# Management System: Organization's Context, Risks and Controls training course

## Essential information about the course

Organizations around the world recognize the value of using management systems (MS) to control business risk and contribute value.

Utilizing the new unifying and agreed high level structure (HLS), BSI has developed a comprehensive one-day, non-residential course that explores the HLS principle and requirement in relation to clause, Context of the organization, and its benefits to organizations.

An important tool for an organization to achieve its business aims is implementing an ISO management system. For an organization to realize the intended outcome of a management system it has to tailor the requirements to their context. Then establish & implement the necessary controls in order to achieve the objectives.

This course will concentrate on understanding the context of the organization with regards to its management systems. It will also address the uncertainties that may be crucial to realizing the business aims and how to control the outcomes of those uncertainties.

## Our course agenda
