● Exporting to the UK?
UKCA marking update

By Royal Charter

● Thank you for joining our webinar

- Welcome
- Please put your microphone on mute if you are not speaking
- Possibility to ask questions at the end of the webinar
- During the webinar you can ask your question in the chat, we will try to answer or otherwise Paul will answer afterwards
- This session will be recorded

BSI's Global Head
of Energy Products

Today's agenda

Brexit & UKCA 10 minutes

- Why does UKCA exist?
- Notified Body vs Approved Body
- What is changing
- Product areas covered by UKCA

Obtain UKCA 10 minutes

- What do you need to do to obtain UKCA?
- What about surveillance audits?
- For whom is UKCA?

Questions 30 minutes

Contact

What area of UKCA are you unsure/looking for more information about? (Select all that apply)

- Timelines
- Markings and labelling
- Transition from CE Marking
- Northern Ireland
- Duties of importers/distributors

● Brexit & UKCA

Why does UKCA exist?

Brexit | 01-01-2020

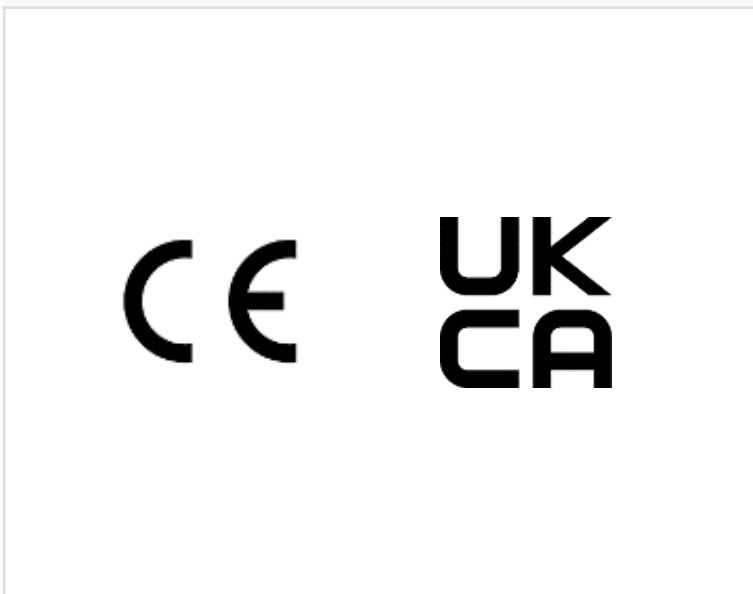

After the 'hard Brexit' the UK no longer uses the CE marking system. UKCA marking is announced including a transition phase.

Transition phase

During the transition phase CE and UKCA marking are both accepted for products that are supplied to the UK.

- UKCA marking can be affixed

Deadline UKCA marking | 01-01-2023

As from first of January 2023 UKCA marking is obligated for exporting most products to the UK that need a marking.

- UKCA marking must be affixed

Notified Body vs Approved Body

Is your Notified Body also a UK approved body?

Notified Body

EU Directives & Regulations

EN standards

Approved Body

UK Regulations

BS EN standards

But what is changing?

The UK and EU requirements are **identical** from a technical perspective but already start to diverge

Changes per 20-06-2022

Changes affect the following regulations that BSI provides Approved Body services for:

- Gas appliances regulation
- PPE regulation
- Radio equipment regulation
- Measuring instruments regulation
- Pressure equipment regulation
- Lifts regulation
- Eco design and energy related products regulation (previously boiler efficiency directive)

Our interpretation:

Existing CE Module B, Type Examination remains valid for UKCA marking.

FPC audits / Surveillance audits remain a requirement.

CE type examination remains valid after 31-12-2022 until 31-12-2027, until the expiry of the certificate or until the product is changed. Whichever comes first.

Construction Products Regulation

- All AVCP 3 notified laboratory testing done before 31-12-2022 is now accepted until the product changes or the standard does.
- AVCP 1, AVCP 1+ or AVCP 2+ remain unaffected. Transition to a UK Approved Body still needed before 31-12-2022.

Product areas covered by the UKCA marking

- Recreational craft and personal watercraft
- **Simple pressure vessels**
- **Electromagnetic compatibility**
- **Non-automatic weighing instruments**
- **Measuring instruments**
- **Low voltage electrical equipment**
- Restriction of hazardous substances
- Toy safety
- **Lifts**
- ATEX
- **Radio equipment**
- **Pressure equipment**
- **Personal protective equipment**
- **Gas appliances**
- Machinery
- Outdoor noise
- Eco-design
- Aerosols

Products covered by the UKCA marking but have some special rules

- **Medical devices**
- **Rail interoperability**
- **Construction products**
- **Civil explosives**

* Areas marked red are covered by BSI

How far along your UKCA journey are you?

- Establishing what we need to do
- We have CE, but we need to apply for UKCA
- Application in process
- We have achieved UKCA
- Not applicable

● What do you need to do to obtain UKCA?

What do I need to do to obtain UKCA?

Example technical file

- Initial Assessment report
- Last 3 surveillance reports
- Initial type test report
- Copy of the Declaration of Performance
- Copy of CE Certificate with scope

What about surveillance audits?

Claims compliance with require surveillance audits?

Also known as Factory Production Control audits or 'FPC audits'

Performing audit(s) by BSI

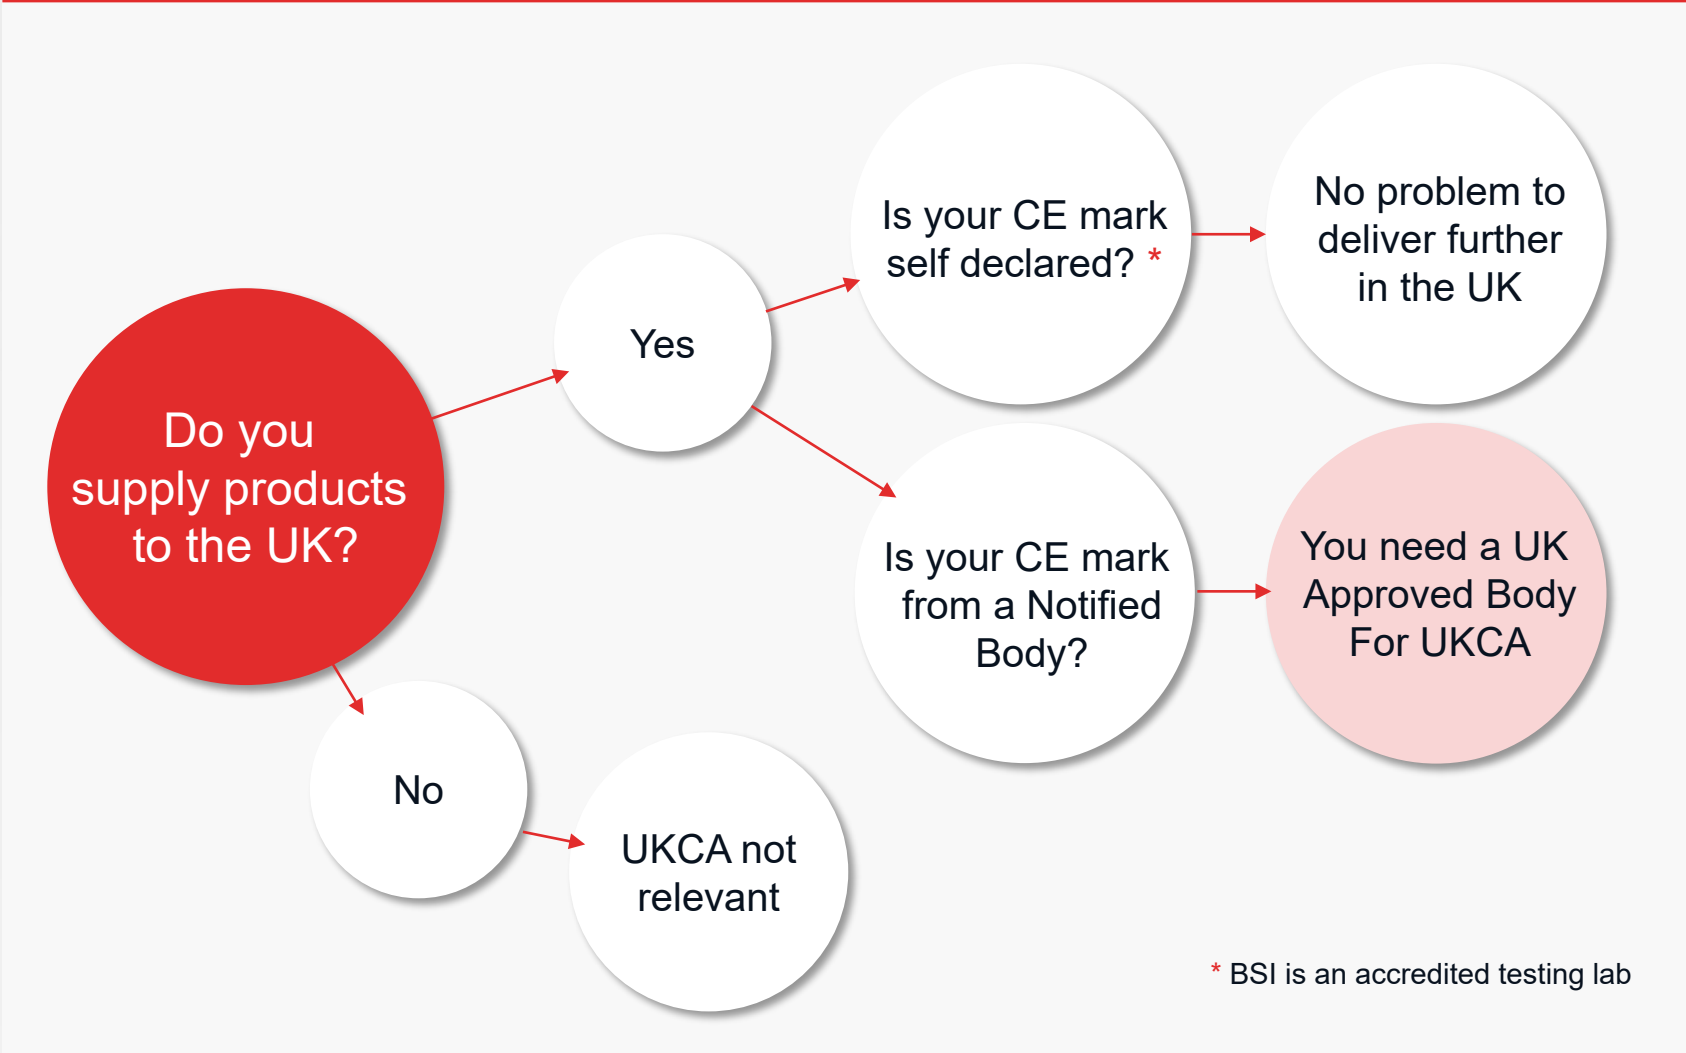

One of our own auditors would then visit your production location.

Subcontracting agreement with current NoBo

Audits by current NoBo, BSI will review their annual reports to maintain the validity of your UKCA certificate.

For whom is UKCA relevant?

* BSI is an accredited testing lab

Would you like to be contacted by BSI for any of the following?

- UKCA Certification
- UKCA/CE Training Courses
- CE Marking Certification
- Other Product Certification Schemes (e.g. Kitemark)
- Other (please comment)

● Time for questions

Start with remaining questions from the chat

Please raise your hand when you have a question

● Keep in contact?
