

Join the **Associate Consultant Programme (ACP)** and connect with organizations in your region

BSI's assurance services are globally available and are delivered by experts. Whether it's certification to a management system, training delivered by one of our experienced tutors or assuring client's products are safe, we are committed to enable organizations to improve business performance and resilience.

bsi. | Associate Consultant

What is the Associate Consultant Programme (ACP)?

Part of our ongoing commitment to support our clients through the entire certification journey we developed the Associate Consultant Programme (ACP).

As we are one of the leading certification bodies, we are unable to offer direct consultancy to our clients due to rigorous accreditation rules that is where BSI's Associate Consultant Programme (ACP) can help. Our Associate Consultant Programme (ACP) enables you to connect with organisations in your region that needs guidance when implementing a management system.

Whether you work for yourself or are part of a larger consultancy firm, BSI offers free membership if you can demonstrate that you're able to take clients through the complete certification process.
