

How we support healthcare organizations in building cyber resilience

With the ever-changing distribution landscape for the healthcare industry, from technological advancements, digitization and complex regulations, BSI can help organizations adapt and embrace these changes.

Remote security testing and enterprise security technology

Many healthcare and pharmaceutical organizations are currently managing recurring internal and external security testing tasks. Performing those activities remotely will allow you to continuously identify vulnerabilities while not having security testing personnel physically onsite. BSI's security testing consultants are experts in the delivery of remote services. We also provide enterprise security technology for the healthcare and pharmaceutical industry delivered using remote techniques. Take our web security capabilities; implemented via a remote site, leveraging our cloud-based technology partners' infrastructure along with our specialist cloud security consultancy team.

Forensic and information management services

eDiscovery, digital forensic support and information management services are remotely available through our secure collaboration solutions. Our consultants deliver offsite services to allow our clients to avoid disruption in mandatory legal and critical activities. Should you receive a Data Subject Access Requests (DSARs), for example, with our remote techniques BSI can help you fulfil this requirement promptly. BSI can assist you in ensuring that clinical or proprietary data is kept as secure as possible.

Vendor risk management services

BSI support healthcare and pharmaceutical organizations in effectively managing third party risk through an end-to-end lifecycle. Our approach allows organizations to manage information security risks in supplier relationships whilst enabling acquirers to achieve their business objectives in a controlled and secure way.

As trusted advisors of best practice, we empower you to keep your business safe through a diverse portfolio of information security solutions.

Whether it's certification, product testing, and consultancy services or training and qualifying your people, we can help you achieve your goals of effective information security and data privacy resilience.

Incident management

During crisis situations, healthcare and pharmaceutical organizations are more vulnerable to cyber-attacks, that are targeted at remote users or overwhelmed teams. Given the potential impact of these complex events primarily on patients and customers, BSI's advanced incident management capabilities help you respond and recover.

Online training

Upskilling employees is a fundamental requirement in reducing the risks caused by human related cyberattacks such as phishing, which has seen a 400% increase within healthcare and pharmaceutical industry in the last year. Our SaaS based security awareness platform and virtual training courses can be designed and delivered remotely ensuring an enhanced client experience. Moreover, our tutor-led interactive learning courses can now bring the classroom to you.

Cyber, risk and advisory (CRA) services

Security governance services are important for an effective security program within healthcare and pharmaceutical industries. Our CRA services include HIPAA consultancy, implementation support, gap analysis, ISO/IEC 27001, NIST CSF advisory, GDPR and CCPA services, Data Protection Officer (DPOaaS) services, Data Protection Impact Assessments (DPIA), PCI DSS consulting and compliance services. All of these and other CRA services are regularly delivered remotely by experienced BSI consultants.

Disclaimer

BSI is an accredited Certification Body for Management System Certification and Product certification. No BSI Group company may provide management system consultancy or product consultancy that could be in breach of accreditation requirements. Clients who have received any form of management system consultancy or product consultancy from any BSI Group company are unable to have BSI certification services within a 2 year period following completion of consultancy.
