk management.

With the full support of an expert BSI tutor, you'll be equipped with skills to enable you to improve the occupational health and safety aspects of your organization.
