Course descriptive

This ISO 56000 Innovation Management Fundamentals training course provides a comprehensive overview of the ISO 56000 family of innovation management standards. It covers the fundamental concepts and principles of innovation management as outlined in the ISO 56000 standards. Participants will explore the potential benefits that the ISO 56000 family can bring to an organization, such as improved innovation efficiency, organizational agility, and competitive advantage. The course includes activities and discussions that help participants think about how to apply the ISO 56000 standards within their own organizations. Additionally, it equips participants with the skills needed to advocate for and implement innovation management practices at a practitioner level.

Pedagogical objectives

This course will enable you to:

- Gain a thorough understanding of the ISO 56000 family of innovation management standards
- Improve efficiency innovation within your organization
- Enhance organizational agility and gain a competitive advantage
- Foster a culture of innovation
- Learn key innovation management principles and concepts
- Understand a common innovation language to facilitate better collaboration
- Engage in practical activities to explore the application of ISO 56000 standards in your organization

Skills to be acquired

Upon completion of this course, you will be able to:

- Identify different types of ISO standards and their applications
- Explain what innovation management is and its importance to an organization
- Describe the concept of an innovation management system and its potential benefits
- Understand the background of the ISO 56000 family
- Identify key terms and definitions used in the ISO 56000 family
- Recognize the key concepts, principles, and structure of the ISO 56000 family
- Identify common barriers organizations face when innovating
- Provide effective feedback that contributes to a process improvement approach within an organization, driving process effectiveness and efficiency

Targeted audience

This course is ideal for business leaders, innovation managers/directors, quality and process improvement professionals, and product managers/developers who are interested in learning about the ISO 56000 innovation management standards and the benefits they offer. It is also suitable for those who wish to foster a culture of innovation within their organization.
