ISO 45001 The world's first global health and safety management system

ISO 45001, Occupational Health & Safety (OH&S) management system is the world's first OH&S ISO standard. Its focus on risk prevention, innovation and continual improvement will benefit organizations with the foresight to achieve this global standard through improved organizational resilience. As well as increasing employee engagement and publicly demonstrating commitment to sustainable work by providing safe and healthy workplaces, this standard focuses on key business challenges such as the supply chain and continuity planning. This allows organizations to anticipate, adapt and respond, providing both resilience and agility in a global market place.

So why the new international standard?

Although organizations tend to use generic health and safety guidelines or national and consortia standards, none of these demonstrate global conformity.

There was a worldwide need to harmonize health and safety management systems using an international standard and sharing best practices. This can be seen at local, national, regional and global levels – applying to both developing and developed countries. With an international standard to refer to, together with the right infrastructure and training, organizations will be able to address these risks better in future.

ISO 45001 is based on the ISO High Level Structure (HLS) for management system standards which can deliver the following benefits:

- Increased organizational resilience through proactive risk prevention, innovation and continual improvement
- Strengthening of legal and regulatory compliance whilst reducing business losses
- Demonstrates brand responsibility by committing to safe, healthy and sustainable work
- One global occupational health and safety system for all businesses, of all sizes.

Commitment to management standards is proven to deliver real business benefits. BSI Clients who have adopted an OH&S management system tell us they benefit in the following ways:

Why make BSI your first choice for ISO 45001 training

Our tutors

When it comes to teaching how to make standards work, our tutors are the best in the business. As experienced assessors with years of hands-on business and industry experience, they understand the challenges you're most likely to face. They are passionate about standards and have a proven ability to facilitate great learning.

Our expertise

As the world's first National Standards Body and a founding member of ISO, no one knows standards like BSI. And when you train with us you benefit from this experience. You can trust us to say we know what we're talking about and you'll benefit from a premium learning experience. When it comes to standards even our competitors choose us.

Our approach Accelerated Learning

We really understand how training works and that everyone learns and retains knowledge differently. Based on the latest research, our accelerated learning approach is proven to fast-track learning, improve knowledge retention and ensures you can apply your knowledge straight away. We constantly evaluate our results based on your satisfaction and success rate, to provide the best training experience in the industry.

Our solution

We provide a proven pathway to success, wherever you are in your training journey. So whether you want to build your knowledge, learn how to implement or how to audit and improve your management system, we have the right solution for you. You'll also learn right beside your peers; we'll discuss real-world challenges and share best practice based on over 100 years' experience.

Why invest in training from BSI?

When you attend a BSI training course, our tutors are the best in the business. They're truly passionate about sharing their knowledge and ensuring you learn. Trusted experts with years of hands-on and business experience,

they bring the subject matter to life with relevant and contemporary examples that means you can focus on learning.

BSI Training Academy

ISO 45001 Senior (Top) Management Briefing

Essential information about the course

Level **1**

As a leader, your commitment and support is crucial to the success of your organization's Occupational Health and Safety Management System (OH&S MS). This executive-level briefing session is designed to give you an introduction to ISO 45001 so you can help ensure health and safety objectives are met. You will also learn about both your

organization's obligations and your personal responsibilities within an OH&S management system.

This interactive session is led by our expert tutors who have years of experience of working in the field of OH&S. Upon completion you will be able to develop action plans for implementing key leadership activities.

Our full course agenda helps you understand what to expect:

- Welcome and introductions
- Briefing aim and structure
 - What is ISO 45001 and the reasons for its development?
 - OHSAS 18001 versus ISO 45001
 - Overview of the main requirements in ISO 45001
 - Context and line of sight
 - Leadership and commitment
 - Success factors, and summary of Top Management involvement

Book today at bsigroup.com/en-ZA

BSI Training Academy

ISO 45001 Implementing Changes training course

Essential information about the course

Level

If you are involved in the planning, implementing, or supervision of an ISO 45001 management system, then this course will help you to understand the key differences between BS OHSAS 18001 and ISO 45001 from an implementation perspective. You will learn how to create an action plan so that you can implement the new standard using good practice guidance. To get the most from this course, delegates should have already attended our three

hour ISO 45001 migration seminar or our one day migration course.

This 2 day course is packed with practical activities, group discussion, and classroom learning to help you retain the knowledge to implement an effective OH&S management system. You will also learn what implementation of ISO 45001 could look like through examples which will be provided in a useful toolkit.

Our full course agenda helps you understand what to expect:

- Welcome and introductions
- Course aims, objectives and structure
- Refresh on the differences
- Overall project management process
- Documented information differences and process requirements
- Gap analysis – documented information and processes
- Processes needed to address risks and opportunities
- Annex SL and high level structure (HLS) reminder
- Gap analysis – Annex SL Appendix 2
- Determine your context
- Organizational culture
- Leadership and commitment
- Gap analysis - clauses 4-6 (discipline specific differences)
- Risks and opportunities to the OH&S MS
- Formal risk assessment and risk treatment
- Gap analysis - clauses 7-10 (discipline specific differences)
- Implementation considerations
- Continual improvement objectives and processes
- ISO 45001 timeline
- Reflection/course review and questions
