in progress

Course descriptive

As internationally recognized best practice for an information security management system (ISMS), ISO/IEC 27001 helps organizations to build resilience and protect information. So it's no surprise that companies invest in training their people to get the knowledge and skills to use ISO/IEC 27001 to secure their business.

This ISO/IEC 27001 requirements course will provide you with an excellent introduction to the standard and identify the importance of information security to you and your interested parties. Packed with practical activities, group discussion and classroom learning, our expert tutors will make sure you complete the course feeling confident that you can apply your new knowledge as soon as you step back inside your organization.

Information security is critically important to both you and your interested parties. BSI has developed a comprehensive one-day non-residential course that explores in depth the organizational implications of the International Standard for Information Security Management (ISO/IEC 27001:2013). The course aim is to explain the main requirements of ISO/IEC 27001:2013 and its organizational benefits.
