2025 training schedule

Welcome

At the BSI Training Academy, our focus is on supporting you to build knowledge and skills to add more value to your organization, while developing your career.

Our range of learning solutions span Digital, Health, Safety and Well-being, Quality Management, and Sustainability. Delivered in person, online or on-demand – our courses lead to globally recognized BSI qualifications that enable you to increase skills and demonstrate your value to your organization.

Our approach – accelerated learning

Our accelerated learning approach is proven to fast-track learning and improve knowledge retention. You'll participate in activity-based learning and have the opportunity to share your learning experience with peers from other companies which will help embed your learning.

Expert tutors

Our tutors are recognized as experts in their field, offering a world-class learning experience that our delegates rate as first class. They are trained to understand and meet your different learning needs, have years of practical industry experience, as well as deep subject matter knowledge.

Your BSI certificate

On successful completion, you'll receive a certificate that's recognized worldwide. A BSI Training Academy certificate is a mark of expertise, quality and integrity. Find out our blockchain-based solution to showcase your achievement and credentials.

Flexible delivery formats

- Virtual instructor led training (VILT) / Live online training
- Instructor led training (ILT) / Classroom-based training
- On-demand eLearning (OD)
- In-house training

Performance Improvement
Process Improvement: Lean Six Sigma

Organizations need to strive for operational excellence to create value and to sustain business growth. A well-structured programme that delivers continuous improvement can drive performance by achieving more with less.

On-demand elearning (OD)

Lean Six Sigma White Belt

This course aims to provide you with good basic knowledge of Lean Six Sigma and will have taken a first step towards becoming a practitioner or sponsor of organizational change.

Duration: 3.5 hours   Course type: OD
Course level: Introduction | **Course details**

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

Lean Six Sigma White Belt

This course aims to provide you with good basic knowledge of Lean Six Sigma and will have taken a first step towards becoming a practitioner or sponsor of organizational change.

Duration: 1 day   Course type: VILT/In-house
Course level: Introduction | **Course details**

Certified Lean Six Sigma Yellow Belt

This course is to train the you on the basic level of Lean Six Sigma improvement skills to develop Yellow Belts who serve as the members of the improvement project team.

Duration: 3 days   Course type: VILT/In-house
Course level: Introduction | **Course details**

Certified Lean Six Sigma Green Belt

This course is aimed at individuals who will perform Green Belts roles, as functional change agents. It will help you understand the Lean Six Sigma tools and how to implement them within a service environment to successfully deliver projects and improve performance. This course is accredited by IASSC / CSSC.

Duration: 9 days   Course type: VILT/ILT/In-house
Course level: Specialist | **Course details**

Certified Lean Six Sigma Black Belt

You'll gain advanced skills in analysing and improving processes using the Lean Six Sigma approach. Structured to optimize learning and application, this course uses training, coaching and on-the-job project implementation. This course is accredited by IASSC / CSSC.

Duration: 18 days   Course type: VILT/ILT/In-house
Course level: Specialist | **Course details**

Upgrading to Certified Lean Six Sigma Black Belt

This course is designed to advance you as a qualified Green Belt to Black Belt level. You'll get an in-depth understanding of both Lean and Six Sigma concepts, methods and tools and skills to successfully apply them within your organization.

Duration: 9 days   Course type: VILT/ILT/In-house
Course level: Specialist | Course details

Upgrading to Certified Service Lean Six Sigma Black Belt

This course is designed to advance you as a qualified Green Belt to Black Belt level. You'll learn how to combine Lean and Six Sigma methodologies to create the best approach to resolve operational issues and improve process performance.

Duration: 9 days   Course type: In-house
Course level: Specialist | Course details

Certified Service Lean Six Sigma Yellow Belt

This course will provide you with the skills needed to become a yellow belt, so that you may serve on the improvement project team. You'll learn the Lean Six Sigma principles and methodology, as well as the use of basic Lean Sigma improvement tools.

Duration: 3 days   Course type: In-house
Course level: Understanding | Course details

BSI is an International Association For Six Sigma Certification (IASSC) Accredited Training Organization™ for Certified Lean Six Sigma Green Belt and Certified Lean Six Sigma Black Belt courses.

BSI is The Council for Six Sigma Certification (CSSC) accredited training providr for all Certified Six Sigma courses and Certified Lean Sigma courses.

Certified Service Lean Six Sigma Green Belt

This course aims to equip you with the knowledge and skills to analyse and improve processes using the integrated Lean Six Sigma approach within service environment.

Duration: 9 days   Course type: In-house
Course level: Specialist | Course details

Certified Service Lean Six Sigma Black Belt

This course is designed for participants who are expected to play the Black Belts role in Lean Six Sigma implementation in non-manufacturing organizations.

Duration: 18 days   Course type: In-house
Course level: Specialist | Course details

Performance Improvement
Process Improvement: Six Sigma

Six Sigma is an organizational approach to continual improvement which focuses on minimizing variability of key process outcomes.

BSI is The Council for Six Sigma Certification (CSSC) accredited training providr for all Certified Six Sigma courses and Certified Lean Sigma courses.

Certified Six Sigma Green Belt

You'll be introduced to intermediate level quality tools from the Six Sigma methodology to help you deliver improvements within your organization. This course is accredited by CSSC.

Duration: 6 days   Course type: VILT/ILT/In-house
Course level: Specialist | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

Basic Understanding Six Sigma

This course presents a thorough overview of the Six Sigma concepts and techniques for successful implementation, as well as a clear explanation of DMAIC - the improvement methodology used in Six Sigma.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Certified Six Sigma Black Belt

This course is designed to develop experts, providing an in-depth understanding of the Six Sigma concepts, methods and tools that drive improvements in key processes. This course is accredited by CSSC.

Duration: 14 days   Course type: VILT/ILT/In-house
Course level: Specialist | Course details

Certified Six Sigma Yellow Belt

This course will provide you with the skills to become a Six Sigma Yellow Belt so you can work with Green and Black belts within your organization to implement Six Sigma to drive business improvement.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

Upgrading to Certified Six Sigma Black Belt

By attending this course you'll advance from a qualified Green Belt to Black Belt level, gaining a more in-depth understanding of the Six Sigma concepts, methods and tools to lead on improving key processes that will drive business success.

Duration: 8 days   Course type: VILT/ILT/In-house
Course level: Specialist | Course details

Performance Improvement
Process Improvement: Lean

Lean approach is to identifying and removing waste in processes thereby increasing the speed, efficiency and effectiveness of an organizations operations.

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

Certified Lean Practitoner

By this course you'll be introduced to tools and techniques that have been successfully applied in manufacturing and service organizations to deliver great results, including significant cost savings and improved operational performance.

Duration: 5 days   Course type: ILT/In-house
Course level: Specialist | Course details

Certified Lean Expert

Attending this course will equip you with the practical knowledge on how to introduce Lean initiatives to the shopfloor.

Duration: 10 days   Course type: ILT/In-house
Course level: Specialist | Course details

Upgrading to Certified Lean Expert

This training will equip you with the additional practical tools that are essential to carry-out improvement initiatives at the shopfloor.

Duration: 5 days   Course type: ILT/In-house
Course level: Specialist | Course details

Certified Lean Master

By attending our lean master training you will build on your existing Lean expert knowledge. You'll gain confidence to address lean issues and opportunities at both strategic and operational levels.

Duration: 15 days   Course type: ILT/In-house
Course level: Specialist | Course details

Upgrading to Certified Lean Master

By attending our upgrading to Lean Master training, you'll build on your existing Lean expert knowledge. You'll gain confidence to address lean issues and opportunities at both strategic and operational levels.

Duration: 5 days   Course type: ILT/In-house
Course level: Specialist | Course details

Lean Office Practice: Improving Transactional Processes with Lean

This one day training course is designed for individuals and teams who work in offices or supporting functions, and the service environment. You will learn about Lean tools, how to identify waste, streamline, and improve process delivery efficiency.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Basic Understanding of Lean & Value Stream Mapping (VSM)

This course provides you with a comprehensive overview of the principles, roadmap and techniques needed to transform a traditional organization to a Lean one.

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

</div>

8-Discipline (8D) Team-oriented Problem Solving Techniques

This course will provide you with concepts andpractical approaches to implement the 8D problem solving technique within your organization.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

Effective Root Cause Analysis

This training course uses a practical approach to systematically state the problem, understand the situation, root up the cause, fix the cause and make sure the problem remains fixed.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

Effective PDCA Management and Deployment Techniques

The PDCA cycle (Plan-Do-Check-Act) or the Deming Cycle, is often served as the foundation for problem solving and improvement methodologies. This course will equip you with an understanding of PDCA, how it can be used effectively, and common tools associated with the model.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Problem Solving Through 7QC Tools Made Easy

This course is based on a proven problem-solving model by Deming, who advocated the PDCA Cycle of Plan-Do-Check-Act. The 7 QC tools are the fundamental techniques used at the different stages in the PDCA cycle.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

The A3 Report : A Lean Problem Solving and Reporting Process

This course aims to provide you with a clear understanding of the importance of being Lean. You'll be introduced to a simple yet effective tool that is able to capture the essence of the problem, analysis, action taken and the results.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Performance Improvement
Production Control

Developing the skills of your people is key to achieving improvement throughout your organization.

Gage Repeatability & Reproducibility (GR&R)

This course is based on the AIAG Measurement System Analysis (MSA) Reference Manual and will provide you with a good understanding of measurement system concepts. GR&R is one of the components in MSA to assess precision of the measurement system.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

An Effective Calibration System

This course will help you to understand, plan and implement a cost effective calibration system into your organization.

You'll learn how to meet the requirements of quality management system standards and best-practices.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

Introduction to Minitab Software

With the application of Minitab, you can automate the tedious calculation process and focus more on analyzing the results for process improvement.

Duration: 1 day   Course type: In-house
Course level: Understanding| Course details

Measurement System Analysis (MSA) with Minitab Software

MSA keeps your measurements honest, accurate, and expected. With the aid of Minitab software, the assessment process to validate your measurement system is now faster and easier.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

Practical Design of Experiment (DOE) with Minitab Software

This course addresses all the essentials of DOE to ensure a successful implementation of this improvement tool.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

Statistical Process Control (SPC) with Minitab Software

SPC allows to track trends and monitor the very heartbeat of production processes. Now, with the aid of Minitab software, the control charts can be set up faster and enable easier output analysis.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

Process Mapping Toolbox Towards Excellence

This course will introduce you to the purpose of process mapping, the various approaches for daily operation and process improvement, and how to apply process mapping effectively in your organization.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

Zero Acceptance Number Sampling Plan

This course introduces a zero acceptance number sampling plan, whereby the entire batch of products is only accepted if no rejects are found in the sampling. A variety of zero acceptance number sampling plans based on MIL-STD-1916 will be presented and discussed.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Quick Changeover for Operational Flexibility and Responsiveness

This course provide you with the practical knowledge to reduce changeover time and enhance your organization's flexibility and responsiveness to meet customers' demands. You'll learn the principles and techniques of quick changeover and how to implement a world-class changeover activity.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Kaizen Implementation

This course is to train Lean Leaders on how Kaizen can be successfully implemented through work teams to enhance production quality, productivity and yield.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Total Productive Maintenance (TPM):
Key to Production Effectiveness

This course will provide you with a good overview of the concepts and practical approaches for implementing an effective TPM program. It provides an introduction to the eight pillars of TPM and the TPM implementation roadmap.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Kanban Pull System with Heijunka Program

This course take you from ground zero (Push Production) to Kanban Pull system with Heijunka. It includes overview of Lean Manufacturing tools and value stream mapping as the basic knowledge required to steer towards implementing Kanban Pull system in an organization.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

Advanced Pull Manufacturing with Heijunka

You'll learn how an end-to-end pull system operates, the use of load-levelling and a load-levelling board to effectively replace traditional production scheduling for a constant demand high-mix condition and the use of FIFO lanes for production processes.

Duration: 2 days   Course type: In-house
Course level: Implementation | Course details

Standard Operations with Training
Within Industry (TWI)

A proven technique used extensively in the automotive industry, TWI is an essential component of the competency tool kit for all discerning supervisors, trainers and process owners. This course will provide you with the knowledge and skills to understand the TWI model and how to effectively put it to use.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Fundamentals of Acceptance Sampling

This course will provide you with guidance on quality tools, the different Course levels of acceptance sampling plans and their benefits and provides practical exercises to enhance your understanding.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details
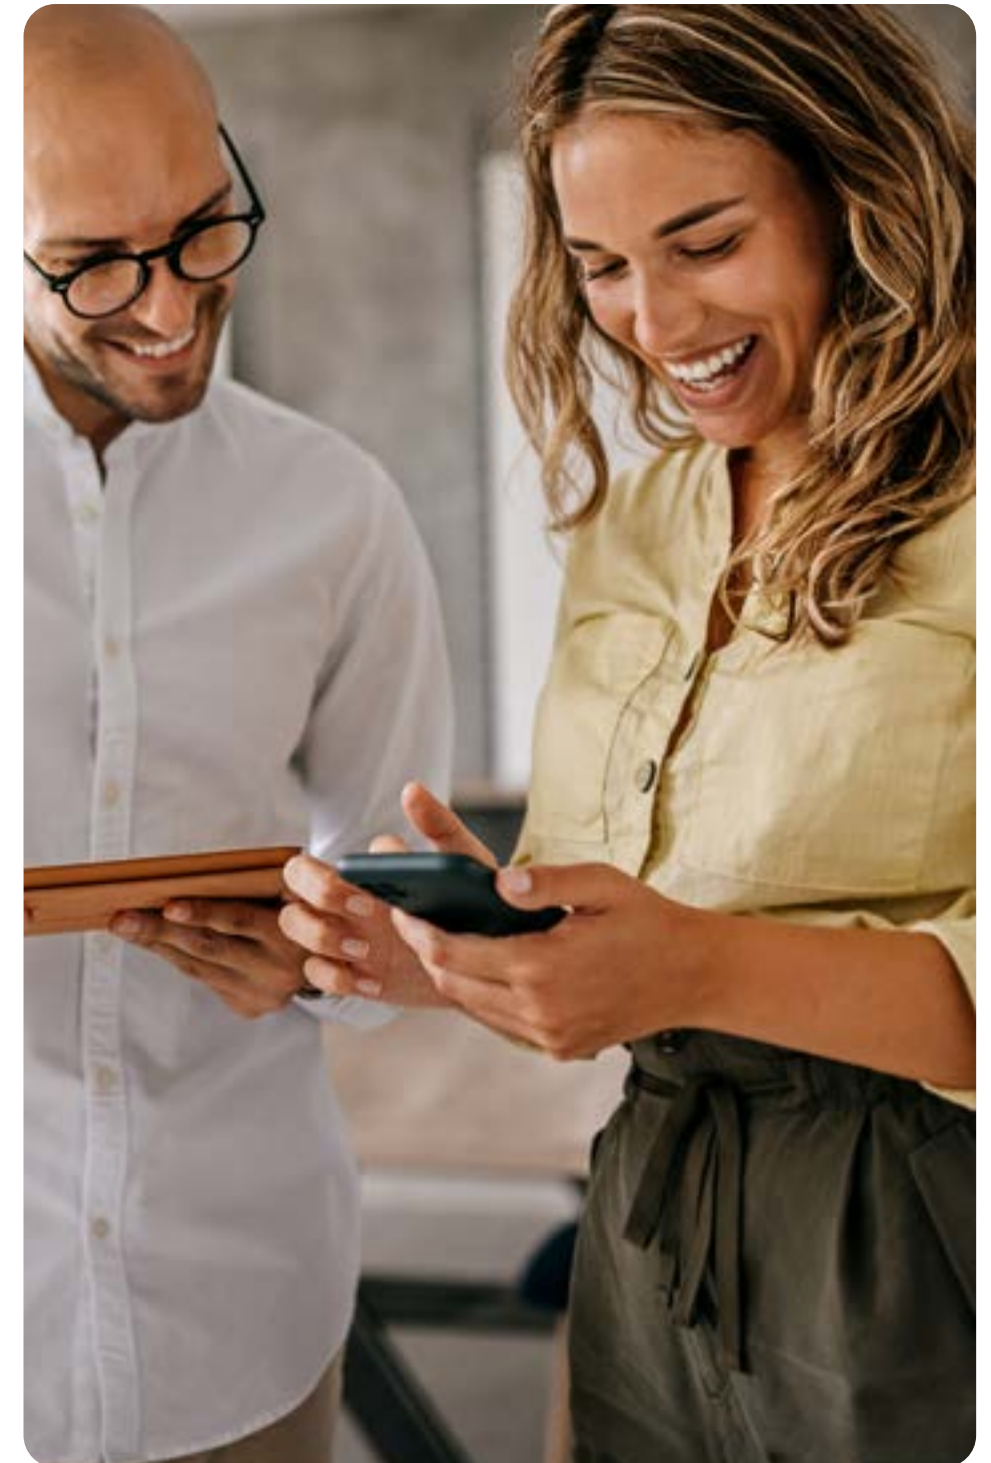

Overall Equipment Effectiveness (OEE) Explained

This course looks at OEE in detail. You will be able to understand the waste and loss in terms of equipment optimization, and point towards improvement initiatives that can impact the bottom line.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Work Engineering for Smooth Flow Manufacturing

Work Engineering with focus on work methods and measurement is a proven practical and time-tested methodology to enhance your production or operational management, particularly in the areas of shortening cycle time and overall lead time of your conversion process.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

Zero Defect Through Poka Yoke

This course will help you to get started on developing and implementing an error-proofing system for your organization using the Poka-Yoke method which seeks to remove the causes of defects.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Advanced Statistical Process Control (SPC+) with Minitab Software

This course covers the CUSUM and EWMA control charts, as well as the different methods to compute process capability where the process does not follow normal distribution.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

5S Principles and Implementation

5S provides the fundamentals to maintain discipline in the workplace. This course will provide you with the tools and knowledge to confidently implement 5S into your organization.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

The standard was developed with the objective of promoting confidence in the operation of laboratories. It specifies the general requirements for the competence, impartiality and consistent operation of laboratories.

On-demand elearning (OD)

eLearning: ISO/IEC 17025 Awareness of the Requirements for the Competence of Testing and Calibration Laboratories

The general requirement for the testing and calibration laboratories is critically important you and your customers. This course makes you aware of what requirements are and why is it important to ensure good laboratory practices.

Duration: 1 hour   Course type: OD
Course level: Understanding | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

ISO/IEC 17025:2017 Requirements

This course will take you through the standard which covers everything from test equipment, data sampling and valid specifications to improve an organization's quality assurance systems (and as a result their quality control).

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

ISO/IEC 17025:2017 Internal Auditor

This course develops the necessary skills to assess and report on the conformance and implementation of processes based on ISO 17025:2017. You'll learn how to initiate an audit, prepare and conduct audit activities, compile and distribute audit reports and complete follow-up activities.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | Course details

ISO/IEC 17025:2017 Implementer

In this course, you'll learn how to review and create quality system documentation in compliance with ISO 17025 and implement the key concepts of the standard to allow you to monitor your laboratory quality system and achieve continual quality improvement.

Duration: 2 days   Course type: VILT/In-house
Course level: Implementation | Course details

Service Management ISO/IEC 20000-1

Show service quality is at the heart of your organization. ISO/IEC 20000-1 is commonly used for IT services, facilities management and business services to help ensure effective and resilient services in today's changing service delivery environment.

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

ISO/IEC 20000-1:2018 Requirements

You'll learn about the ISO/IEC 20000-1 requirements and how to interpret and apply the key concepts and principles of the standard to existing processes within your organization. This course will help anyone involved in defining, planning, auditing, implementing or managing a service management system (SMS) based on ISO/IEC 20000-1:2018.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

ISO/IEC 20000-1:2018 Implementation

This course help you discover on how to implement an SMS based on ISO/IEC 20000-1:2018. Using a step-by-step approach with the aid of a toolkit, you'll learn how to develop an implementation plan, create necessary documentation and implement your SMS.

Duration: 2 days   Course type: In-house
Course level: Implementation | Course details

ISO/IEC 20000-1:2018 Lead Implementer

This course combines the ISO/IEC 20000-1:2018 requirements and implementing courses, with an additional focus on leadership and management, followed by an exam. This course provide you with an in depth understanding of the standard and best practice methods to implement the standard.

Duration: 5 days   Course type: VILT/In-house
Course level: Implementation | Course details

ISO/IEC 20000-1:2018 Masterclass

The course explores key clause requirements, concepts and principles - as well as related standards and guidance. This course will provide you with the knowledge and skills to implement, maintain and improve the more technical aspects of a service management system (SMS) based on ISO/IEC 20000-1:2018.

Duration: 5 days   Course type: In-house
Course level: Implementation | Course details

ISO/IEC 20000-1:2018 Internal Auditor

This course equip you the auditing skills to help improve your organization's SMS performance. You'll learn how to assess and report on the conformity and effectiveness of an SMS based on ISO/IEC 20000-1:2018. You'll also gain the skills to initiate an audit, prepare and conduct audit activities, compile and distribute audit reports and complete follow-up activities.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | Course details

CQI & IRCA Certified ISO/IEC 20000-1:2018 Lead Auditor

Using a step-by-step approach, you'll be guided through the entire audit process from initiation to follow-up in accordance with ISO 19011. You'll gain the knowledge and skills to undertake and effectively lead a successful service management systems audit and drive improvement. You'll sit a 2 hour exam to test your knowledge and understanding.

Duration: 5 days   Course type: VILT/In-house
Course level: Auditing | Course details

Digital Trust

Information Security ISO/IEC 27001

Protecting personal records and commercially sensitive information is critical. ISO/IEC 27001 helps you implement a robust approach to managing information security.

On-demand elearning (OD)

eLearning: ISO/IEC 27001:2022 Awareness

This course introduces the key principles of information security management and the ISO/IEC 27001:2022 standard. It provides foundational knowledge to help you understand the importance of securing information and implementing effective management practices.

Duration: 1/2 hour   Course type: OD
Course level: Understanding | Course details

eLearning: ISO/IEC 27001:2022 Requirements

The course aims to explain the main requirements of ISO/IEC 27001:2022 and its organizational benefits. You'll gain an understanding of effective information security management throughout an organization and therefore protection of your information and those of your interested parties.

Duration: 4 hours   Course type: OD
Course level: Understanding | Course details

eLearning: ISO/IEC 27002:2022 Implementing the Changes

This course offers a review of the updated standard from ISO/IEC 27002:2013 to ISO/IEC 27002:2022, focusing on the key differences and how an organization may put these changes into action.

Duration: 4 hours   Course type: OD
Course level: Understanding | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

ISO/IEC 27001:2022 Requirements

Our expert tutors will explain the requirements of ISO/IEC 27001:2022 to help you understand how it could apply to your organization and the potential benefits of adopting it.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

ISO/IEC 27001:2022 Implementing

This course aims to embed the skills and knowledge necessary for you to carry out your own information security implementation project. You'll learn various implementation techniques, challenges, common mistakes and an overall in-depth information on all you need to know to successfully implement ISO/IEC 27001.

Duration: 2 days   Course type: VILT/In-house
Course level: Implementation | Course details

ISO/IEC 27001:2022 Lead Implementer

We'll teach you how to set up an ISMS that conforms to ISO/IEC 27001:2022 in an organization. You'll focus on developing your project management ability to lead a team with the implementation of an ISMS in your business.

Duration: 5 days   Course type: VILT/In-house
Course level: Implementation | Course details

Masterclass: ISO/IEC 27001 Information Security Management Systems

The course cover the context of the organization and integration with business processes. You'll have the chance to critically appraise processes, hands-on, and take away sound knowledge of ISO/IEC 27001, the ISMS framework, and how best to apply this.

Duration: 5 days   Course type: In-house
Course level: Implementation | Course details

ISO/IEC 27001:2022 Internal Auditor

You'll learn how to plan, execute and report on an audit of an ISMS in an organization assessing its conformance with ISO/IEC 27001:2022.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | Course details

CQI and IRCA Certified ISO/IEC 27001:2022 Lead Auditor

Learn how to lead, plan, execute and report on an audit of an ISMS in an organization assessing its conformance with ISO/IEC 27001:2022. You should also have knowledge of Information Security Management principles, concepts, and specifically the requirements of ISO/IEC 27001:2022.

Duration: 5 days   Course type: VILT/ILT/In-house
Course level: Auditing| Course details

CQI and IRCA Certified ISO/IEC 27001:2022 Auditor Conversion

This course will provide you with the knowledge and skills required to perform first, second and third-party audits of Information Security Management Systems against ISO/IEC 27001 (with ISO/IEC 27002), in accordance with ISO 19011 and ISO/IEC 17021, as applicable.

Duration: 3 days   Course type: VILT/In-house
Course level: Auditing | Course details

ISO/IEC 27002:2022 Implementing the Changes

This course provides a review to the updated standard from ISO/IEC 27002:2013, what the key differences are and how an organization may implement these changes should they choose to do so.

Duration: 1 day   Course type: VILT/ In-house
Course level: Understanding | Course details

ISO/IEC 27002:2022 Information Security Controls Implementation

This course provide guidance on implementing the controls from ISO/IEC 27001 and other relevant management practice guidance. You'll be able to identify appropriate controls to be implemented in different situations, along with the benefits and potential pitfalls of doing so.

Duration: 2 days   Course type: VILT/In-house
Course level: Implementation | Course details

ISO/IEC 27005:2018 Information Security Risk Management

This course provides you with clear and practical guidance on the framework and steps involved to identify, analyse and manage information security risks. It will help you to review your existing risk treatments and controls and ensure they are appropriate to manage and reduce the identified risks.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

Payment Card Industry Data Security Standard (PCI DSS) v4.0

This course will help you understand the structure of the PCI DSS v4.0 and what is involved in meeting the 12 high-level requirements, with a focus on those requirements which can be particularly challenging.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

Payment Card Industry Data Security Standard (PCI DSS) v4.0 Implememtation

This course will help you understand the structure of the PCI DSS v4.0 and what is involved in meeting the 12 high-level requirements, with a focus on those requirements which can be particularly challenging.

Duration: 2 days   Course type: In-house
Course level: Implementation | Course details

Privacy Management
ISO/IEC 27701

In today's changing regulatory landscape, make sure you're best prepared to protect personal information and become a recognized privacy professional.

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

ISO/IEC 27701:2019 Requirements

Understand how ISO/IEC 27701 can extend your ISO/IEC 27001 information security management system (ISMS) to include requirements for protecting personally identifiable information (PII) and provide a framework for a privacy information management system (PIMS).

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

ISO/IEC 27701:2019 Implementation

This course help you to provide a typical framework for extending your ISO/IEC 27001 information security management system (ISMS) including the more specific requirements and guidance for protecting your organization's personally identifiable information (PII), together constituting a privacy information management system (PIMS).

Duration: 2 days   Course type: VILT/In-house
Course level: Implementation | Course details

ISO/IEC 27701:2019 Internal Auditor

This course will provide you with sufficient information on auditing your ISO/IEC 27701:2019 implementation to enable you and your organization to understand, detect, correct and monitor the effectiveness of the framework. You'll be provided with a series of practical exercises and class discussions, which will develop your internal audit ability.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | Course details

Cloud Security / Cybersecurity

Manage cloud security risk, from cloud control implementation and auditing techniques to defining roles and responsibilities for data.

On-demand elearning (OD)

eLearning: CSA STAR Lead Auditor

This course provides insight into the fundamentals of cloud computing, its advantages and disadvantages. It provides an insight into how CSA STAR certification can help you decide whether to outsource your services to a cloud service provider.

Duration: 6 hours   Course type: OD
Course level: Understanding | **Course details**

eLearning: Auditing Cloud Security for STAR Certification

Led by an experienced tutor, this course will help you learn how to audit cloud security for the STAR certification programme and learn how to apply the maturity model when auditing a provider's security controls.

Duration: 4 hours   Course type: OD
Course level: Understanding | **Course details**

eLearning: ISO/IEC 27400:2022 Cybersecurity - IoT Security and Privacy Guidelines

This course provides a summary of the characteristics, stakeholders, life cycles and risk sources of IoT systems. ISO/IEC 27400:2022 contains guidance on controls that may be applied to enhance the security and privacy of these systems.

Duration: 4.5 hours   Course type: OD
Course level: Understanding | **Course details**

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

ISO/IEC 27017:2015 Information Security Controls for Cloud Services

This course provides in-depth guidance on implementing and managing information security controls for cloud services based on ISO/IEC 27017:2015. Designed for professionals working with cloud environments, the course equips you with the knowledge to enhance security, mitigate risks, and ensure compliance with international standards.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | **Course details**

Artificial Intelligence

Navigate the complex and rapidly evolving landscape of Artificial intelligence (AI).

On-demand elearning (OD)

eLearning: How to assess robustness of neural networks awareness

This course aims to give you knowledge of the main technical concepts of ISO/IEC 24029-1:2021, by explaining the different methods through which robustness can be assessed, as well as more advanced concepts such as data perturbation and abstract interpretation.

Duration: 1/2 hour   Course type: OD
Course level: Understanding | Course details

eLearning: Robustness for neural networks – ISO/IEC 24029-1:2021 introduction

In this course, we will introduce the concept of robustness in the context of deep learning systems, by exploring the potential dangers of non-robust neural networks and proposing a workflow for identifying and assessing robustness issues, following ISO/IEC 24029-1:2021.

Duration: 2.5 hours   Course type: OD
Course level: Implementation | Course details

eLearning: ISO/IEC 42001:2023 Requirements

Gain a thorough understanding of the history and development of ISO 42001:2023, key terms, definitions and the ISO harmonized structure. In this course, you'll learn to interpret and apply the key concepts and principles of the standard to existing processes within your organization.

Duration: 4 hours   Course type: OD
Course level: Understanding | Course details

eLearning: ISO/IEC 42001:2023 Artificial Intelligence Awareness

This short course makes you aware of what AI is, why it is important, and how your organization manages the threat. It also considers how you are a vital piece of the jigsaw and what you can do to help your organization.

Duration: 1/2 hour   Course type: OD
Course level: Introduction | Course details

eLearning: ISO/IEC 22989:2023 Understanding AI Concepts and Terminology

ISO/IEC 22989:2023 is a normative reference in ISO/IEC 42001:2023. This course will provide you with an understanding of the main concepts of AI and AI systems to complement your knowledge of management system standards.

Duration: 4 hours Course type: OD
Course level: Introduction | Course details

eLearning: ISO/IEC TR 24028:2020 - Overview of Trustworthiness in Artificial Intelligence

Explore the fundamental principles and practical guidelines of ISO 24028:2020 on trustworthiness in Artificial Intelligence. This concise course delves into the critical aspects of building and deploying trustworthy AI systems.

Duration: 3 hours   Course type: OD
Course level: Introduction | Course details

eLearning: Bias in AI systems and AI aided decision making – ISO/IEC 24027:2021

This course delves into the critical topics of bias and fairness in AI system, based on the ISO/IEC 24027:2021 standard. The course explores the importance of the ethical and fair development in AI Technologies.

Duration: 2 hours   Course type: OD
Course level: Introduction | Course details

eLearning: Bias in AI systems and AI aided decision-making awareness

This course delves into the critical topics of bias and fairness in AI system, based on the ISO/IEC 24027:2021 standard. You'll gain a deeper understanding of the concept of bias and learn practical approaches to evaluate and address bias in AI systems.

Duration: 1/2 hours   Course type: OD
Course level: Introduction | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

ISO/IEC 42001:2023 Requirements

Gain a thorough understanding of the history and development of ISO 42001:2023, key terms, definitions and the ISO harmonized structure. In this course, you'll learn to interpret and apply the key concepts and principles of the standard to existing processes within your organization.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

ISO/IEC 42001:2023 AI Controls Implementation

This course focuses on implementing effective AI controls based on ISO/IEC 42001:2023 to ensure trustworthy and compliant AI systems. Gain practical knowledge to manage AI risks, enhance transparency, and align your organization's practices with international standards.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

ISO/IEC 42001:2023 Lead Implementer

You'll gain an internationally recognized qualification that enables you to implement exceptional information security management standards in your organization. In becoming a lead implementer, you can also set the highest standard of information management tailored to your organization.

Duration: 4 days   Course type: VILT/In-house
Course level: Implementation | Course details

ISO/IEC 42001:2023 Internal Auditor

This course develops the necessary skills to assess and report on the conformance and implementation of an Artificial Intelligence Management System conforming to ISO/IEC 42001. You'll learn how to initiate an audit, prepare and conduct audit activities, compile and distribute audit reports and complete follow-up activities.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | Course details

ISO/IEC 42001:2023 Lead Auditor

This course trains AIMS auditors to lead, plan, manage and implement an Audit Plan. It also empowers them to give practical help and information to those who are working towards certification and also provides the knowledge and skill required to carry out 2nd party auditing (suppliers and subcontractors).

Duration: 5 days   Course type: VILT/In-house
Course level: Auditing | Course details

BSI Qualifications
Combines selected courses and assessments to improve your knowledge and skills.

ISO/IEC 42001:2023 Internal Auditor Practitioner Qualification

This is the first step on your auditor qualification journey, which will help you develop the skills to effectively audit AI management systems based on ISO 42001:2023. Gain the confidence to assess compliance, support continuous improvement, and promote trustworthy AI practices in your organization.

eLearning: ISO 22000:2018 Awareness

This on-demand eLearning course introduces ISO 22000:2018 and explains what a food safety management standard is and why it is necessary for all food organizations.

Duration: 1 hour   Course type: OD
Course level: Understanding | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

ISO 22000:2018 Requirements

Identify the structure and requirements of an effective management system, and what this means for you. Gain a thorough insight into food safety management systems and the key concepts and structure of ISO 22000, key terms, definitions and the ISO standardized high level structure.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

ISO 22000:2018 Implementation

In this course you will gain the required skills to conduct a base-line review of your organization's current position and implement the key principles of ISO 22000. Using a step-by-step approach, you'll learn how to develop an implementation plan, create necessary documentation and monitor your FSMS Plan.

Duration: 2 days   Course type: VILT/In-house
Course level: Implementation | Course details

ISO 22000:2018 Strategic Approach to Risk-Based Thinking

In this course you'll learn about the context of the organization and how you can apply risk-based thinking as you plan, develop, audit and maintain your FSMS.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

ISO 22000:2018 Internal Auditor

This course develops the necessary skills to assess and report on the conformance and implementation of processes based on ISO 22000. You'll learn how to initiate an audit, prepare and conduct audit activities, compile and distribute audit reports, and complete follow-up activities.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | Course details

CQI/IRCA Certified ISO 22000:2018 Lead Auditor

Over five days, you'll gain the knowledge and skills required to undertake and lead a successful food safety management systems audit. You'll be guided through the entire audit process from initiation to follow-up.

Duration: 5 days   Course type: VILT/In-house
Course level: Auditing | Course details

BSI Qualifications
Combines selected courses and assessments to improve your knowledge and skills.

ISO 22000 Internal Auditor Practitioner Qualification

This is the **first step on your auditor qualification** journey which will help you to guide improvements to maintain high standards of service deliver.

Duration: 3 days   Course type: VILT/In-house
Course level: Professional qualification | Course details

View Auditor Qualifications pathway

ISO 22000 Lead Auditor Practitioner Qualification

This is the **first step on your auditor qualification** journey which will give you the foundational knowledge of the ISO 22000 standard and key principles.

Duration: 6 days   Course type: VILT/In-house
Course level: Professional qualification | Course details

View Auditor Qualifications pathway

Internal / Lead Auditor Professional Qualification

This is the **second step on your auditor qualification** journey which takes you beyond conformity audits and develops your ability to audit improvement initiatives.

Duration: 3 days   Course type: VILT/In-house
Course level: Professional qualification | Course details

Food and retail

HACCP, GMP and MS1480

On-demand elearning (OD)

eLearning: HACCP Foundation

This course has been developed for food handlers and other staff in food manufacturing who need to understand the principles of food hygiene and safety. It covers the importance of food safety, hazards present in food, and how these hazards can be controlled effectively.

Duration: 2 hours   Course type: OD
Course level: Understanding | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

Good Manufacturing Practice

The GMP described in this course are accepted requirements for prerequisites as defined in the CODEX Alimentarius General Principle of Food Hygiene. This course will equip you with the knowledge to identify risks due to poor implementation of GMP thus reducing the potential risk of food contamination.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

HACCP Principles and Implementation

This course provides a comprehensive understanding of Hazard Analysis and Critical Control Points (HACCP) principles, equipping participants with the knowledge to identify, evaluate, and control food safety hazards. It covers key implementation steps to develop and maintain an effective HACCP system in compliance with international food safety standards.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

Food and retail

Food safety management skills

On-demand elearning (OD)

eLearning: Food Safety Foundation

This course provides you an understanding on the principles of food hygiene and safety. It covers the importance of food safety, hazards present in food, and how these hazards can be controlled effectively.

Duration: 2 hours   Course type: OD
Course level: Understanding | Course details

eLearning: Pest Awareness

This course will enable you to recognise the different Course levels of pests commonly found in food production, and how to prevent infestation. It covers the essential information needed, and includes a quiz to test your understanding on completion.

Duration: 4 hours   Course type: OD
Course level: Understanding | Course details

eLearning: Allergen Awareness

This introductory course covers the causes of allergic reactions to food, symptoms of allergic reactions and the mechanisms for controlling allergens in food production.

Duration: 2 hours   Course type: OD
Course level: Understanding | Course details

eLearning: Root Cause Analysis in the Food Industry

This course will provide delegates with a framework to implement root cause analysis and provides two commonly used methodologies to identify root cause.

Duration: 3 hours   Course type: OD
Course level: Understanding | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

BSI Catering Food Safety Certification

This course explains the BSI Catering Food Safety Certification, a unique global standard specifically developed by BSI to meet an industry need for catering operations. It fills the gap between traditional food safety standards and legal compliance.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

PAS 96:2017 Food Defence (TACCP) Guidance

This course is to equip you with the most current food industry knowledge. It introduces the application of food defence methodologies to assess and manage generic and specific threats for the development of a food defence plan.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Food Fraud Prevention (VACCP)

The course will enable you to assure the authenticity of your food ingredients and packaging by minimizing vulnerabilities through a risk assessment of your supply chain. You'll use risk assessment to identify where controls may be required to detect, deter and minimize the potential for food fraud.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

**Effective Foreign Matter Management
in the Food Industry**

This course will provide you a framework to identify the sources of foreign matter and determine appropriate controls to effectively prevent recurrence. Specific controls for glass, plastics, wood and metal have been referenced from GFSI (Good Food Safety Initiative) standards.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

Protection Against Food Allergen

This course helps you to understand how allergen affects food safety and its impact on maintaining a better Food Safety Management System. You'll also learn about various process control on equipment / facility design, engineering controls, allergenic ingredients control, personnel practices and relevant food safety training.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

**Chain of Custody; Transparency and Traceability for the
Food Supply Chain**

This course details the motivation and inherent challenges to achieve a chain of custody system across a global supply chain with varying levels of traceability. Specific insight will be gained across, assurance schemes and the intent of PAS 7000:2014 is referenced as an alternate model for supply chain traceability to substantiate product claims.

Duration: 2 days   Course type: In-house
Course level: Understanding | Course details

Root Cause Analysis in the Food Industry

This course will provide delegates with a framework to implement root cause analysis and provides two commonly used methodologies to identify root cause.

Duration: 1 day   Course type: In-house
Course level: Understanding | Course details

**Introduction to ISO/TS 22002-1:2009 Prerequisite
programmes on food safety - Part 1: Food manufacturing**

This Technical Specification is applicable to all organizations, regardless of size or complexity, who are involved in the manufacturing step of the food chain and wish to implement PRP in such a way as to address the requirements specified in ISO 22000:2005, Clause 7.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

BSI Qualifications
Combines selected courses and assessments to improve your knowledge and skills.

Food Safety Foundation Qualification

This course is a key first step in demonstrating food safety knowledge: principles; best practice; and impact awareness of safety within food production for new starters or other team members looking to consolidate knowledge and advance their career. You'll receive a BSI Mark of Trust that can be shared across your network of contacts.

Duration: 6 hours   Course type: OD
Course level: Professional qualification | Course details

Healthcare and medical devices

ISO 13485

Our ISO 13485 quality management training will help you to understand the QMS requirements for medical devices, so you can ensure that you maintain compliance.

On-demand elearning (OD)

eLearning: ISO 13485:2016 Requirements

This training course explores the requirements of the ISO 13485:2016 Quality Management System standard, discussing key principles and how the standard interacts with ISO 9001:2015 and also it serves to facilitate global alignment for Medical Device quality management systems.

Duration: 4 hours   Course type: OD
Course level: Understanding | **Course details**

Instructor led training (ILT) / Virtual instructor led training (VILT)

ISO 13485:2016 Clause by Clause

This course has been designed to provide an in depth understanding of ISO 13485:2016 by reviewing the requirements of each clause in turn, allowing you to maintain a compliant QMS.

Duration: 2 days   Course type: VILT
Course level: Understanding | **Course details**

ISO 13485:2016 Internal Auditor

This intensive course is intended for medical device quality professionals aiming to build on their knowledge of ISO 13485:2016 and evaluate the effectiveness of the quality management system in their organization.

Duration: 2 days   Course type: VILT/ILT
Course level: Auditing | **Course details**

CQI & IRCA Certified ISO 13485:2016 Lead Auditor

This course teaches the key principles and practices of effective quality management system audits in accordance with ISO 13485:2016 and ISO 19011, "Guidelines for auditing management systems". You'll gain the knowledge and skills to plan, conduct, report and follow up a QMS audit.

Duration: 5 days   Course type: VILT/ILT
Course level: Auditing | **Course details**

SS 620:2016 (2021) GDPMDS Requirements & Internal Auditor Course

This course teaches therequirements and equips participants with the knowledge to conduct effective internal audits. Through practical guidance and real-world scenarios, participants will learn how to assess compliance, identify gaps, and ensure the proper distribution of medical devices in accordance with regulatory standards.

Duration: 2 days   Course type: VILT/ILT
Course level: Understanding | **Course details**

BSI Qualifications
Combines selected courses and assessments to improve your knowledge and skills.

ISO 13485:2016 Internal Auditor Practitioner Qualification

This is the **first step on your auditor qualification** journey which will help you to guide improvements to maintain high standards of service deliver.
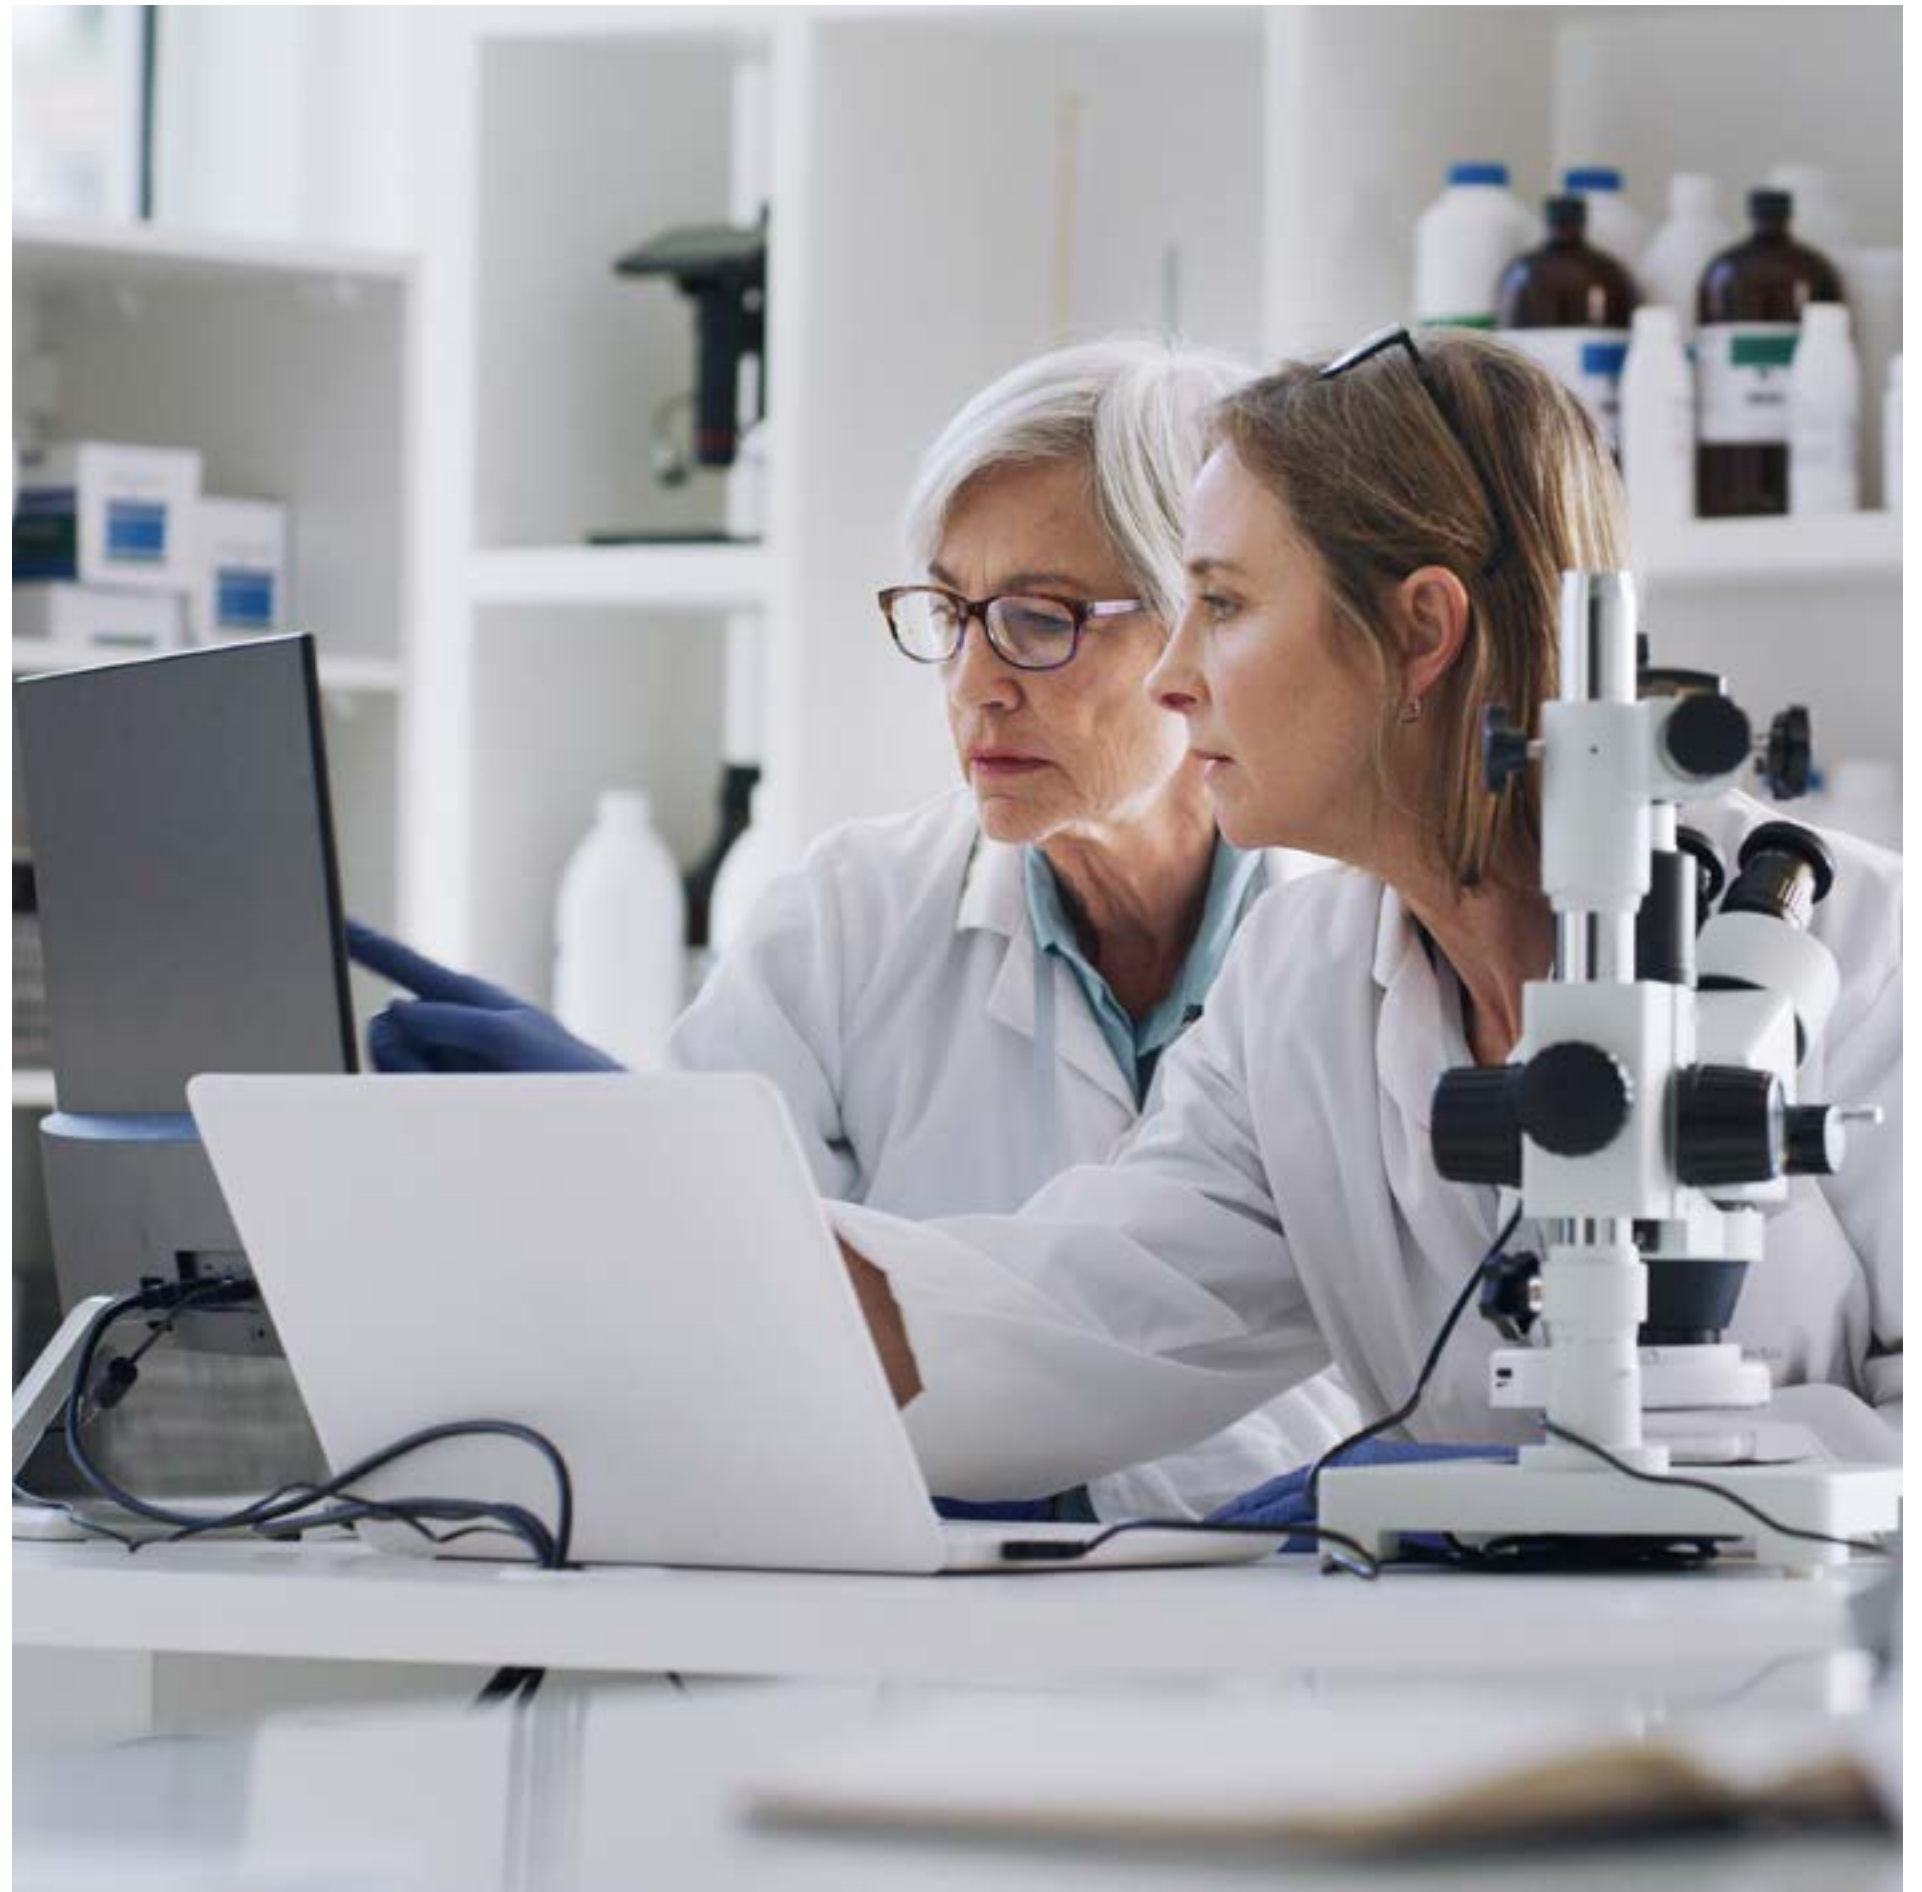

Duration: 2.5 days   Course type: VILT
Course level: Professional qualification | Course details

View Auditor Qualifications pathway

ISO 13485:2016 Lead Auditor Practitioner Qualification

This is the **first step on your auditor qualification** journey which will give you the foundational knowledge of the ISO 13485 MD QMS standard and key principles.

Duration: 5.5 days   Course type: VILT/ILT
Course level: Professional qualification | Course details

View Auditor Qualifications pathway

Internal / Lead Auditor Professional Qualification

This is the **second step on your auditor qualification** journey which takes you beyond conformity audits and develops your ability to audit improvement initiatives.

Healthcare and medical devices

Regulations and best practices

On-demand elearning (OD)

eLearning: Requirements for Risk Classification in the Medical Device Regulation (EU MDR 2017/745)

This course aims to give you a better understanding of the Risk Classification requirements as per the EU MDR (2017/745). We discuss why there is a need to classify, the importance of stating the intended purpose and how this plays a role in applying the correct conformity assessment procedures.

Duration: 1 hour   Course type: OD
Course level: Understanding | Course details

eLearning: Implementation of IVDR for CE Marking

This training course aims to offer guidance on implementation of the requirements stipulated in the IVDR into your business. The Regulation contains detailed requirements that need to be implemented, and will affect all IVD manufacturers, importers, distributors, and EU Representatives.

Duration: 4 hours   Course type: OD
Course level: Understanding | Course details

eLearning: Awareness of the In Vitro Diagnostic Regulation

This short course will focus on how the IVDR prioritizes safety, effectiveness, and the highest standards of public health within the EU.

Duration: 1/2 hour   Course type: OD
Course level: Understanding | Course details

eLearning: The Obligations for Economic Operators within the Medical Device Regulations (EU MDR 2017/745))

This course aims to provide you with the key requirements for economic operators within the Medical Device Regulations (MDR).

Duration: 1 hour   Course type: OD
Course level: Understanding | _

eLearning: ISO 14971:2019 Risk Management: Requirements

This course is designed to provide you with an understanding of ISO 14971:2019 and the impact it has on the design, development, manufacturing, and lifecycle of medical devices. It will also provide medical device manufacturers with knowledge of how ISO 14971:2019 links with the ISO 13485 standard and the MDR 2017/745.

Duration: 4 hours   Course type: OD
Course level: Understanding | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT)

Understanding of FDA 21 CFR part 820 – Quality System Regulation

This course will give you a detailed overview of the United States regulatory requirements for medical devices. Understand the expectations of the FDA 21 CFR 820 for quality system regulation and feel prepared for an FDA inspection.

Duration: 2 days   Course type: VILT
Course level: Understanding | Course details

ISO 14971:2019 Risk Management for Medical Devices: Requirements

This course helps you gain an understanding of how ISO 14971 can improve your business and risk management efforts. You'll also understand how ISO 14971 applies to ISO 13485.

Duration: 1 day   Course type: VILT
Course level: Understanding | Course details

Medical Device Single Audit Program (MDSAP) Fundamentals and Readiness

This course will prepare you to host a MDSAP audit and allow you to determine if your own internal QMS processes are consistent with the requirements of the MDSAP audit mode for the jurisdictions where your products are marketed.

Duration: 2 days   Course type: VILT
Course level: Understanding | Course details

Requirements of the Medical Device Regulation 2017/745 (MDR)

This course conveys key concepts of the European Medical Devices Regulation. You will gain understanding of the requirements stipulated within MDR.

Duration: 2 days   Course type: VILT
Course level: Understanding | Course details

Implementation of the Medical device regulation 2017/745 (MDR) for CE marking

This course aims to offer guidance on implementation of the requirements stipulated in the MDR. It focusses on enabling you to draw up a clear concept or project plan, and how to integrate the requirements into your business and your documentation.

Duration: 3 days   Course type: VILT
Course level: Implementation | Course details

EU Medical Device Regulation (MDR) 2017/745 – QMS Auditor Training

This course is designed to give you insights into how Notified Bodies may perform a MDR QMS compliance audit, using the topics of a typical MDR audit agenda as the basis.

Duration: 3 days   Course type: VILT
Course level: Auditing | Course details

Post-market Surveillance and Vigilance under the Medical Device Regulation (MDR) and In Vitro Diagnostics Medical Devices Regulation (IVDR)

This course has been designed to provide manufacturers with the tools to implement an appropriate system for gaining and reviewing experience in the post production phase from the range of devices they manufacture.

Duration: 1 day   Course type: VILT
Course level: Understanding | Course details

Manufacturing Process Validation for Medical Devices: Introduction to Concepts and Methods

This course aims to enable manufacturers to know what process validation evidence is necessary to demonstrate the manufacturing process is validated.

Duration: 1 day   Course type: VILT
Course level: Understanding | Course details

Good Distribution Practice for Medical Devices (GDPMD) Requirements & Internal Auditor

This course is designed to provide participants with an understanding of the requirements for good distribution practice for medical devices.

Duration: 2 days   Course type: VILT
Course level: Understanding | Course details

BSI Qualifications
Combines selected courses and assessments to improve your knowledge and skills.

Medical devices regulation (MDR) Practitioner Qualification

As a medical device professional, you understand the importance of implementation and maintenance of compliance to the MDR. BSI's interrelated qualifications consist of carefully selected training courses, delivered by industry experts, and underpinned by assessments.

Transport and mobility

Aerospace
AS 9100

Having an internationally recognized Aerospace Quality Management System (AQMS) allows you to enhance organizational performance, increase customer satisfaction and gain a competitive edge.

AS/EN/JISQ 9100:2016 Requirements

Gain a thorough understanding of the history and development of 9100:2016, key terms, definitions and the integration and the alignment to the ISO standardized high level structure. You'll learn to interpret and apply the key concepts and principles of the standard to existing processes within your organization.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | **Course details**

AS/EN/JISQ 9100:2016 Implementation

Gain the required skills to conduct a base-line review of your organization's current position and implement the key principles of 9100:2016. Using a step-by-step approach, you'll learn how to develop an implementation plan, create necessary documentation, monitor your AQMS and achieve continual quality improvement.

Duration: 3 days   Course type: In-house
Course level: Implementation | **Course details**

AS/EN/JISQ 9100:2016 Internal Auditor

This course develops the necessary skills to assess and report on the conformance, and implementation of processes, based on AS/EN/JISQ 9100:2016. You'll learn how to initiate an audit, prepare and conduct audit activities, compile and distribute audit reports and complete follow-up activities.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | **Course details**

PROBITAS AS/EN/JISQ 9100:2016 Lead Auditor

Using a step-by-step approach, the course commences with establishing a foundation of knowledge in both Aerospace QMS and lead auditing requirements appropriate to the Aviation, Space and Defence (ASD) industries.

Duration: 5 days   Course type: VILT/In-house
Course level: Auditing | **Course details**

Transport and mobility

Automotive (IATF 16949, VDA ISA based on TISAX)

IATF 16949:2016 is the global technical specification and quality management standard for the automotive industry. It outlines everything you need to know about achieving best practice when designing, developing, manufacturing, installing or servicing automotive products.

On-demand elearning (OD)

eLearning: ISO/SAE 21434:2021 Vehicle Cybersecurity Requirements

ISO/SAE 21434 provides the first dedicated standard to consider cybersecurity in engineering road vehicles. This four-hour on-demand course will provide the knowledge required to manage cybersecurity in automotive engineering.

Duration: 1 hour   Course type: OD
Course level: Understanding | Course details

eLearning: Introduction to VDA ISA based on TISAX®

In this course, you will learn the requirements of the VDA Information Security Assessment (ISA) and TISAX® as well as the benefits for your own organization.

Duration: 2 hours   Course type: OD
Course level: Understanding | Course details

Instructor led training (ILT) / Virtual instructor led training (VILT) / In-house

IATF 16949:2016 Requirements

This course will help you identify key requirements, and the structure of an effective Automotive QMS and what this means for you. Gain a thorough understanding of the history and development of IATF 16949:2016, key terms, definitions, integration and the alignment to the ISO standardized high level structure.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

IATF 16949:2016 Implementation

Gain the required skills to conduct a base-line review of your organization's current position and implement the key principles of IATF 16949:2016. You'll learn how to develop an implementation plan, create necessary documentation, monitor your AuQMS and achieve continual quality improvement.

Duration: 3 days   Course type: In-house
Course level: Auditing | Course details

IATF 16949:2016 Internal Auditor

This course develops the necessary skills to assess and report on the conformance, and the effective implementation of processes, based on IATF 16949. You'll learn how to initiate an audit, prepare and conduct audit activities, compile and distribute audit reports and complete follow-up activities.

Duration: 2 days   Course type: VILT/In-house
Course level: Auditing | Course details

IATF 16949:2016 Lead Auditor

This course will allow you to consolidate your expertise with the latest developments and contribute to the continuous improvement of the business. You'll grasp the key principles and practices of effective AuQMS audits in line with IATF 16949:2016 and also ISO 19011 'Guidelines for auditing management systems'.

Duration: 5 days   Course type: VILT/In-house
Course level: Auditing | Course details

Statistical Process Control (SPC)

Learn how SPC can be used to evaluate process capability and process performance. This course provides an overview of the methodology used to evaluate a process using statistical methods, and using this information to evaluate and take action on both the process and the output from the process.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

Automotive Core Tools for Auditors (APQP, PPAP, FMEA, SPC, MSA)

Core tools in IATF 16949 are referring to APQP, PPAP, FMEA, SPC and MSA. These core tools are often difficult for users to master hence this course is designed to equip you with the essential knowledge on the core tools applications from the auditor perspectives.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

Measurement Systems Analysis (MSA)

Learn about methods used to assess the quality of a measurement system, and to understand the sources of variation present and the impact on the measurement result.

This course provides an overview of MSA and the approaches used to analyse both attribute and variable measurements systems defined in the MSA reference manual.

Duration: 2 days   Course type: VILT/In-house
Course level: Understanding | Course details

AIAG Advanced Product Quality Planning 3rd Edition and AIAG Control Plan 1st Edition Transition

This transition course has been developed to highlight the changes from APQP 2nd Edition to 3rd Edition and Control Plan 1st Edition. It was designed to explain the rationale behind the changes to enable organizations to implement the changes within their organization.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

AIAG Control Plan 1st Edition Training Course

This course has been designed and developed to provide an overview of the key changes of the AIAG APQP 1st Edition manual and its linkages to APQP 3rd Edition requirements.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

AIAG Advanced Product Quality Planning 3rd Edition

This course provides an overview of the tools, procedures and reporting requirements specified in the Advanced Product Quality Planning reference manual; detailing the critical steps in the Product Quality Planning Cycle.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

Total Productive Maintenance (TPM) for IATF 16949:2016

This course provides an introduction to the eight pillars of TPM and the TPM implementation roadmap. You'll also learn how to identify production losses due to low Overall Equipment Effectiveness (OEE) and establish appropriate action plans.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

Production Part Approval Process (PPAP)

This course provides an overview of the PPAP, and the generic PPAP process requirements for production parts as defined in the Production Part Approval reference manual.

Duration: 1 day   Course type: VILT/In-house
Course level: Understanding | Course details

VDA ISA based (TISAX) Implementation

This course provides an introduction to the VDA ISA catalogue, which is based on the TISAX® concept, as well as the concrete requirements for organizations to implement and adapt their processes. This will enable you to demonstrate maximum information security to your customers as well as within your organization and secure your competitive advantage.

Duration: 2 days   Course type: In-house
Course level: Implementation | Course details

Introduction to VDA ISA based on TISAX®

In this course, you will learn the requirements of the VDA Information Security Assessment (ISA) and TISAX® as well as the benefits for your own organization.

Duration: 1 Day   Course type: VILT/In-house
Course level: Understanding | Course details

BSI Qualifications
Combines selected courses and assessments to improve your knowledge and skills.

BSI Qualifications

BSI Qualifications explained

Qualifications from BSI – A mark of trust for your expertise.

Qualifications validate your expertise as you build a career in your chosen field.

We provide exciting and innovative qualifications, in a variety of subject areas to build your skills and knowledge.

Practitioner

A Practitioner qualification demonstrates your audit skills ensuring conformance and effectiveness. This qualification shows your commitment to your profession and career projection.

Professional

A Professional qualification builds on learning from the practitioner stage. As a Professional you demonstrate your higher- level skills, critical thinking skills and demonstrate your competence and career aspirations.

Certified Professional

By becoming a Certified Professional you show you have reached the pinnacle of your learning, with trusted credentials which are aligned to the most senior roles in your organization.

Qualification pathway for
ISO 9001 Internal / Lead Auditor

Our learning pathway will validate your learning with examinable results, earning you industry recognized qualification badges at each stage of the journey.

How are qualifications assessed?

Each qualification is assessed by online examinations taken with 30 days of the associated course ending.

How you become qualified?

Once individuals successfully complete the examinations, we issue your BSI Mark of Trust. This Mark of Trust provides a strong and credible endorsement that can be displayed on your CV, LinkedIn profile, and email signature. In addition to highlighting your competence, organizations can demonstrate increased expertise of employees qualified at practitioner and professional level.

Start your qualification journey today.

Step 1
ISO 9001 Internal / Lead Auditor
Practitioner

ISO 9001 Requirements
● Exam

ISO 9001 Internal / Lead Auditor
● Exam
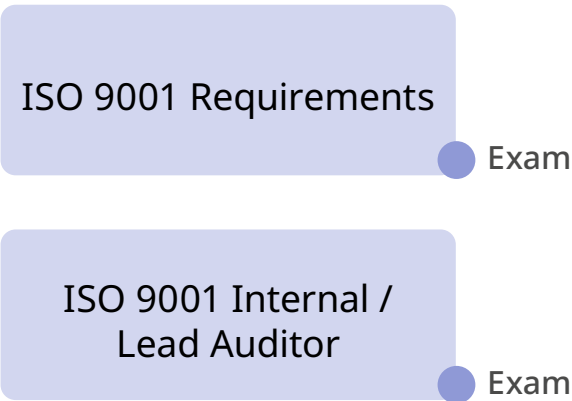

Internal Auditor Practitioner includes:
- ISO 9001 Requirements (OD)
- ISO 9001 Internal auditor (VILT/ILT)

Lead Auditor Practitioner includes:
- ISO 9001 Requirements (OD)
- CQI & IRCA Certified ISO 9001 Lead auditor (VILT/ILT)

Each course is followed by a mandatory online multiple-choice examination.

On successful completion, you'll receive a BSI Mark of Trust.

Step 2
Internal / Lead Auditor
Professional

Process Improvement: Introduction
● Exam

Process Improvement: Auditor
● Exam

The professional qualification goes beyond conformity. It develops the ability to audit improvement initiatives. Each course is followed by a mandatory online multiple-choice examination.

Prerequisites
Completion of the ISO 9001 Internal / Lead Auditor Practitioner qualification.

On successful completion, you'll receive a BSI Mark of Trust.

Step 3
Internal / Lead Auditor
Certified Professional

Practical Application

A 3-year rolling program validating practical application of skills and continuing professional development.

Prerequisites
Completion of the ISO 9001 Internal / Lead Auditor Professional to apply to become Certified. Applicants are required to have completed at least three audits within the last three years from the date of application.

On successful completion, you'll receive a BSI Mark of Trust.

Qualification pathway for
ISO/IEC 20000-1
