BSI Knowledge's key features

BSI Knowledge gives you instant access to over 140,000 global standards, helping your organization stay compliant, efficient, and innovative. Discover key features that simplify your access to essential standards and keep you up-to-date.

Easy access anywhere, anytime

Access a vast catalogue of standards and best practice insights from any device, without causing delays to projects.

Extensive standards library

Access over 140,000 standards, including BS, EN, ISO, IEC, ASTM, and ASME, API, SAE, AAMI. Choose from 54 pre-built sector modules, with both historical and current documents readily available.

Automatic updates with tracked changes

Receive real-time notifications and tracked changes documents for updated standards at no extra cost. Get the latest publications, amendments, and adoptions faster than others.

Customizable alerts and redlining

Track changes in standards with tailored alerts, redlining, and expert commentary, ensuring you're always informed on BSI's latest updates.

Cost-effective and tailored solutions

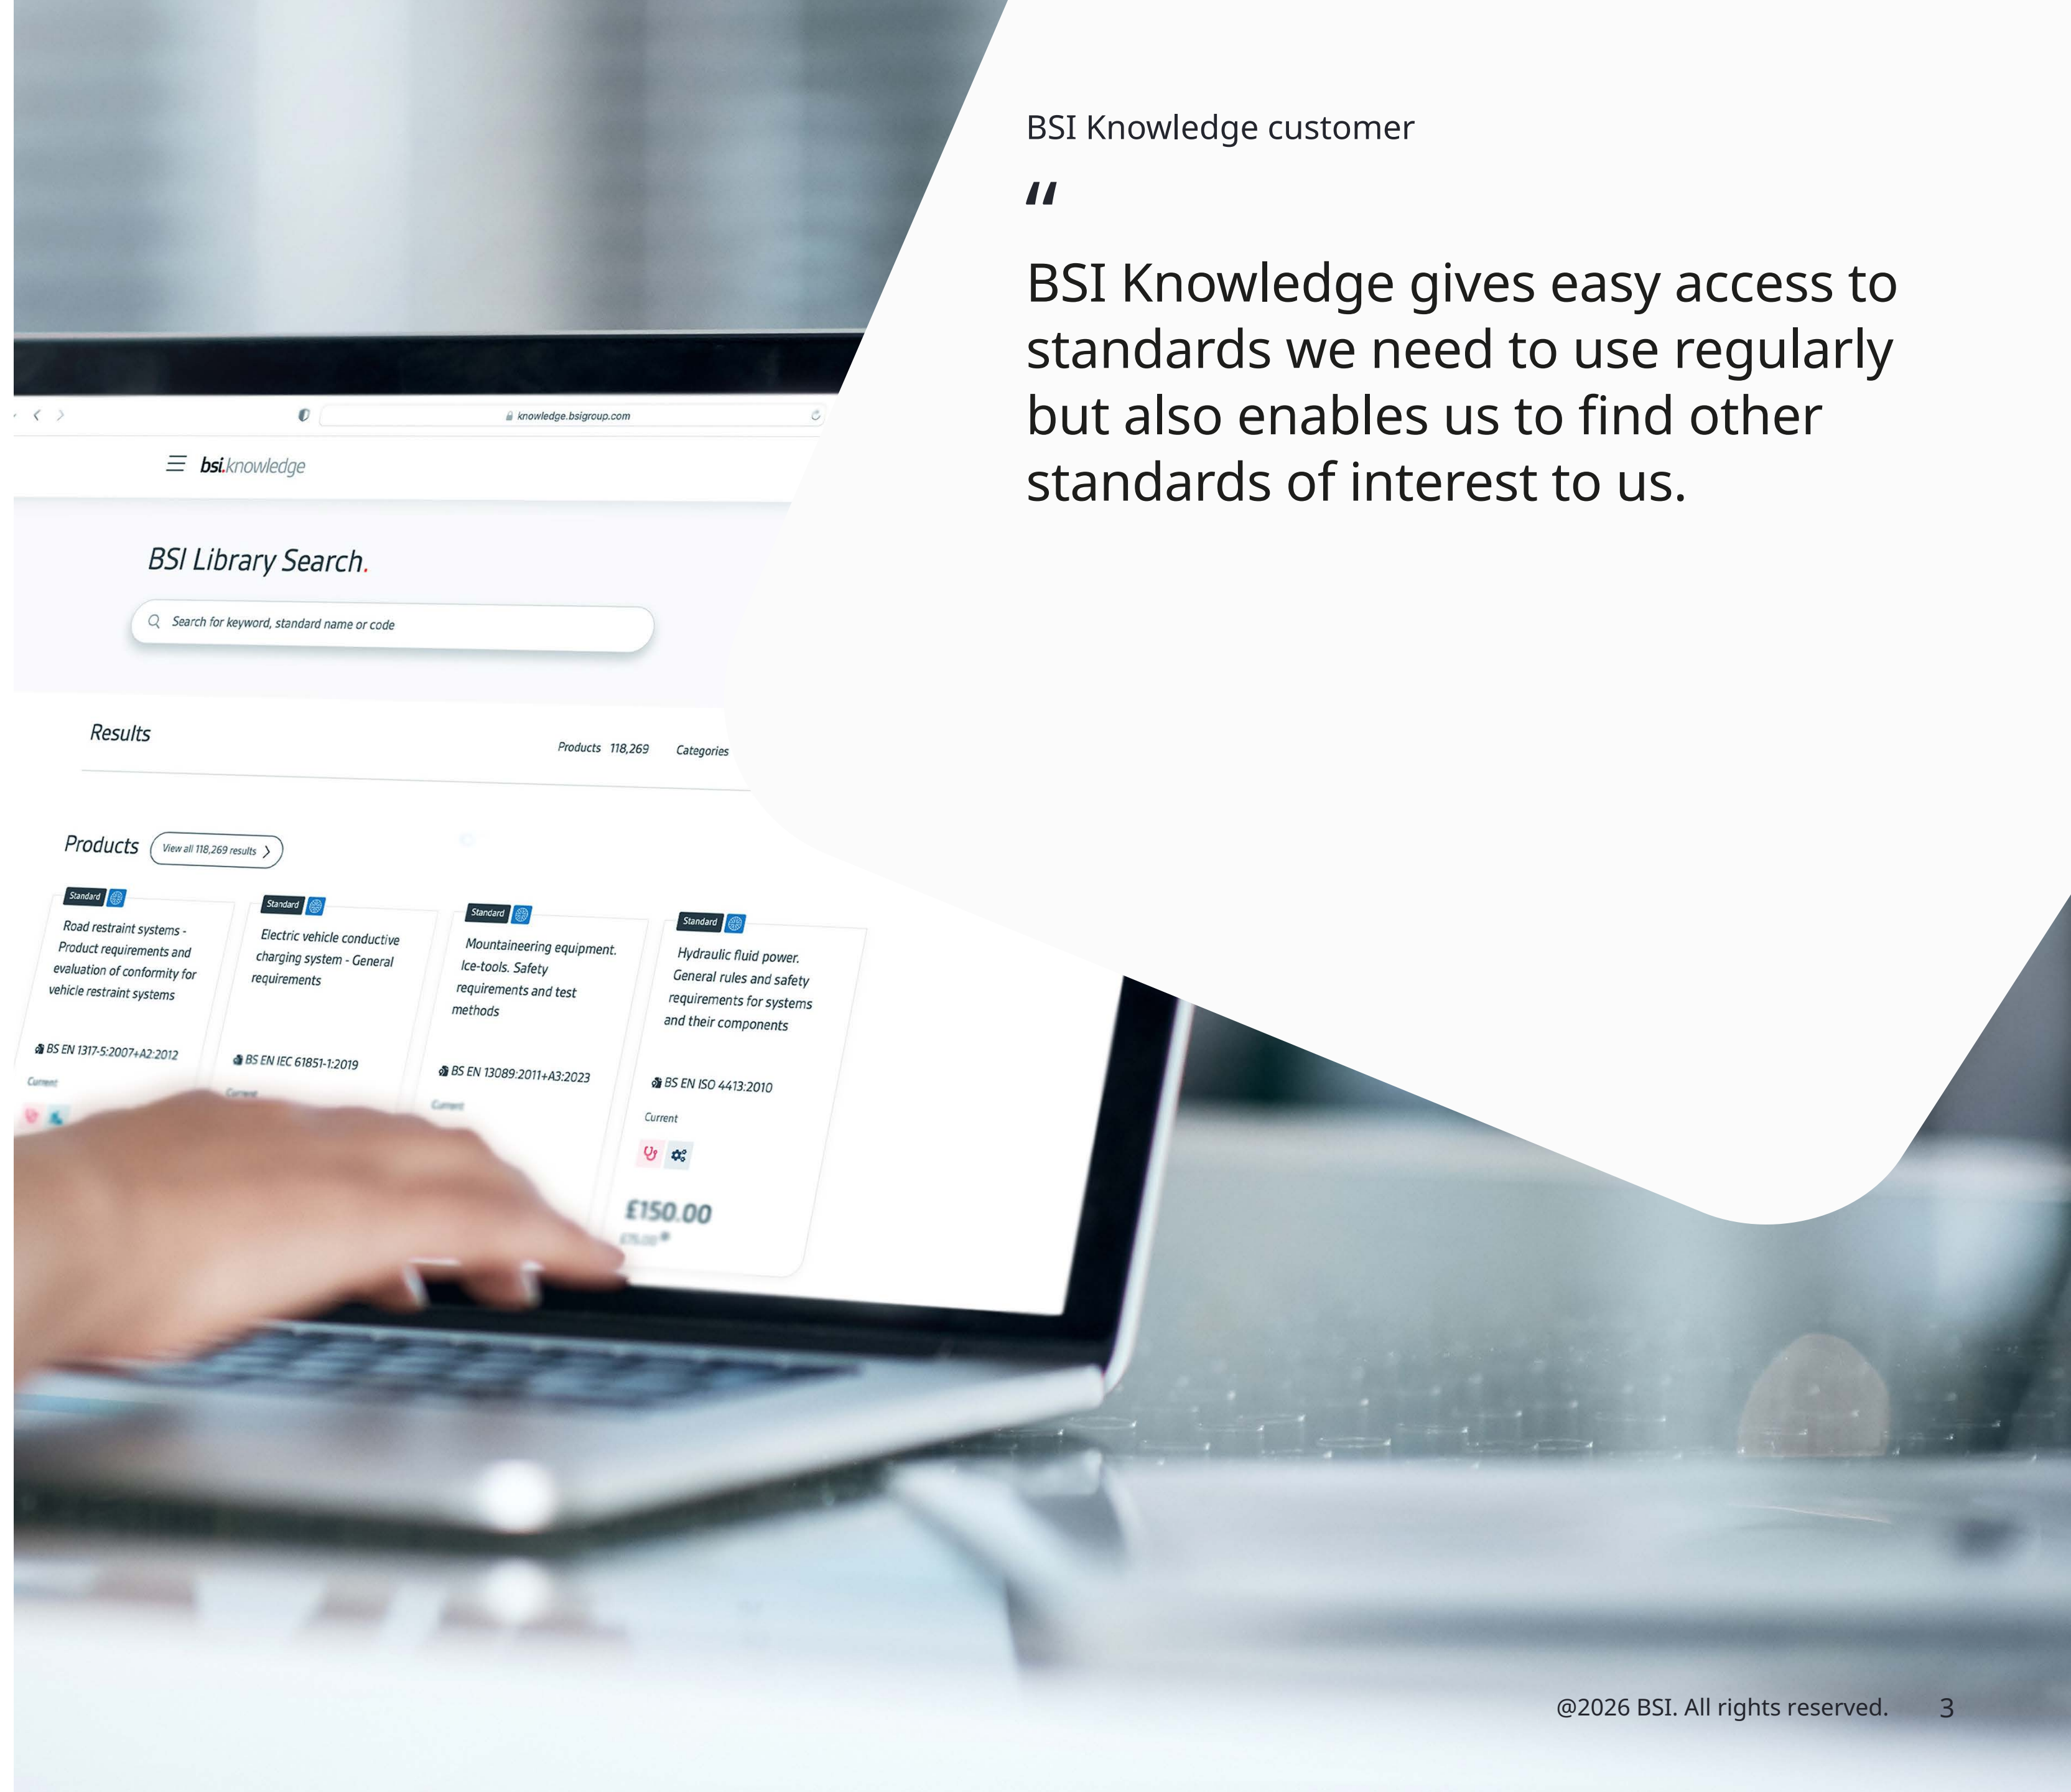

Access affordable collections of standards, choosing from pre-built modules or creating a custom collection to fit your specific needs.

Administrator tools for user management

As an admin, easily manage your organization's standards and user access within BSI Knowledge, keeping your team aligned and informed.

New additions to BSI Knowledge pre-built modules

At BSI, we are always looking to add more best practice and documents to BSI Knowledge. In this document, you will find each of our pre-built modules, the additional volume of standards we've added, total documents per module and the increased value of content available. The content value of each module is calculated by summing the prices of its individual standards. A BSI Knowledge subscription offers a substantial discount compared to single purchases.
