

BSI: Your testing and certification partner for excellence.

Testing and certification for
Personal Protective Equipment

bsi.

...making excellence a habit.™

Introduction

At BSI we have a full range of testing and certification services to enable you to bring your products to market effectively. We are independent of all product suppliers, installers and manufacturers, so we can guarantee a confidential and impartial service, and provide you with reliable objective guidance.

Use BSI to help you independently demonstrate compliance of your new and innovative products or services. Gain CE marking and BSI Kitemark™ as your passports to new markets and opportunities.

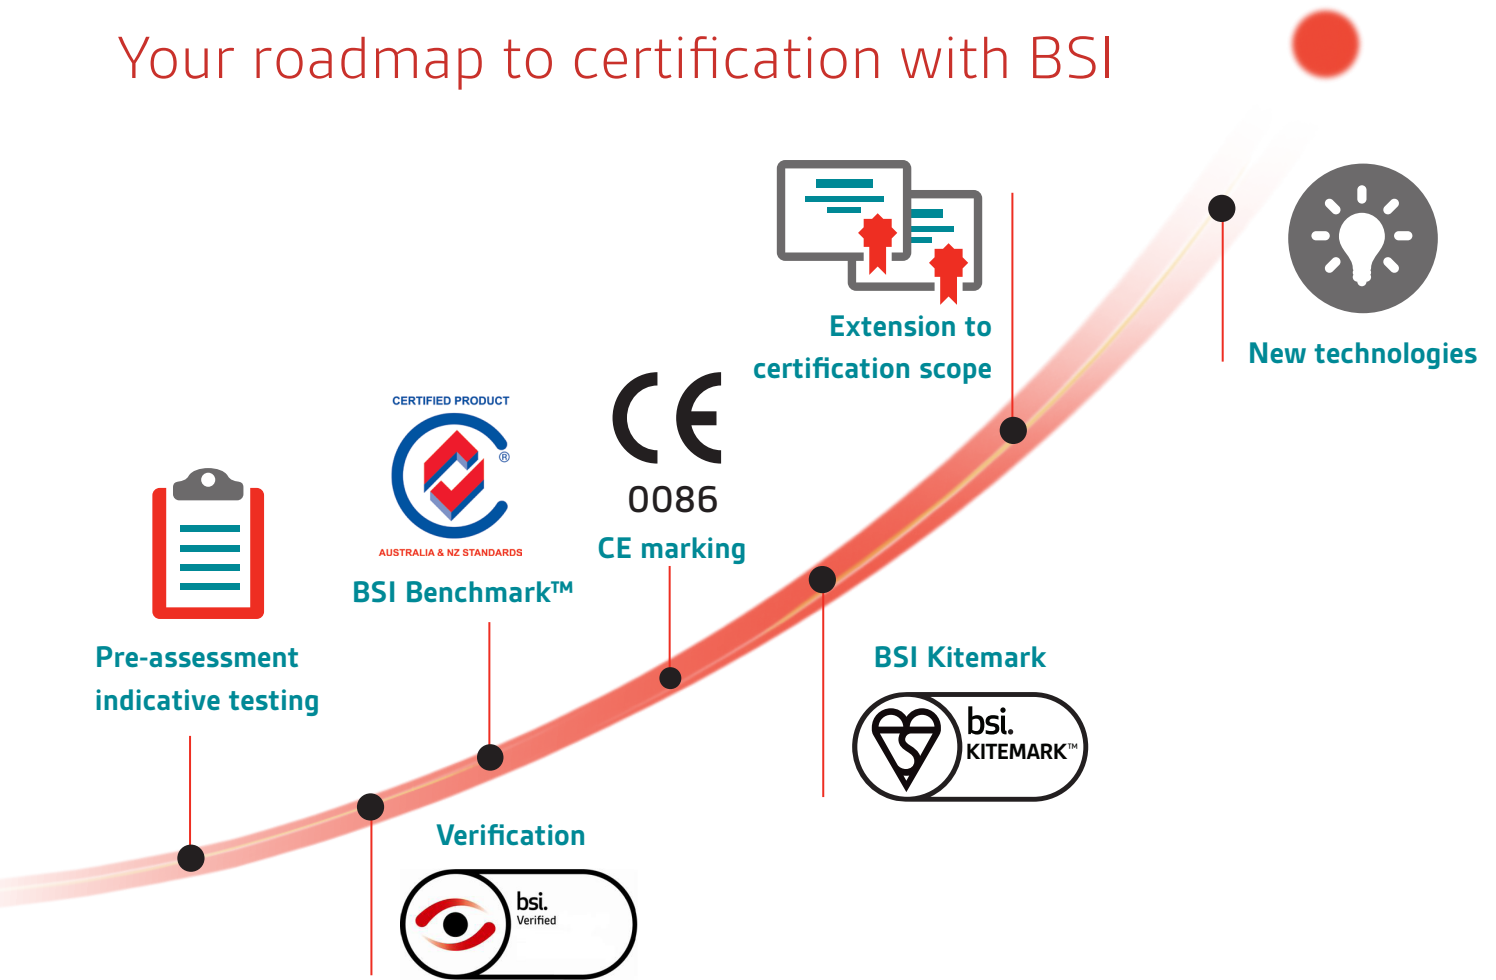

As a **UKAS Accredited Certification Body**, we have the expertise and integrity to independently endorse your product development, your credentials and your brand. Plus with our Notified Body status for specific Directives and Regulations, we're committed to helping you meet and demonstrate compliance to the relevant standards and legislation. We focus on delivering a testing and certification partnership underpinned by quality, safety, reliability and accuracy aligned to your product development requirements.

Where are you on your journey?

We have a full suite of testing services for you to choose from, to help you get your products to market. Plus if you are developing new products, talking to our experts early in the development process can help you realize the full potential and commercial advantage of certification, with significant efficiencies and increased profits to be gained for your business. And with our global reach – with partner laboratories in the UK, Europe, USA and China for example, we can support your business locally.

Your roadmap to certification with BSI

Our services include:

Pre-assessment/indicative testing

We can help support your product development process to test your innovation as a more cost effective solution before you apply for third-party certification. Any non-conformities can be identified at an early

stage, reducing the need for re-testing during a formal compliance test.

Your commercial advantage:

Get your products to market more quickly. Investment at this stage could help you steal a march on your competitors.

Verification

If you have self-declared your products in order to meet specific regulations or directives, you'll have your own test data, technical files and test reports. Or if no standard exists in the marketplace, you may have your own test data or evidence that your product has been assessed to a certain requirement. If you're looking for additional verification of that data, we can help. We can review all your technical information, carry out further tests if appropriate and issue

a Verification Certificate to you. Verification certificates are typically available for three years and don't include ongoing product system compliance and product surveillance.

Your commercial advantage:

Self-declaration supported by BSI Verification can offer your customers increased levels of confidence in your products. We'll give you the independent overview in specific technical areas, and you'll be able to use verification to support procurement specifications and meet the requirements of bids and tenders.

BSI Benchmark™ - enter the AU/NZ international markets

BSI Benchmark is a registered certification mark that is highly recognized and respected as a symbol of quality and safety. A product bearing this mark indicates that BSI has conducted a rigorous audit of its manufacture and production, and symbolizes that the product complies with the appropriate Australian, New Zealand and/or International Standard.

BSI assigns a client care specialist to help you with the pre-audit information exchange and scheduling an

appropriate audit date. Our technical experts assist with testing and developing the audit scope. Qualified auditors complete the initial and annual assessments at your manufacturing plants and provide a prompt report of your status against the accreditation scheme.

Your commercial advantage:

The BSI Benchmark is a powerful marketing tool which works around the world as a global passport to help you gain access to new markets.

CE marking

If you want to trade within the European Economic Area (EEA) and your products fall within the scope of a Directive or Regulation, they must meet the essential characteristics of the Directive or Regulation and you must make a declaration of conformity. CE marking has to be in place from launch. By CE marking you can offer customers a measure of reassurance about the safety of your products. CE marking on a product indicates that the minimum legal requirements for a product have been

met and allows the product to move freely throughout the European Single Market. As a Notified Body (Number 0086) we have the expertise to help you understand what your responsibilities are, and will provide the third-party evidence you need to be able to affix a CE mark to your products.

Your commercial advantage:

If the European market is your destination, the CE mark is your route to sales and opportunities.

BSI Kitemark™

BSI Kitemark has been in existence since 1903. We're proud to own it.

It's unique to BSI and has helped to address safety, quality and security issues for thousands of products.

Rigorous testing to national or international standards, on-going sample testing to avoid any slippage of manufacturing quality or product performance, and annual assessments of factory production controls all combine to give truly robust, independent, voluntary third-party certification with the BSI Kitemark.

If you choose to implement ISO 9001, the international management system for quality to help control your factory production, we can offer you certification against this management system too.

Your commercial advantage:

The BSI Kitemark is a powerful marketing tool which works around the world as a global passport to help you gain access to new markets.

75% of clients say BSI Kitemark helps them attract new customers

65% confirm BSI Kitemark helps to increase sales

Plus you can offer your customers additional peace of mind. Direct future clients to your full range of BSI Kitemark approved products, listed in our online Kitemark directory to give additional reassurance :

bsigroup.com/product-directory

Extending the scope of your certificates

If something has changed which needs to be reflected on your certificate, we can help. From a new location to a new

product or modification, we can help you make sure your products still comply, and your certificate is still valid.

New technologies

Where new or adapted products are ahead of the curve, a relevant standard may not yet be available. We can still help. We can often use other specifications or technical documents, such as trade association specifications or what are known as publicly available specifications (PAS's). As long as they are robust, developed by consensus and publicly available, we can run a valid certification scheme to them. We are also, where

appropriate, able to combine clauses from specific standards in order to be able to offer third-party certification.

Your commercial advantage:

You could be first to market, gaining a significant competitive edge. Combining this with the BSI Kitemark could significantly boost confidence in your products.

Medical Device Directive and PPE crossover

Since the amended Medical Device Directive (MDD) 93/42/EEC came into force in 2010 which allowed MDD products to be dual CE marked both as PPE and MDD we have seen a steady flow of products such as surgical and examination gloves, eye and face protection used in orthopedic procedures, surgical drapes and radiation attenuating products being certified as PPE. This has resulted in us

working closely with the BSI Medical Devices Notified Body team in helping manufacturers gain market access in a joined up approach including joint ISO 13485 and Article 11B assessments. We can also offer Kitemark for a number of MDD products such as surgical masks and examination gloves which are self declared Class I MDD products.

Our facilities

We offer a comprehensive range of testing and certification for over 90 different standards for BSI Kitemark, CE marking and Verification, including on-site witness testing and integrated multi-assessments.

At our Centre of Excellence, and with our UKAS ISO 17025 accredited test laboratory status, we have the facilities to undertake a wide range of testing services. Accreditation by UKAS, the United Kingdom Accreditation Service demonstrates the competence, impartiality and performance capability of our services for clients.

With our industry experts and our state-of-the-art testing capability, we are dedicated to striving for excellence for our clients. Our equipment includes TIL (Total Inward Leakage), gas capacity testing for filters, CO², Impact Drop and Penetration rigs, all designed and maintained for precision testing and accuracy. But we don't just test what's needed now. We also look to the future. For example, with the standards that PPE needs to comply with becoming ever more exacting, our TIL rig already measures at the levels required by the forthcoming ISO standards. This means that we test your products to the most accurate levels possible not only giving you confidence in the testing for your current requirements, but also helping you with your testing requirements of tomorrow.

The BSI Kitemark can help customers easily identify products that they trust to protect them. Most equestrian head protection is certified to the BSI Kitemark, with the Pony Club of Great Britain specifying it. This gives confidence that members are protected and helps riders to easily select a fit-for-purpose product. The BSI Kitemark is a simple and powerful way to differentiate your PPE product from others.

You and your clients are welcome to view the testing of your products, to meet with our technical engineers and experience testing first-hand to share with colleagues and technical teams. Plus if you wish to film the testing of your products for promotional or technical purposes, we are happy for you to choose this option*.

Our PPE testing portfolio

Facial protection

Hearing protection

Hearing protection requires mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425.

We also offer voluntary certification with BSI Kitemark and Verification Certificates for certain products. Below are common examples of products that we test. Similar products can also be tested, please ask us for details.

Examples of hearing protection include:

- Ear plugs
- Ear muffs
- Helmet mounted devices
- Level dependant earplugs

Services available:

- BSI Kitemark
- BSI Benchmark
- CE marking
- Verification

Respiratory Protective Equipment (RPE)

RPE requires mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425.

All RPE falls into category III PPE and therefore requires EC or EU Type Examination. As a Notified Body we have the expertise and recognized status to offer this service.

We can offer voluntary certification with BSI Kitemark, and Verification Certificates for certain products. We can also offer certification for breathing apparatus, escape sets and all other types of RPE.

In 2017 we have increased our capacity in testing RPE, with the opening of our new gas testing lab. This covers filters testing for face masks used in mining, petrochemical, pharmaceutical, industrial and niche or specialist areas for example. Initially offering Type, A, B, E and K gases we will look to be developing this area to increase its scope.

Examples of RPE include:

- Powered respirators
- Disposable face masks
- Filters
- Half masks
- Full face masks
- Gas and combined filters

Services available:

- BSI Kitemark
- BSI Benchmark
- CE marking
- Direct testing
- Verification

Eye protection

Eye protection requires mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425.

The majority of eye protection products such as safety glasses, goggles and face screens fall within category II. As a Notified Body we have the expertise and recognized status to offer this service.

We also offer voluntary certification with BSI Kitemark, and Verification Certificates for certain products. For BSI Kitemark we offer schemes for safety eyewear for products such as safety spectacles, goggles and face screens. We can offer certification for welding shields, sunglasses and swimming goggles. Motorcycle helmets and visors are covered by Regulation ECE 22.05 which we can test and certify to. We offer BSI Kitemark and Benchmark for UK, global and Australian markets.

Examples of eye protection:

- Safety spectacles
- Goggles
- Face screens
- Welding protectors
- Sunglasses
- Swimming goggles

Services available:

- BSI Kitemark
- BSI Benchmark
- CE marking
- Direct testing
- Verification

Hand and foot protection

Gloves

Gloves require mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425. The majority of gloves fall within category II or III PPE and therefore require EC or EU Type Examination and if complex, on-going surveillance too. As a Notified Body we have the expertise and recognized status to offer these services. We can provide certification for both PPE and Medical Device products where applicable.

Examples of hand and foot protection:

- Protective gloves against:
 - chemical permeation
 - mechanical risks
 - heat and fire
 - cold
 - chemicals and micro organisms
- Fire fighting gloves
- Surgical and examination gloves

Services available:

- BSI Kitemark
- BSI Benchmark
- CE marking
- Direct testing

Safety footwear

Safety footwear requires mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425.

We also offer Verification Certificates for certain products.

Dependant on the standard, or optional testing within a standard, safety footwear may require EC or EU Type Examination and if complex, on-going surveillance too. As a Notified Body we have the expertise and recognized status to offer these services.

Examples of safety footwear:

- Protective footwear
- Occupational footwear
- Forestry footwear
- Footwear for motorcyclists

Footwear protection against:

- chemicals
- fire fighting
- molten metal
- electrical Insulation

Services available:

- BSI Kitemark
- BSI Benchmark
- Direct testing
- CE marking
- Verification

Impact protection

Head protection

Head protection requires mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425.

We also offer voluntary certification with BSI Kitemark, and Verification Certificates for certain products.

The majority of head protection products such as canoeists, equestrian, mountaineering, bump caps, ski helmets and cycle helmets fall within category II PPE. For those which claim electrical or molten metal protection or are fire fighters helmets they require category III.

Examples of impact protection helmets:

Mountaineering, skiing, cycling, industrial, fire fighter

Services available:

- BSI Kitemark
- BSI Benchmark
- Verification
- CE marking
- Direct testing

Protective workwear

Hi-vis jackets

High visibility clothing requires mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425. High visibility clothing depending on the standard used and colour of the garments, can be either category I or category II PPE. We also offer Verification Certificates for certain products.

Fall arrest

Fall arrest equipment falls under mandatory CE certification under the PPE Directive 89/686/EEC, and the PPE Regulation (EU) 2016/425. All fall arrest equipment falls into category III PPE and therefore requires EC type Examination and on-going surveillance. As a Notified Body we have the expertise and recognized status to offer these services.

Examples of protective workwear:

Harnesses, connecting devices

Services available:

- BSI Kitemark
- BSI Benchmark
- CE marking
- Direct testing
- Verification

Transferring your certification to BSI

If you're looking to gain access to new markets and take advantage of our expertise, transferring your certification to BSI can reap real benefits.

Our certification managers, client managers, test engineers and business development managers have a thorough understanding of the testing and certification process. You'll be assessed by the most appropriately experienced professional, perfectly suited to your requirements.

1

Contact us

Telephone or email us for a no-obligation review of your needs, and a written quotation. We operate with complete cost transparency for your peace of mind.

- +44 (0)345 0765 606
- product.certification@bsigroup.com

2

Apply

Send us your application together with:

- A copy of your current certificate and full scope
- Your latest assessment report*
- Your latest audit test report
- A copy of your type test report**
- We'll then send you a written quotation for your review

3

Receive your certificate from BSI

4

Keep improving

We'll agree a programme of continuing assessment visits and audit testing to help you maintain your certification and continue to drive improvements for your business.

* if carried out by an accredited body and not more than 6 months old

** Your type test report should be preferably less than two years old. The work should be conducted by a reputable, accredited lab where we recognize the equivalence of the work they do matches with our own.

Additional services

We help manufacturers around the globe by supporting claims of compliance for new and innovative products. You can also use our multiple certification solutions to make sure you have the resilience to be able to cope with growth and be prepared for future challenges. Companies choose our services to protect their supply chain, their data and their operations.

Training from BSI experts

We offer one of the widest ranges of standards-related training available from quality management to managing your energy effectively. We don't just train you to meet standards – we help you to understand how to embed them into your organization.

We know what an auditor will look for – so we train you to meet it. We know the thinking behind the standard – so we can convey that to drive and inspire your people.

We have a team of expert tutors working across the world who can transfer the knowledge, skills and tools your people need to embed standards of excellence into your organization. They have vast amounts of training and assessment experience, and work across a wide range of business sectors.

For our full training courses please visit:

About BSI

We are the business standards company that equips businesses with the right tools and solutions to turn best-practice standards into habits of excellence. With over 4,000 staff worldwide, we help our clients drive performance, manage risk and grow sustainably.

Founded in 1901 we were the world's first National Standards Body. Now over a century later, we're globally recognized as a champion in best practice. We have been and still are responsible for originating many of the world's most commonly used standards and publish nearly 2,700 standards every year. These standards are developed to address the most pressing issues of today. They also cover various industry sectors, including Aerospace, Automotive, Built Environment, Food, Healthcare, IT and Fire.

All our standards are underpinned by a collaborative and rigorous approach perfected over decades. We always work closely with industry experts, government bodies, trade associations, businesses of all sizes and consumers to develop standards that drive excellence.

We currently work with over 81,000 clients in 181 countries worldwide to help them adopt and cultivate continuous habits of best practice. We also train our clients and provide them with practical implementation guidance, as well as a comprehensive suite of compliance tools. And to ensure our clients get the very best service, we're also independently assessed and accredited globally by ANAB (ANSI-ASQ National Accreditation Board) and 26 other accreditation bodies throughout the world, including UKAS (United Kingdom Accreditation Service).

Our reach is global and we play a key role within the International Organization for Standardization (ISO). As one of the founding members, we help make sure international standards developed address today and tomorrow's business and social needs, while delivering real benefits to an organization and all its stakeholders.
