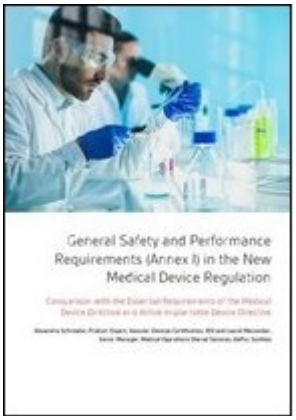
Regulatory review

Your monthly medical device update

January 2018

Did you miss our update on the MDR General Safety and Performance requirements?



The Medical Devices Regulation transition period has started, we are now working towards a greater understanding and clarity around the changes we are facing. You need to interpret how the changes impact your organization and begin to implement your transition.

The BSI team has created a comprehensive guide to the General Safety and Performance Requirements of the MDR. Our experts talk through the key points to note in an online webinar, which is supported by an extensive white paper.

Not had chance to listen back? Click here to listen to the update now.
