

Desapex boosts efficiency and sustainability with BIM qualifications

Case study

Bangalore-based Desapex is a leading BIM engineering consultancy in India. It integrates digital processes to boost construction efficiency and sustainability and is among the first organizations globally to achieve the BSI Kitemark for ISO 19650.

The challenge

Desapex's services range across planning, design, and construction, driven by a skilled team dedicated to advancing BIM standards and practices. With major built environment clients, the company wanted to both enhance and demonstrate the extensive BIM knowledge and skills of its experts.

Desapex's challenge was threefold: first, to boost the skills of its people; second, to better serve its existing partners; and third, to maximize its ability to attract new business.

The solution

Reinforcing built environment partnerships through trusted BIM training and qualifications.

Through its collaboration with BSI Academy, Desapex has strengthened its expertise in BIM methodologies, information management, and global best practices, ensuring that its teams can seamlessly implement ISO 19650 principles across India's construction sector.

Six delegates – including BIM managers and digital delivery leads – benefitted from an immersive online program, describing their BSI tutor as "excellent" and tutor-led breakout sessions as "outstanding". They all achieved independently verified BIM qualifications from BSI.

"BIM is the way forward for India's built environment, and our collaboration with BSI academy helps us maximize our clout in this growing market"

Varunkumar Sagarkar
Director, Digital Engineering
Desapex

The benefits

Desapex's BIM training and qualifications program with BSI Academy has helped it to:

- Become one of the leaders in ISO 19650-compliant BIM implementation;
- Enable seamless project execution through structured information management;
- Support clients in aligning with international sustainability and digital twin strategies;
- Upskill and reward key staff, boosting their competence, confidence and client service;
- Position itself as a trusted partner for world-class project delivery.

Why BSI

BSI Academy – your trusted training partner for BIM excellence.

By leveraging BSI Academy's world-class training programs and BIM qualifications, Desapex is helping to shape a digital-first, globally competitive construction industry in India.
