Welcome to the BSI Training Academy

BSI is an industry thought leader in training to international compliance standards. Our training experts provide top quality training to organizations of all sizes and sectors.

We're one of the world's leading providers of business improvement training, offering a range of solutions to keep your staff qualified and updated. In 2016, we trained 105,000 people globally and achieved a satisfaction rate of 99.5%.

We help organizations make excellence a habit – all over the world. That's our business, enabling others to perform better. For more than a century our experts have been challenging mediocrity and complacency to help embed excellence into the way people and products work... to perform better, manage risk and achieve sustainable growth.

From understanding how a standard can help your business, to implementing, monitoring and auditing your compliance to that standard, we can support you all the way.

Our client promise

At the BSI Training Academy, we will make sure you have an excellent learning experience that include:

- An on-going relationship to ensure we understand and meet your continuing training needs
- A clear learning journey to embed the skills you need to develop and add value to your organization
- A best-in-class pre-course experience, including timely delivery of information so you arrive at your training fully prepared and ready to learn
- A state-of-the-art training experience using accelerated learning techniques with our expert tutors in convenient, enjoyable venues
- A recognized qualification to acknowledge your new expertise
- Opportunities to network with peers on the course and learn through shared experiences

Organizational Resilience

Organizational Resilience is the ability of an organization to anticipate, prepare for, respond and adapt to incremental change and sudden disruptions in order to survive and prosper.

Three essential elements of Organizational Resilience

BSI's model for Organizational Resilience can be segmented into three fundamental elements: product, process and people.

We work with organizations around the globe to help them become more resilient by embedding habits of excellence in each of the three elements.

People:

An organization's people, culture and values determine business success. This includes how the company interacts with the environment, civil society and stakeholders on ethical and social responsibility issues.

Process:

Consistent, reliable, and robust processes are crucial for an organization to remain resilient. Business critical processes in areas such as, quality, health and safety, environmental management, business continuity management, and information security must be robust and compliant both within the organization and throughout its supply chain.

Product:

Organizations must understand how their products or services meets the needs of customers or clients and conform to regulatory requirements. A forward looking approach is required; truly resilient businesses innovate by creating new products and markets to stay ahead of competitors.

Operational Resilience

Delivers improvements across your products/ services and processes to meet the evolving needs of your customers as well as improving how you govern your business and value your people.

Information Resilience

Enhances your information security and protects your critical infrastructure from cyber security threats and information risks, so your stakeholders can trust that their sensitive data is secure.

Supply Chain Resilience

Protect your customers, your reputation, and your bottom line by ensuring you're using suppliers you can trust to help deliver safe products to market.

Why train with BSI

Great businesses need great people

Research shows that when an organization invests in training and development, they reap real rewards:

BSI Training Academy

Why Train with BSI

Because we've helped shape and develop many of the world's leading standards, our expert knowledge means a lot, and when you train with us you benefit from this expertise. We take the time to understand your company's learning needs to develop tailored training solutions that satisfy your business objectives.

Our Approach – Accelerated Learning

Our Accelerated Learning Approach is proven to fast-track learning and improve knowledge retention. Accelerated learning focuses on creating knowledge rather than consuming it.

Our Tutors

Our tutors are recognized as leaders in their field, offering a world-class learning experience. They are trained to understand and meet your different learning needs, and they have years of industry experience.

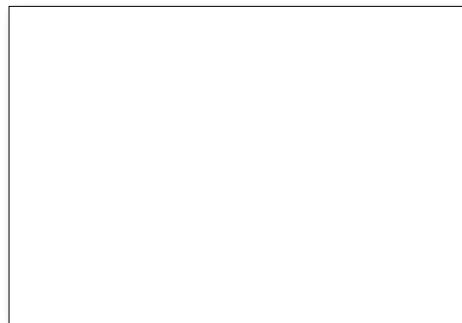

IRCA Certified Courses

IRCA is an auditor training certification body. Over 50,000 students choose to complete IRCA certified training courses every year in more than 100 countries. IRCA approved courses are indicated by the IRCA logo.

The BSI Certificate

Worldwide recognized certificates.
A mark of expertise, quality and integrity.

Types of Training

BSI offers training in many different formats. Choose the medium that best suits your needs.

In-Company Training

An on-site training course is one held at your facility and is open only to your employees. Training students on-site eliminates travel expenses and additional time away from the office.

Public Training

A public training course takes place in a pre-determined, designated location and is available to anyone who registers. This type of training is a convenient, low-cost way to send a small number of employees to learn. Attendees are away from office distractions and benefit from interacting and networking with people from other organizations.

Distance Learning

Allows you to study at your own pace and whenever is convenient to you. It's cost effective and puts you in control of your learning.

Recommended path for training

1

Understand

Requirements courses:

Who should attend?

Ideal for new starter or those needing to gain a "refresher"

What will I learn?

An overview of your management system and the standard's requirements

2

Implement

Implementation courses:

Who should attend?

Those responsible for implementing or have recently taken responsibility for a management team

What will I learn?

The requirements of a standard in the context of your company and how to take the lead in planning implementation

3

Prove it's working

Internal Auditor courses:

Who should attend?

Those tasked with conducting internal audits or monitoring their management systems performance

What will I learn?

How to be better equipped to maintain compliance and how to manage and improve risks to your management team

Lead Auditor courses:

Who should attend?

Those tasked with conducting and leading management system audits

What will I learn?

Gain the ability and confidence to conduct and lead effective audits, and how to manage audit teams and processes

4

Make excellence a habit

Certification:

Assess your readiness for certification with a gap analysis day

Maximize your certification with business improvement training and software tools

All our courses are available in-house

sustainability

In-House Training

Why choose In-House training?

Our courses can be delivered at premises of your choice. We can tailor it to your organization with few exceptions, spending time focused on your objectives. This ensures that your people learn best practices suited to your own organization, in the setting where they will be using them. Our on-site courses are led by expert tutors who are skilled in both their subject matter and in the most effective ways for delegates to learn.

Programs are priced by the day rather than by the delegate, enabling you to make savings for groups, and you can save on the travel and accommodation expenses too.

Choose In-House training if:

- you want to train a group of people
- you want the training tailored to your organization and needs
- you want to reduce the level of risk to proprietary and confidential information
- you want to save money on travel and accommodation

In-House training

Choose this course delivery and adapt it to match your needs or even create something completely customized to you. Whatever you want – you decide. Talk to us about on-site training today.

Request a quote by visiting our website bsigroup.com/en-za/training or call us on **+27 12 004 0279**

Customer reviews...

"The course content was well organized and will provide a very good reference for the trainees to use in creating documents and preparing for the certification audit."

"It was very comfortable to have the training in-house."

"This class was great - very thorough - instructor was very knowledgeable with all the current changes to all the standards and more importantly patient."

"This was one of the most engaging and interesting classes I have attended. I think the simulation part was great - it produced the most meaningful interaction with a small group dynamic."

"This class worked well for me because no travel was involved."

"Best content for any course I've ever participated in."

Management Systems Requirements

(High Level Structure)

Ensure the compliance, effectiveness and maintenance of your management systems in line with the new HLS requirements. Organizations around the world recognize the value of using management systems (MS) to control business risk and contribute value. Utilizing the new unifying and agreed high level structure (HLS), BSI has developed many courses that explore the principles and requirements of the HLS, and its benefits to organizations.

Management System: Organization's Context, Risks and Controls

An important tool for an organization to achieve its business aims is implementing an ISO management system. For an organization to realize the intended outcome of a management system it has to tailor the requirements to their context. Then establish and implement the necessary controls in order to achieve the objectives.

Information Security Controls for Cloud Services Training Course (ISO/IEC 27017:2015)

As technology advances and organizations increase their use of cloud services, the requirement to have more specific cloud security controls in place is critical.

While using a cloud service can often increase information security risks, many of the ISO/IEC 27001 controls highlight responsibilities for either a cloud service customer, or the cloud service provider. ISO/IEC 27017 is a code of practice, which provides guidance on these controls and helps you focus on the more specific risks associated with cloud services as a customer or provider. Learn how to recognize and select the appropriate ISO/IEC 27017:2015 controls to manage cloud service risks, as identified in your ISO/IEC 27001 Information Security Management System (ISMS) risk assessment.

NEW COURSES

Today, in this highly interconnected world, protecting information is increasingly important. Organizations need to ensure they secure personal records and commercially sensitive information from business risk and vulnerabilities. With our range of information security training courses we can help you get the knowledge and skills you need to build resilience around your information security management.

Certified Information Systems Security Professional (CISSP)

If you're building a career in information security then Certified Information Systems Security Professional (CISSP) is the must-have qualification to help you progress. It is a globally recognized standard (ISO/IEC 17024) that demonstrates your competence as an IT professional. Covering topics including cloud computing, mobile security, application development security, and risk management, you will gain the knowledge to best manage information security issues back in your organization.

Food Safety Management

ISO 22000

The growing number of national standards for food safety management has led to confusion. Consequently, there is a need for international harmonization and ISO aims to meet this need with ISO 22000. The standard intends to define the requirements for companies that desire to exceed the regulatory requirements for food safety.

ISO 22000 Requirements

A detailed overview of the clauses of ISO 22000 and illustrates how the standard can help you effectively maintain a food safety management system.

Effective Governance Management Systems

BS 13500:2013

It is increasingly obvious that society's expectations of organizational behaviours and performance, and thus "governance", are rising. This rise in expectations of partly in response to a steady flow of major incidents and perceived abuses of authority. However, the approach within this code of practice is based on the evidence that good governance positions organizations, and our society, for success. Therefore, the scope of this code goes beyond the avoidance or mitigation of problems.

Effective Governance Management Systems Requirements Training Course (BS 13500:2013)

Obtain a detailed understanding of the key terms, definitions and requirements of BS 13500:2013 and how the standard can help your organization to better meet customer needs.
