

ISO 45001 Implementation - International

Your partner
in progress

Course descriptive

ISO 45001 is the management system standard for Occupational Health and Safety (OH&S) that is aligned to internationally recognized best practice and makes use of the high-level structure. ISO 45001 helps organizations to provide safe and healthy workplaces, by preventing work-related injury and ill health; as well as by proactively improving its OH&S performance.

Gain the required skills to conduct a base-line review of your organization's current position and implement the key principles of ISO 45001. Using a step-by-step approach, you'll learn how to develop an implementation plan, create necessary documentation and monitor your OH&S MS.

Pedagogical objectives

This course will help you:

- Become familiar with a typical framework for implementing an occupational health and safety management system (OH&S MS). This should form a sound basis for your implementation efforts and benefit your organization
- Recognize where adjustments might need to be made, to this framework, to accommodate your particular situation and progress made to date
- Increase your knowledge on the key concepts and requirements of ISO 45001, from an implementation perspective
- Gain the skills to conduct your own baseline review of your organization's current position with regard to ISO 45001, and implement key concepts and requirements relating to ISO 45001
- Your learning will be through an activity-based, delegate-centered approach. This will help you share experiences and knowledge with other attendees; bringing alive the information presented and resulting in enhanced retention and application to your own workplace.

Skills to be acquired

The course covers the following specific learning objectives:

Knowledge

- Recognize a typical framework for implementing ISO 45001 following the PDCA cycle
- Interpret key concepts and requirements of ISO 45001 from an implementation perspective
- Identify the benefits specific to an organization in relation to implementing an effective OH&S MS

Skills

- Conduct a baseline review of an organization's current position with regard to ISO 45001
- Implement key concepts of ISO 45001
- Implement key requirements of ISO 45001

Targeted audience

Anyone involved in the planning, implementing, maintaining or supervising of an ISO 45001 OH&S MS.

Prerequisites

You should already have a good knowledge of ISO 45001, and the key principles of an OH&S MS. If not, we strongly recommend you attend our ISO 45001 Requirements course. The requirements of ISO 45001 are not taught on this course.

Duration

2 days – 14 hours

Pedagogical, technical and framing means

Course materials including:

- Introduction to the training, detailed program and security assignments
- Course presentation, theory and activities/ role plays
- Answers to the activities
- Videos
- Additional documents, distributed during the sessions, to use for the activities
- Attendance sheet to be signed

Assessment specifics

- Questionnaire to assess the knowledge at the end of the training
- Customer survey

What is included?

- Course materials, provided electronically
- Letter of attestation
- Official certificate

Agenda – Day 1
